ALL 3 TO 5 FOOT CLUMPS

A4209—Now, you can add a charming, natural effect to your lawn planting with this graceful, White Clump Birch. We offer clumps of 3 distinct trunks on one root system. The young trees have a tarnished brown bark which turns a lovely snow white in a year or two with lasting beauty. The glossy, green foliage turns a bright yellow in the fall, with the paper-white bark adding beauty all winter long. Grows to about 25 to 30 feet. We have a fine selection of Clump Birch for this spring but limited. Be sure to order early.

DON'T MISS THIS EXTRA
CHOICE NEW SWEET CORN

Sunglow

Best Ever For Eating

179—(62 days). We sent samples to some of our customers last year and we never had such a response of fine reports. It made a hit everywhere it was planted. Very early in season. Sunglow has big 6 to 7 inch ears and is 12 rowed. You'll like its delightful golden yellow color. Reddish tinge to husks and foliage makes it a distinctive variety. But, best of all, is its eating quality—sweet and tender—a real new thrill for sweet corn lovers. Freezes extra well. Be sure to plant this one.

Spring 1962

Hello Folks . . .

Though we've crowded the new 1962 catalog this year with new and choice items for you, I still saved this corner for a chance to say "hello" to all of you.

This is a good year to "grow your own groceries." Prices are high and a garden will save. Also, it's good for you physically, mentally and a lot of fun, too.

And a few decorative plants added around your house go a long way to improve its appearance, its value and your pleasure. You'll find a wealth of new ideas and new interesting varieties in the 56 pages of this book. We've searched the world, literally, for new plants and better varieties, for you.

Planting has been our business for over 95 years. We've learned a bit, I think. This accumulated knowledge is passed on to you in the varieties we offer, in the quality of our plants and the care we take in them. You can't get these advantages just anywhere. That's why good gardeners send to Gurney's to be sure. We'll do our best to please you.

Good luck in 1962

Finest VEGETABLE PLANTS from Gurney's

CHOICE TOMATO PLANTS

Many gardeners prefer to raise their tomatoes from plants rather than seed. We believe this is probably the easiest way to do it. All our tomato plants are top quality, hardy, field-grown and shipped to you direct from our southern grower. We guarantee they will reach you in first-class condition.

MARGLOBE The Best Canner

G11—It's will resistant and has the ability to produce in spite of adverse weather conditions. This is one of the finest, solid, deep red tomatoes anyone can grow and has been a leader for many years. You'll be mighty happy with Marglobe. See prices below at right.

EARLIANA Earliest of All

G10—This is the earliest tomato we offer. Has excellent flavor and quality plus being a heavy producer. This fine, early, red tomato is one of our most popular. Excellent for you northern planters as well as southern growers that want fruit ahead of the normal season. See prices below at right.

SIoux Has Hybrid Vigor

G12—A fine, early, globe-shaped, medium sized tomato that has real thick, meaty, juicy fruit. Its deep red color and excellent flavor make it "tops" for market and a favorite for home use. Sioux is a real sturdy grower and has true hybrid vigor. Be sure to try this fine tomato. See prices below.

GOLDEN SUNRAY Resistant to Wilt

G8—Golden orange color with no acid. Mild, rich flavor and makes delicious juice.

Gurney's Carrots

TENDERSWEET
Crisp and Sweet
635—(75 days.) We don't know of a sweeter, better carrot than Tendersweet. It is coreless, fine textured and a beautiful deep orange. If you like carrots and want to try a new, tastier, better variety—be sure and plant Tendersweet. We consider it one of the very finest.
Pkt. 20c; oz. 73c; ¼ lb. 1.88, postpaid.

EARLY CORELESS
For Home Use or Market
634—(70 days.) Beautiful carrots about 8 in. long, 1½ in. thick, and the same size top to bottom. Flesh scarlet-orange. Very sweet, fine grained, tender, nearly coreless. Fine for bunching, for winter or freezing.
Pkt. 20c; oz. 70c; ¼ lb. 1.65, postpaid.

OXHEART the Heaviest
Yielding Table Carrot
629—(75 days.) This short, broad carrot is a heavy yielder and one of the easiest to grow and harvest. The roots are sometimes 5 inches in diameter and about the same length. An excellent table carrot of fine quality. Highly nutritious and a good keeper.
Pkt. 18c; oz. 65c; ¼ lb. 1.60, postpaid.

SPECIAL CARROT OFFER
Here's an offer to give an all season supply of fresh carrots.
1 Pkt. OXHEART—the early one.
1 Pkt. DANVERS HALF LONG—most popular.
1 Pkt. RED CORED CHANTENAY—new and better.
250X—All 3 for 39c, postpaid.

Red Cored CHANTENAY
So Sweet and Tender
630—(70 days.) Small cored, with bright orange flesh, fine grained, tender, crisp and sweet. It is medium early, maturing in about 70 days. The tapering roots are about 6 inches long and 1 to 2 inches in diameter. Easy to pull. May be grown as spring, summer or fall crop. We think this one is about the best, most delicious of all the carrots we are offering.
Pkt. 20c; oz. 70c; ¼ lb. 1.65, postpaid.

DANVERS HALF LONG
For Storage & Canning

627—(75 days.) Medium in length and of rich orange color. One of the finest quality, best tasting carrots. Outyields almost any other variety. One of our best storing and canning varieties. Pkt. 17c; oz. 60c; ¼ lb. 1.45, postpaid.

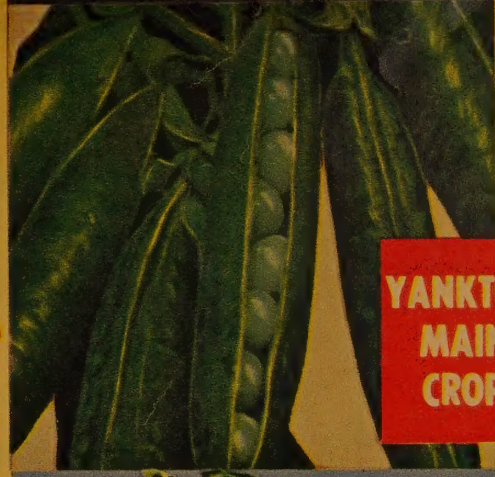

Had Trouble With Carrot Grubs?
Sow Aldrin Granules along with the seed to stop these pests. Works with parsnip seed too. See Aldrin Granules on page 26.

DANVERETTE
An Extra Fine New Carrot

628—(70 days.) A smaller, more refined type of Danvers Half Long. Has a beautiful deep orange color and the quality is excellent. Dandy for freezing and canning. This is one of the newer varieties that is fast gaining in popularity with gardeners everywhere. Try it.
Pkt. 18c; oz. 65c; ¼ lb. 1.60, postpaid.

It's Easy to Grow Carrots
Make first planting as soon as possible in the spring. Successive plantings throughout the season will give you plenty to put away when winter comes. Cover seed ½ in. deep. Have rows 18 to 24 in. apart and thin out 1 to 2 in. apart in the row. Cultivate well. A packet sows about 20 ft. An ounce sows about 100 feet of row.

Gurney's Bigger Yielding GARDEN PEAS

YANKTON MAIN CROP

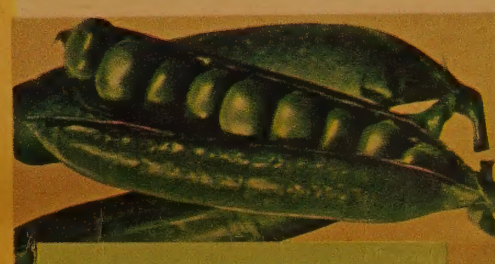

Gurney's garden peas are all northern-grown and carefully selected for disease resistance, type and vigor.
Plant the early varieties as soon as you can get them in the ground. Plant all other varieties a week to 10 days later. All peas like some brush or trellis to grow on. It keeps the pods off the ground and you'll get a bigger yield.
For a continuous supply, make several weekly plantings starting with Early Alaska and follow with Little Marvel, Laxton's Progress and Perfection.
1 lb of peas is enough for about a 50 to 75 foot row.

PERFECTION
Sure Yielder
157—(65 days.) Plant Perfection and have green peas all season. The finest, sweetest quality and tenderness that you have ever tasted. Most drought and heat resistant of all. Grows about 2 feet tall and loaded with large pods containing 6 to 10 peas.
Triple size pkt. 25c; ½ lb. 50c; 1 lb. 85c; 3 lbs. 1.95, postpaid.

EDIBLE PODDED PEAS
No Shelling Necessary
160—Dwarf Gray Sugar. (57 days.) The pods are so juicy and tender you do not shell them but eat pods and all, like string beans. Triple size pkt. 25c; ½ lb. 50c; 1 lb. 80c; 3 lbs. 1.95, postpaid.

BLACK EYED PEAS
An Old Favorite
168—The old-fashioned kind that are so popular in the south. Use green in the summer and dry for use like beans in the winter. Triple size pkt. 20c; ½ lb. 48c; 1 lb. 79c; 3 lbs. 1.85, postpaid.

LITTLE MARVEL
Tender and Sugar Sweet
152—(62 days.) If we could have but one kind, it would be Little Marvel and we've tried 'em all. Very tender, heavy yielder. It will be a long time until we find a better one. In yield, earliness, quality and delicious sweetness it is tops. Fine for freezing.
Triple size pkt. 25c; ½ lb. 50c; 1 lb. 80c; 3 lbs. 1.98, postpaid.

VICTORY FREEZER
Best for Freezing
154—The new "All-America" Medal winner. Matures in 65 days with tremendous yields of delicious high quality peas. Finest for the home freezer. Grows to 29 inches. Big 3½ in. pods.
Triple size pkt. 23c; ½ lb. 50c; 1 lb. 80c; 3 lbs. 2.00, ppp.

LAXTON'S PROGRESS (Big Dakota)
Big and Dark Green
144—(65 days.) You want the most peas you can get, don't you? Then plant Laxton's Progress. By actual count we have found that they yield more pods to the vine and more peas to the pod. They are of delicious quality and luscious tasting. The largest peas you have ever raised. Fine for freezing.
Triple size pkt. 22c; ½ lb. 50c; 1 lb. 80c; 3 lbs. 1.95, postpaid.

GURNEY'S HOME FREEZER SPECIAL

LAXTONIAN . . . Vigorous and Dependable
141—(64 days.) The top notch early pea. This is a pea that just suits us, and we eat lots of peas during the season. We like them any way they can be served.
The vines of this large extra early, heavy bearing pea are very stocky, dwarf and vigorous. The pods are long, dark green and simply bursting with immense, sweet, tender, high quality peas. Excellent for home gardens and freezing.
Triple size pkt. 22c; ½ lb. 50c; 1 lb. 80c; 3 lbs. 1.95, postpaid.

Special Be Sure to Inoculate Your Peas for Better Yields
A 25c packet of Nitragin is enough for 5 lbs. of peas and beans. Full directions for use are printed on the packet. It will pay for itself many times over. No. 4039—25c, postpaid.

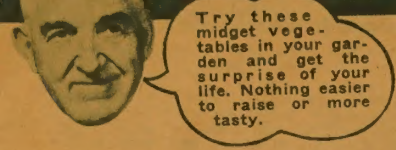

Extra EARLY ALASKA
Disease-Resistant
146—Earliest of All. (52 days.) Alaska is absolutely the earliest pea and the heaviest yielder. The slender light green vines grow about 2 feet tall and are literally covered with pods. The peas are of excellent quality, and as they ripen at once, are easy to gather. If you want a lot of peas and want them early, plant Alaska.
Triple size pkt. 22c; ½ lb. 50c; 1 lb. 80c; 3 lbs. 1.95, postpaid.

AMERICAN WONDER
Early Favorite—Heavy Yielder
149—(60 days.) Our improved strain of American Wonder is one of the earliest wrinkled peas grown. The dwarf vines grow about 1 ft. tall and are covered with medium size pods.
This is one of the sweetest and tenderest peas we have ever raised. If you want quality, plant American Wonder.
Triple size pkt. 20c; ½ lb. 49c; 1 lb. 79c; 3 lbs. 1.90, postpaid.

EARLY SWEET
Tender, Delicious Wrinkled Alaska
159—(55 days.) The new wilt-resistant pea. This one is like Early Alaska, except its peas are somewhat larger and wrinkled. Bears in 55 days; the vines grow just about 2½ to 3 feet tall and are fully as hardy as Alaska. We are sure you will like this fine canning and table variety.
Triple size pkt. 20c; ½ lb. 50c; 1 lb. 80c; 3 lbs. 1.95, postpaid.

MIDGET VEGETABLES

(Tomato Plants on Page 2)

Days indicated are from plant setting to picking.

429—Sioux. (70 days.) A special selection of two leading varieties plus unusually fine hybrid vigor. Fine for market or home use. Globe-shaped, medium size, early, thick solid walls, deep red color. Pkt. 20c; ½ oz. 75c; 1 oz. 1.20, postpaid.

407—Gurney's All State. (65 days.) Year after year we find this one of the very best. Beautiful, smooth, red tomatoes that are ideal for slicing. Small plants loaded with fruit, make it the perfect garden type. Pkt. 20c; ½ oz. 85c, postpaid.

405—"Hy-Top." Our own F₂ hybrid tomato. Loads of large, deep scarlet, globe-shaped fruit. Delicious quality and heavy yielding. "Hy-Top" has ample foliage to prevent fruit burn. You'll go for seconds after you taste "Hy-Top." Pkt. 35c; 2 pkts. 50c; ½ oz. 1.00, postpaid.

403—Golden Sunray. (72 days.) A new, highly productive golden orange tomato. Resistant to fusarium wilt. Has mild but rich flavor. Makes delicious juice. Pkt. 20c; ½ oz. 50c; ½ oz. 85c, postpaid.

402—Earlbell. (68 days.) Big yields of beautiful scarlet red tomatoes. Extra fine flavor and quality. Smooth, solid and does not split easily. Enough foliage to prevent sunburn. Fine for home or market gardens. Pkt. 25c; ½ oz. 50c; 1 oz. 90c, postpaid.

417—Bounty. (65 days.) Early and heavy yielding. Smooth and firm with a pleasing flavor. Outyielded six other commonly planted varieties. Early ripening, self-pruning, uniform in color and tops in quality. Pkt. 25c; ½ oz. 35c; ½ oz. 65c, postpaid.

Following Varieties Not Pictured:

418—Ponderosa (80 days.) The largest tomato grown. Produces fruit weighing over 2 pounds. The to-

matoes are flat, nearly solid, and delightfully mild flavored. Tops for slicing or canning. Pkt. 20c; ½ oz. 65c; 1 oz. 1.10, postpaid.

435—Roma. (76 days.) Mild, pear shaped, dry fleshed. Big yield on small vines. Dark red fruits 2½" long, 1½" across. Makes wonderful chili sauce and catsup. Pkt. 25c; 2 pkts. for 40c, ppd.

422—Marglobe. (80 days.) For years this old reliable, main crop variety has led the field. Stands weather and a fine producer. Pkt. 15c; ½ oz. 45c; 1 oz. 85c, postpaid.

427—Firesteel. (68 days.) One of the finest new tomatoes introduced. Large fruited, globe-shaped, deep crimson color. Unaffected by heat and drought. Big yield. Fine quality. Pkt. 20c; ½ oz. 35c; ½ oz. 65c, postpaid.

433—Climbing Tomato. (90 days.) Be the talk of the neighborhood. Tie to a trellis and watch it go—10 to 18 feet. Produces the

largest fruits you ever saw—rich crimson, fine flavor and often weighing over a pound. Few seeds. Pkt. 35c; 2 for 55c; ½ oz. 1.00, ppd.

428—Doublerich. (75 days.) This new one has a vitamin C content equal to citrus fruit. Vigorous vines carry loads of firm deep red, fruit. Smooth and doesn't crack. Weigh over ¼ lb. each. Retains vitamin C when cooked. Pkt. 25c; 2 for 40c; ½ oz. 1.10; 1 oz. 1.60, ppd.

419—Yellow Pear. If you want delicious preserves, plant this bright yellow, pear-shaped tomato. Loved by all. Pkt. 20c; ½ oz. 35c; ½ oz. 65c, ppd.

YELLOW HUSK

413—This early dwarf type ground cherry is easy-to-grow. Fruit about the size of a cherry, bright yellow and enclosed in a husk. Makes wonderful preserves and pies. Pkt. 20c; ½ oz. 35c, ppd.

4 Finest HYBRID TOMATOES

SIouxKANN

420—(58 days.) A new and better Hybrid tomato developed by the S. D. Ag. College. A first generation cross of Sioux and Earliana. Especially adapted to plains states conditions. Solid, meaty and of medium size—ideal for canning and home use. Extremely early. Pkt. (40 seeds) 40c; extra-large packet (150 seeds) 1.00, postpaid.

EARLEE RED

426—(62 days.) A drought-resistant, early hybrid that can really take it. The most prolific early variety we know of. Bright red fruit is uniform globe-shaped and extremely smooth. Medium sized for easy canning, and delicious. Try it! Pkt. (40 seeds) 40c; extra big pkt. (150 seeds) 1.00, postpaid.

SCARLET GLORY

431—(75 days.) If you want a Main Crop Hybrid that will produce loads of wonderful tomatoes, try Scarlet Glory. Fruit is large, globular, firm-fleshed and a beautiful rich scarlet color. Extremely uniform in size. Superb quality. Plant this one if you want plenty of fruit. Pkt. (40 seeds) 40c; extra big pkt. (150 seeds) 1.00, postpaid.

New "WONDER BOY"

434—If you want lots of extra large, round, firm, meaty tomatoes plant New "Wonder Boy." "Tops" in flavor and quality plus heavy yields. Tests showed that many of the tomatoes weighed over one pound each and with a real fine flavor. Try this new super variety—it's wonderful. Pkt. (30 seeds) 50c; 3 Pkts. only 1.29, postpaid.

Gurney's SELECT

GREEN BUSH BEANS

Illustrated at right

Green Bush Beans are easy to grow and so tasty that every family with any ground should plant some. They are tender, brittle, juicy, entirely stringless and of fine flavor. Plants are of spreading bush form and heavy producers. Sow seed about every two weeks for constant crop.

TOP CROP

"Tops" in Yield and Wonderful Flavor

113—(51 days.) A new heavy yielding green pod bean developed by the U. S. D. A. Won gold medal at All-America trials. Pods are straight, smooth, light green and 5 to 6 in. long. Completely stringless and very meaty. Excellent for freezing. Triple size pkt. 25c; ½ lb. 58c; 1 lb. 90c; 3 lbs. 2.25, postpaid.

WADE BUSH BEAN

Gold Medal Winner

117—(54 days.) One of the very few new beans ever to win an All-America Gold Medal! Pods deep green, 5½ to 6 in. long. Grows upright. Resistant to mosaic and powdery mildew. Wonderful quality and rich flavor. Ideal canner and freezer. Triple size pkt. 23c; ½ lb. 55c; 1 lb. 85c; 3 lbs. 2.15, postpaid.

TENDERGREEN

Absolutely Stringless

106—(55 days.) This is a fine quality, meaty, smooth, string bean. Plump, long, dark green pods that are completely free of fiber and strings. Strong, upright plants bear an enormous crop. Excellent for all uses. Triple size pkt. 23c; ½ lb. 55c; 1 lb. 85c; 3 lbs. 2.15, postpaid.

GARDENGREEN

"All America" Award Winner

138—(55 days.) Produces tremendous yields of straight round bright, dark green pods over a long period. Its excellent flavor, ease of picking and lack of any stringy fibers make it a favorite. 5 to 5½-inch smooth, stringless pods. Triple size pkt. 25c; ½ lb. 65c; 1 lb. 1.15; 3 lbs. 2.85, ppd.

STRINGLESS GREEN POD

Extremely Early

107—(50 days.) An extra early, heavy bearing, dwarf, green pod bean. The medium-size, meaty, green pods are absolutely stringless and of delicious flavor. Stand more drought than others. The seed is dark brown and pods dark green, round and slender. Triple size pkt. 22c; ½ lb. 50c; 1 lb. 85c; 3 lbs. 2.15, postpaid.

NOTICE

All beans, peas and sweet peas should be inoculated with NITRAGIN for bigger yields. Just dust it in seed. Never fails to increase yields. 4087—NITRAGIN, 25c per pkt., postpaid.

WAX BUSH BEANS

Earliest BRITTLE WAX

The Home and Market Bean

110—(50 days.) Clear, waxy yellow pods, 6 to 6½ inches in length are absolutely stringless, very tender and most delicious. Vigorous vines give a long bearing season. We find Brittle Wax one of the finest for home, market, freezing and canning. Triple-size pkt. 23c; ½ lb. 55c; 1 lb. 85c; 3 lbs. 2.15, postpaid.

CHEROKEE WAX

Earliest of All

118—(50 days.) Developed by the U. S. D. A. This is the earliest of all beans and one of the very best. It is straight and stringless, with bright yellow pods 6 inches long. Does well almost anywhere. Heavy bearer. Black seeded. Tender, stringless and of good flavor. Triple size pkt. 25c; ½ lb. 60c; 1 lb. 95c; 3 lbs. 2.15, postpaid.

PENCIL POD BLACK WAX

Our Heavy Yielder

105—(55 days.) A wonderfully flavored, rich dark yellow, stringless snap bean. It is a very vigorous and hardy plant, being one of the few to survive heat and lack of moisture of extremely hot summers. The seed is black when ripe. Extremely good for home, market, canning and freezing. Triple size pkt. 22c; ½ lb. 50c; 1 lb. 80c; 3 lbs. 1.98, postpaid.

Improved GOLDEN WAX

Good Canner

116—(52 days.) This extra early wax bean is one of the best for the home garden. Long, straight, waxy yellow pods absolutely stringless. Heavy bearer of delicious quality beans. Excellent for canning or pickles. An old variety but still one of the very best. Triple size pkt. 23c; ½ lb. 55c; 1 lb. 85c; 3 lbs. 2.15, postpaid.

The only difference between Wax Bush Beans and Green Bush Beans, aside from color, is that the Wax type has a more delicate, milder flavor and the pods are a little more tender than

the Green type. The Wax beans yield just as heavy, are stringless and require same culture and care as the Green. If you have never grown the Wax before, try some by all means.

LIMA BEANS

Every one should plant a few Lima beans. Plant after all frost danger is past and soil is warm. Plant seed 6 to 8 inches apart in rows 2 to 3 feet apart. We have the two best varieties for flavor, quality and yield. Better try a few Limas this season. Treat all Lima beans with Arasan (see page 24).

New Improved BABY LIMA

Fine for Freezing and Canning

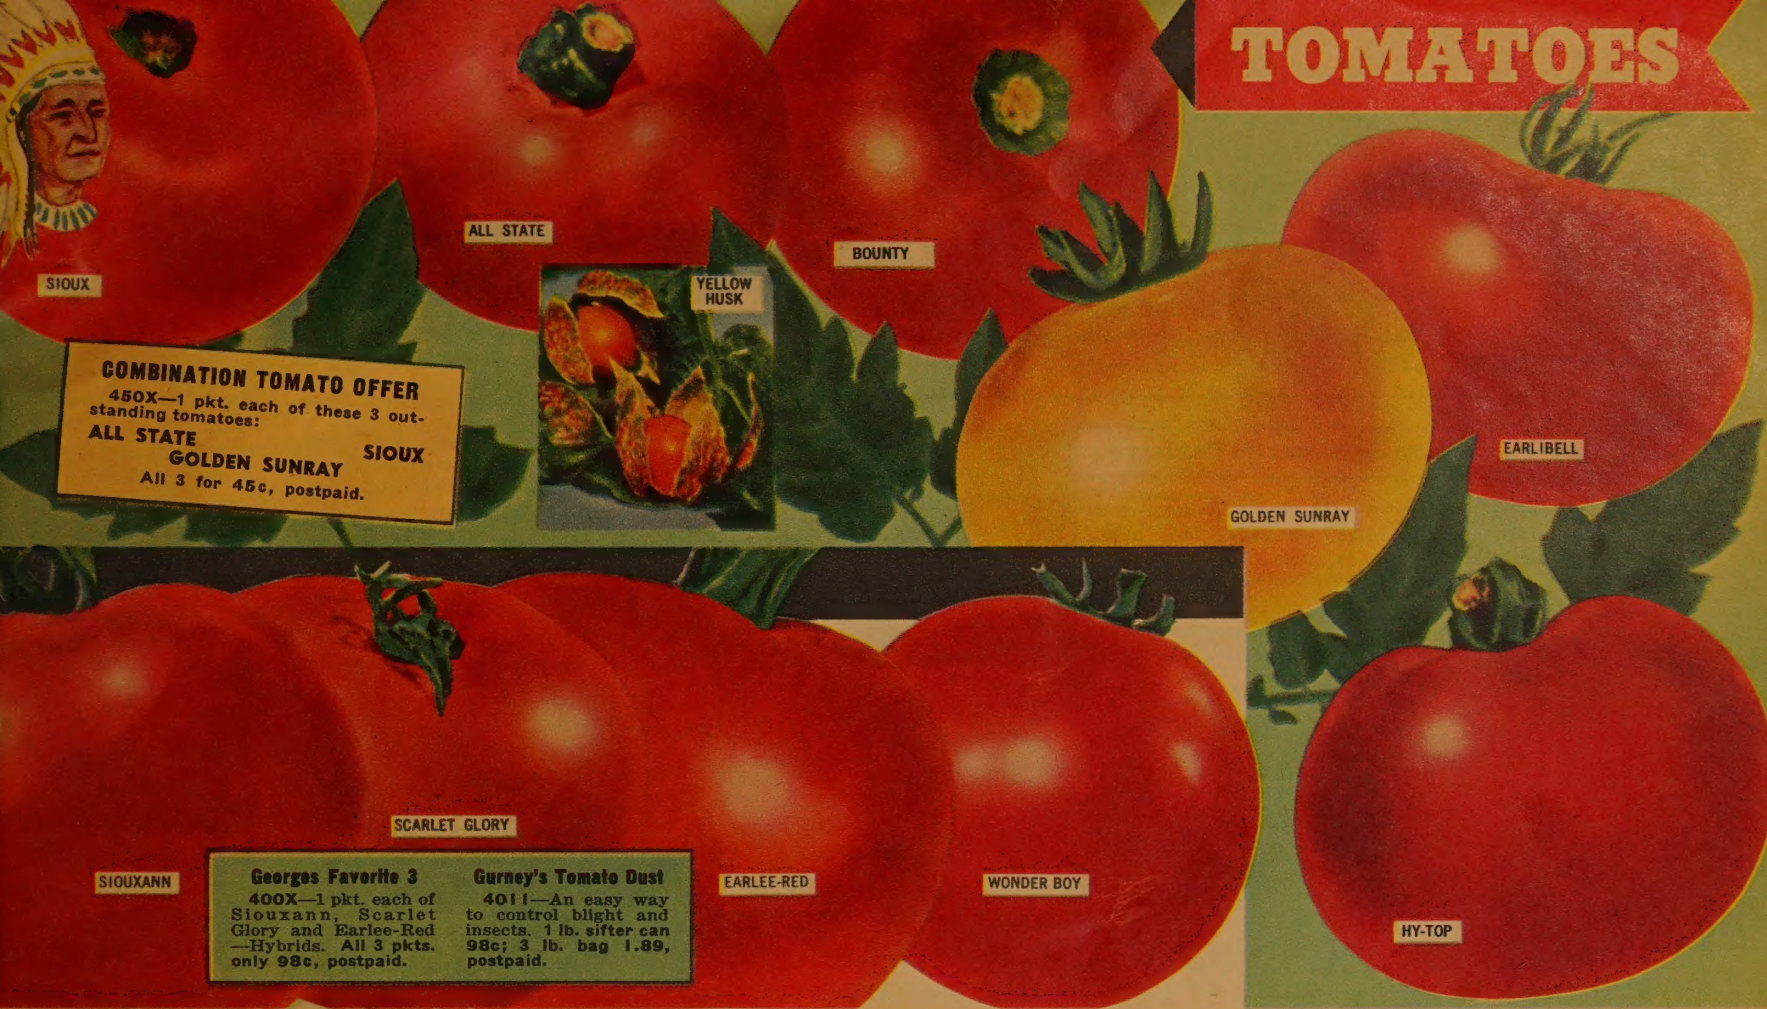

129—(67 days.) A real improvement over the old-fashioned Baby Limas. Beans are bright green during shelling stage. Fine for canning, good for dry beans, too. An excellent grower, stands hot, dry weather. Tremendous yielder. Triple size pkt. 23c; ½ lb. 55c; 1 lb. 85c; 3 lbs. 2.15, postpaid.

FORDHOOK BUSH LIMA

The Early Big Bush Type

126—(75 days.) The very best large seeded variety. The pods, which are produced in large clusters, are about 5 inches long, each containing four to five large beans of exceptionally fine quality. Beans are large, thick and of delicious flavor. Grows very upright holding beans out of the dirt. Triple size pkt. 25c; ½ lb. 60c; 1 lb. 95c; 3 lbs. 2.15, postpaid.

RED KIDNEY BEANS

NAVY BEANS

128—This is the RED soup bean, similar to the Navy except for color. Easy to grow and a very heavy yielder of large, dark red, dry beans, of good flavor and high quality. Triple size pkt. 22c; 1/2 lb. 49c; 1 lb. 85c; 3 lbs. 2.15, postpaid.

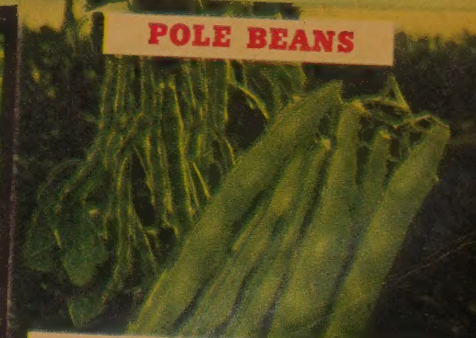

102—Best yielder of any of the dry or soup beans. Erect bushes keep pods off damp ground. Long uniform pods. Quality and flavor extremely good. Easy to grow and sure to yield. Triple size pkt. 20c; 1/2 lb. 45c; 1 lb. 65c; 3 lbs. 1.65, ppd.

"Russ" the Gardener BEAN OFFER

One Triple Size Pkt. each of my 3 favorites: Tendergreen, Stringless Green Pod and Yellow Wax Bean. All 3 for 49c Ppd.

3500X

POLE BEANS

KENTUCKY WONDER

134—(Old Homestead) (65 days.) This climbing variety is very vigorous, productive, bears its pods in large clusters. Pods are green, very long, often nine or ten inches, nearly round, stringless and very crisp when young. Fleshy and brittle with extra fine flavor. Triple size pkt. 22c; 1/2 lb. 50c; 1 lb. 80c; 3 lbs. 2.00, ppd.

LIMA BEANS

PURPLE POD

122—Grows like Kentucky Wonder, but larger and better flavored. Meat is thick and stringless. Pods are a beautiful, reddish-purple but turn light green when cooked. It's a great favorite in southern Missouri. Triple size pkt. 25c; 1/2 lb. 60c; 1 lb. 95c, ppd.

FINE GREENS and SALAD VEGETABLES from GURNEYS

SPINACH

211—NEW ZEALAND. (55 days.) Likes hot, dry weather. Gives a continuous supply of thick, tender, dark green leaves. Not a true spinach but mighty good eating. Pkt. 20c; oz. 35c; ¼ lb. 95c, postpaid.

210—AMERICA. (50 days.) All-America award winner of delicious flavor. Leaves glossy dark green, thick and heavily crumpled. 8 in. tall. Stands a long time. Pkt. 18c; oz. 40c; ¼ lb. 1.25, postpaid.

212—NORTHLAND. (40 days.) Stand longer before seeding. Big compact tufts of thick dark green leaves. Slightly crinkled. Best for canning or freezing. Pkt. 20c; oz. 35c; ¼ lb. 90c, ppd.

222—MUSTARD SPINACH. Finest mustard green with a creamy spinach flavor. Try this for something new, different and better. Pkt. 19c; ½ oz. 25c, postpaid.

TENDERGREEN ▶

CHINESE CABBAGE

539 — (70 days.) Excellent for salad purposes. Resembles both celery and Cos Lettuce, but sweeter and more tender. Delicious for greens. Chinese Cabbage should be planted in early July. Pkt. 15c; ½ oz. 35c; oz. 65c, ppd.

SWISS CHARD

Tasty and Nutritious

220—(60 days.) Want good health? Then eat plenty of Swiss Chard. It will make more and better greens than any other vegetable. An immense yielder high in nutrients and vitamins. So easy to raise that more should plant it. Pkt. 18c; oz. 30c; ¼ lb. 85c, postpaid.

KALE or BORECOLE

Dwarf Green Curled
232 — (55 days.) Can be used for boiling greens, creamed or chopped raw like lettuce for sandwiches and salads. The finely curled leaves are tender and delicious. Rich in vitamins. Easy to raise and yields immense crops. Pkt. 20c; oz. 40c, ppd.

KOHL-RABI—The Aristocratic Cabbage

216—EARLY WHITE VIENNA. (55 days.) A member of the cabbage family with an edible turnip-like bulb which grows above the ground. Easy to raise. The sweet, fine grained, white flesh combines the flavor of both cabbage and turnip.

Use when about 2 inches through. Cook like turnips, or eat raw. Pkt. 20c; ½ oz. 35c; oz. 65c, postpaid.

GREAT LAKES

All-America Prize Winner

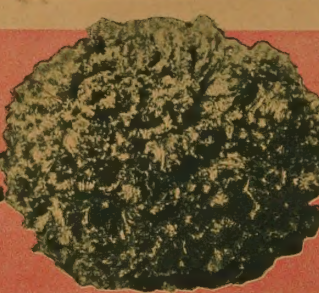

500—(75 days.) Enjoy head lettuce at its best. Does well anywhere. A sure header, despite heat and sun. Gives an abundance of medium size, solid heads, with fine quality and flavor. Pkt. 20c; ½ oz. 35c; oz. 65c, postpaid.

CRISP AS ICE

Earliest Head Lettuce

501—(83 days.) One of the finest varieties of head lettuce grown. Extra early, but produces extra large, meaty heads, so allow plenty of room. Excellent flavor. Fine for early spring and summer. Pkt. 15c; ½ oz. 35c; oz. 65c, postpaid.

Black-Seeded SIMPSON

A Vigorous Grower

509—(45 days.) A favorite forcing variety. It does not head, but forms a compact mass of leaves, lighter colors than any other leaf lettuce. Stands the summer heat well, and is very large, making immense plants over a foot across. Pkt. 15c; ½ oz. 29c; oz. 49c, postpaid.

STONEHEAD

Thick-Heavy Headed

502—(78 days.) All of us like head lettuce, and our idea of a good head lettuce is the one that has a solid head, is compact, and will stand hot, dry weather. Stonehead Lettuce is just that, and more. Pkt. 17c; ½ oz. 35c; oz. 65c, postpaid.

Most Popular of All!

New SALAD BOWL

One Head Fills The Bowl

503—An All-America Medal Winner. One head fills a salad bowl with a perfect rosette of tasty rich green. It is a loose leaf variety, grows fast and large. Leaves are short, closely set, waved and notched. Holds its tenderness and fine texture over a long period. Pkt. 20c; ½ oz. 45c; oz. 75c, ppd.

GRAND RAPIDS—Best Leaf Lettuce

510—(45 days.) Beyond question the best leaf lettuce. Its crisp, crinkly leaves are delicious and of excellent quality. Light green in color. Grows very erect, does not wilt and is disease-resistant. The earliest lettuce to grow, and the best flavored. The home garden favorite of all. Grand Rapids is the very best leaf lettuce on the market. Pkt. 17c; ½ oz. 35c; oz. 65c, postpaid.

PRIZEHEAD—

Home Gardener's Choice

511—(45 days.) Produces large, tender, loose heads of bright green, heavily curled leaves which are shaded with brownish red. Excellent flavor and quality. Ready to eat in about 45 days. Stays tender a long time and lasts well into hot weather. Very popular for home gardens as it is easy to grow. Pkt. 17c; ½ oz. 35c; oz. 55c, postpaid.

RUBY LETTUCE

Most Colorful of All

512—A new ruffled and frilled loose leaved salad lettuce. Its deep red color makes salads more attractive. Sweet and finer flavored than most. Heat resistant. Some grow this in the flower border. It's beautiful. All-America Award Winner. Pkt. 25c; 2 for 40c; oz. 65c, postpaid.

CABBAGE

There's not another vegetable where seed quality counts as much as with cabbage. All of our strains are carefully selected to assure best quality.

Start seeds 6 to 10 weeks ahead of outdoor planting time in the house, hotbed or cold frame. Space plants 18 in. apart in rows 2 to 3 ft. apart. If worms should happen to bother, use Gurney's Bug Dust. Treat seed with Arasan before planting—see page 24.

See Page 2 for CABBAGE PLANTS

Better Radishes from Gurney's

Sid's Special Radish Offer
575X—3 packets. One of each: White Icicle, Cherry Belle and Crimson Giant (a 52c value).
ONLY 45c POSTPAID

WHITE ICICLE Gardener's Favorite

448—(28 days.) White Icicle is the best early white radish. Fine for bunching. Flesh is pure white clear to the top and is crisp, juicy, mild and of a delicious sweet flavor. A great favorite because it remains mild and crisp long after maturity. Ready to use in 28 days. Plant radishes every 10 days for best results.
Pkt. 17c; oz. 35c; ¼ lb. 85c; ½ lb. 1.35, postpaid.

FRENCH BREAKFAST Sweet and Tender

442—(23 days.) This fresh, crisp, oblong radish with its small tops has a brilliant scarlet color with a white bottom. The flesh is crisp, juicy, mild, sweet, and of splendid quality. Is a quick grower; especially popular for home gardeners and market.
Pkt. 17c; oz. 35c; ¼ lb. 85c; ½ lb. 1.35, postpaid.

SPARKLER—Early Scarlet White Tip

444—(25 days.) This radish is one of our favorites. Try it and see if it won't be yours, too. It is a deep scarlet color with a distinct white tip. It is almost completely round and does not get hollow or pithy. A wonderful radish with sweet, crispy flesh, that stays fresh a long time after it matures. You'll like this one.
Pkt. 15c; oz. 35c; ¼ lb. 85c; ½ lb. 1.35, postpaid.
Control maggots and other garden soil insects, with 10% Aldrin (see page 26).

NEW CHAMPION 1957 All-America Winner

441—(22 days.) An All-America award winner. Round, smooth and cherry red. Flesh white, sweet, crisp and solid. Its earliness and extreme uniformity make it a popular market variety, and the leading home garden choice, too. If only one radish could be planted, Cherry Belle would be our choice.
Pkt. 20c; oz. 40c; ¼ lb. 95c; ½ lb. 1.45, postpaid.

CRIMSON GIANT Big, Crisp and Mild

437—(29 days.) Crimson Giant is remarkable because it grows almost twice the size of an ordinary radish, and yet does not become hollow. Flesh is mild, firm, crisp and sweet. Remains edible for a long time and does not get pithy. This brilliant crimson radish is one of the best for the home garden.
Pkt. 15c; oz. 35c; ¼ lb. 85c; ½ lb. 1.35, postpaid.

CHERRY BELLE The Early Solid Crisp Radish

460—(27 days.) Here is a clear, bright scarlet, radish. It's a king-sized edition of Cherry Belle that will delight you. Fine quality, large size, not pithy. Fine for home garden use. Gives a longer season supply of delicious radishes.
Pkt. 25c; oz. 65c; ¼ lb. 1.65; ½ lb. 2.95, postpaid.

EARLY SCARLET GLOBE Looks Good and Tastes Better

451—(24 days.) In offering this Scarlet Globe Radish we know we are offering one of the very best radishes on the market. It is earlier than any other market variety. The quality is so crisp and sweet that it always creates a demand for more. You will get an excellent yield of "top quality" radishes if you plant Early Scarlet Globe. It is one of our most popular varieties.
Pkt. 15c; oz. 35c; ¼ lb. 85c; ½ lb. 1.35, postpaid.

SPECIAL RADISH MIXTURE

453—Get all kinds from one packet of seed and have radishes all season long. A special mixture made up of equal parts of White Icicle, French Breakfast, Sparkler, Early Scarlet and Crimson Giant. Pkt. 15c; oz. 30c; ¼ lb. 75c, postpaid.

WINTER RADISHES

Winter radishes should be planted in July or early August. Give plenty of room by thinning when plants are young to about 3 in. apart. Take up in the fall and store in your house, or cellar, same as other vegetables, and you will have crisp radishes all winter. We offer Chinese Rose which we think is the finest.

CHINESE ROSE

454—(55 days.) This is a medium long, blunt rooted radish with pink skin and pure white, mild flesh. Excellent for bunching or storage. Is a fine winter keeper. If you have never grown Winter Radishes try this one. We know you will like the quality and it will do the job for you.
Pkt. 20c; oz. 34c; ¼ lb. 80c, postpaid.

Gurney's Garden BEETS

Easy to grow on any soil. Plant 1 in. deep in early spring. Thin plants to 3 in. in the row. Beets for winter use should be planted about June 1st. 1 oz. seed for 50 feet, 6 lbs. per acre. Gurney beet seed is the finest money can buy. Enjoy Health—Eat More Beets.

DETROIT DARK RED "World's Champion" Beet

604—(60 days.) This dark red beet is a winner for every purpose. It is early and the small tops and globe-shaped roots make it ideal for bunching. The flesh is very dark red with faint rings. Sweet and tender, too. One of the best winter keepers. More Detroit DARK RED are grown than most all other varieties combined because year after year it improves and will grow anywhere. Be sure with Detroit Dark Red.
Pkt. 20c; oz. 44c; ¼ lb. 1.10, postpaid.

PERFECTED DETROIT— "All-America" Winner

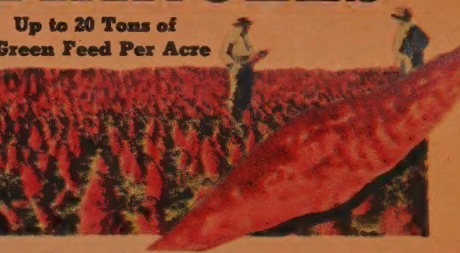

602—(58 days.) A re-selected strain of Detroit DARK RED. In our trial grounds it made the best showing of any for color, shape and uniformity. Medium size and perfectly round. Rich, deep dark red with absolutely no white rings or streaks, and no side roots. Flesh is sweet, tender and of good quality. Excellent for home garden, market canning and freezing.
Pkt. 20c; oz. 50c; ¼ lb. 1.25, postpaid.

EARLY WONDER— An Early Red Beauty

607—(52 days.) A beautiful, smooth, globe-shaped beet with small neck and tap root. The flesh is an intense dark red and very tasty, being of good quality and sweet flavor. Very early and extremely uniform in size and shape. A favorite with market gardeners, but home gardeners like it too. Good for bunching and winter use.
Pkt. 18c; oz. 52c; ¼ lb. 1.25, postpaid.

MANGELS

MAMMOTH LONG RED

619—(110 days.) Very long and easily harvested as half the mangel grows above ground. They yield enormously—often 40 tons per acre. Individual roots sometimes weigh 20 pounds and are over 2½ ft. long.
1 oz. 25c; ¼ lb. 80c; ½ lb. 1.35, postpaid.

Giant HALF SUGAR ROSE

616—(90 days.) This is a half sugar beet and is sweeter and more nutritious than mangels. The oval, red roots weigh about 6 pounds each, are easily harvested, and are wonderful poultry feed.
1 oz. 25c; ¼ lb. 80c; ½ lb. 1.35, postpaid.

HOW TO PLANT:

Grow like beets except give them more room. Space rows 2½-3 ft. apart and thin out the seedlings to 8 or 10 in. apart in the row. Sow in April or May. Plant 1 oz. to 50 ft. row; 6 or 8 lbs. per acre; 15 to 20 tons an acre are common yields. Harvest before freezing.

THAT HAPPY LOOK!

This is Wally Flint Jr. of Yankton, S. D. and he is happy when he eats Gurney's sweet corn. Every fall, Wally deep-freezes some 50 or 60 dozen ears of Gurney's sweet corn and he says "It's the finest I ever ate in my life."

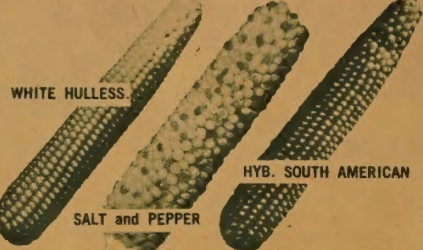

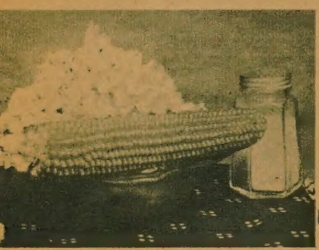

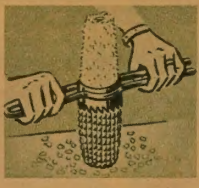

EVERYONE LOVES SWEET CORN

Of all the vegetables to choose from, there is no question but what sweet corn is the favorite. We don't mean the kind you get from cans either. Good fresh sweet corn, eaten right off the cob, has no equal. Why not have all you and the family can eat by raising your own? More and more folks are doing this every year. They have found out there is no trick to growing it and—preparing for the freezer is a snap. Treat yourself to a treat this fall and winter—grow Gurney's sweet corn.

SWEET CORN "KERNEL KUTTER"

Strips Kernels Off Cob In One Swift Stroke

4046L—Enjoy sweet corn fresh off the cob. Perfect for deep freezing, cooking and creaming. Gives you clean, whole kernels, none mashed or crushed and no cob particles. The quick, easy way to get corn off the cob.
Only \$1.95, ppd.

HYBRID POPCORN

SO EASY TO GROW

Plant only HYBRID popcorn. It outyields the open pollinated kinds. It has long, strong roots and resists drouth and heat better. Vigorous growing habit and resistant to diseases. Farmer style and can be picked with a mechanical picker. Best of all—Hybrid popcorn pops with a bigger volume, is more tender and tastes better.

HYBRID—WHITE HULLLESS

Our Finest White Popcorn

193—(95 days.) This is one of the very finest white popcorns. An exceptionally heavy yielder that produces lots of ears on strong, sturdy stocks. Has what counts in any good popcorn. You will find it to be one of the very best for tenderness and quality. A true hullless type that will do the job and produce plenty of top-quality corn to help make your winter evenings at home more enjoyable. Triple size pkt. 25c; 1/2 lb. 65c; 1 lb. 98c; 3 lbs. 2.35; 10 lbs. 6.95, all postpaid. Write for prices on larger quantities.

SALT and PEPPER HYBRID

It's New and Different

192—(105 days.) Here is a cross between the South American Yellow and a White Hullless. The result is something new and different. It has long slender ears packed with mixed yellow and white kernels. Tremendous popping volume that will run 30 to 1. The popcorn is white to creamy yellow in color. Remarkably free from hulls, and is an especially fine variety for the home gardener who appreciates the best. 25c per pkt.; 1/2 lb. 60c; 1 lb. 98c; 3 lbs. 2.45; 5 lbs. 3.50, postpaid.

HYBRID—SOUTH AMERICAN

New Yellow N-104

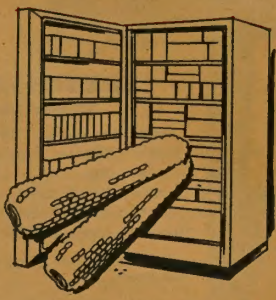

198—(105 days.) Developed by the University of Nebr. A 3-way cross much like K4 and P32 but better. Pops big volume, strong vigorous stalks make a tremendous yield. Triple size pkt. 25c; 1/2 lb. 50c; 1 lb. 98c; 3 lbs. 2.35; 10 lbs. 6.95, ppd. Write for prices on larger quantities.

GURNEY'S Famous SWEET CORN

HOW TO FREEZE

Use only best ears. Husk and silk. Drop in boiling water for 3 minutes. Take out and put in cold water. Cool as quickly as possible and drain well. Cut kernels from cob with sharp knife or Gurney's "Kernel Cutter"; don't cut too deep. Put in tight container and freeze quickly. To prepare, add small amount of boiling water and cook as you would fresh corn. You can freeze corn on the ear, too.

DELICIOUS!
NEW!

BARBECUE SWEET CORN

A Special Treat

189—(75 days.) The long, slender 8 inch ears are the most attractive you have ever seen. In fact, they taste even better than they look. Twelve plump full rows of rich golden kernels with an extra sweet flavor. A more appetizing, fresher, better appearing sweet corn has never been developed than Barbecue. Enjoy a real treat. Pkt. 25c; 1/2 lb. 55c; 1 lb. 95c; 3 lbs. 2.35, ppd.

Hybrid Sweet Corn Special
172—Now you can enjoy sweet corn throughout the entire season. A special blend of hybrids that will give you an all-season's supply. Made up of equal parts of Marcross, Carmelcross, Golden Cross, Iochief and Golden Bantam. Pkt. 20c; 1/2 lb. 50c; 1 lb. 85c; 3 lbs. 1.98, ppd.

Open Pollinated SWEET CORNS

GOLDEN BANTAM

The Favorite "Old Fashioned" Type. We are offering you your choice of 3 of the most famous open pollinated corns on the market. Many still consider them superior in quality and texture to the hybrids. These varieties, unlike the hybrids which ripen all on the same day, ripen their ears over 2 or 3 weeks. This means you can enjoy sweet corn from a planting over a longer period.

GOLDEN BANTAM—Most popular

177—(80 days.) The standard yellow sweet corn. Ears 5 1/2 to 6 1/2 in. long. 8-rowed, deep kernels. Rich golden yellow. Tender, sweet and deliciously flavored. One of the best for your table. Triple size pkt. 19c; 1/2 lb. 49c; 1 lb. 80c; 3 lbs. 1.95, postpaid.

GOLDEN SUNSHINE—The Early One

174—(76 days.) (not pictured) Ear is 12-rowed and 7 to 8 inches long with sweet, tender, kernels. Fine where summers are fairly cool and growing season is short. Triple size pkt. 20c; 1/2 lb. 45c; 1 lb. 80c; 3 lbs. 1.98, postpaid.

STOWELL'S EVERGREEN—The Tender White

184—A popular late white variety for home and market use. 9 inch ears, 16 to 20 rowed. Sweet, tender, clear white kernels. Triple size pkt. 20c; 1/2 lb. 45c; 1 lb. 80c; 3 lbs. 1.95, postpaid.

STOWELL'S EVERGREEN

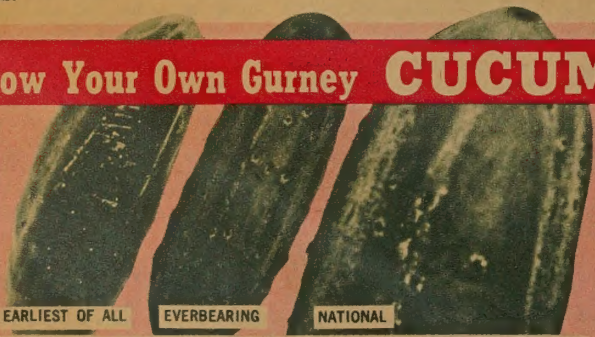

Open Pollinated Sweet Corn Offers

180X—1 triple size packet each of Golden Bantam, Stowell's Evergreen and Golden Sunshine only 49c, postpaid.
185X—1/2 lb. each of above 3 varieties 98c, ppd.
190X—1 lb. each of above 3 varieties 1.79, ppd.

The flesh is a solid white with white spines and a rich dark green color. Fine slicer. Pkt. 25c; oz. 65c; ¼ lb. 1.25; 1 lb. 2.95, postpaid.

PUMPKINS

SO EASY TO GROW . . .

Pumpkins are easily grown. Are delicious for pies and profitable for stock feeding. Sow in May in good warm soil. 1 ounce for 25 hills; 4 lbs. per acre. Do best on rich, well drained, light soil. Gather before frost.

SMALL SUGAR—Finest For Pies

766—(118 days.) Smaller than Connecticut Field, but of finer grain, sweeter and very prolific. Pumpkins about 7 in. in diameter. Color is bright orange. Small Sugar is one of the best for pumpkin pies as the orange flesh is meaty and delicious. The original New England pie pumpkin. No better all-around variety. Pkt. 20c; oz. 30c; ¼ lb. 75c; 1 lb. 1.85, postpaid.

BUFF PIE—The "All Purpose" Variety

762—(110 days.) Large cheese or Buff Pie pumpkin. Buff-cream colored rind. Rich golden flesh. Rather flat drum shaped with slight grooves. Its brilliant colored flesh means you get very attractive and tasty pies. Also one of the finest varieties we know of for stock feeding. You can't go wrong with Buff Pie. So good that additional sugar, starch or coloring is unnecessary. Pkt. 18c; oz. 30c; ¼ lb. 65c; 1 lb. 1.65, postpaid.

MAMMOTH KING—The Biggest Of All

769—(120 days.) 100 lb. pumpkins not unusual with this tremendous variety. An enormous yielder. Flesh thick, bright orange, of real fine quality. If you want the biggest pumpkins you ever raised, Mammoth King is the one to plant. Pkt. 20c; oz. 30c; ¼ lb. 75c; 1 lb. 1.85, postpaid.

HALLOWEEN

Perfect For Jack-O-Lanterns

763—(110 days.) This new variety has especially deep, fine-grained flesh so sweet and such a rich orange-yellow color. Average about 8 in. across and they are ideal for Jack-O-Lanterns. Fine for cooking and pies, too. We consider this one of the best newer varieties on the market. Pkt. 20c; oz. 45c; ¼ lb. 1.15, postpaid.

SPECIAL PUMPKIN MIX

768—Kids like to raise pumpkins, grown folk too. This special mixture is made up of equal parts of all kinds. Pkt. 15c; 2 for 25c; oz. 30c; ¼ lb. 1.00, ppd.

SQUASH

Nothing more delicious baked, in pies or boiled. And there is always a profitable market for good squash. Grow in fairly loose soil and give plenty of room. Plant seed when soil is well warmed up. Keep free from weeds. One ounce plants 40 to 50 hills. To control disease and insects use Gurney's Bug Dust (see page 25).

TABLE QUEEN The Good Keeper

752—(80 days.) This is beyond a doubt the perfect individual squash. Delicious, firm flesh, very sweet, of excellent quality. Fine for halving and baking. Cooks dry and mealy. A good keeper. Pkt. 20c; oz. 35c; ¼ lb. 85c; 1 lb. 2.25, postpaid.

WARTED HUBBARD Most Popular of All

745—(110 days.) More Hubbard Squash are raised than any other kind. They are large, oval-shaped, with a very hard, warty rind which makes them best as winter keepers. The thick yellow flesh is always sweet and dry when cooked. Pkt. 20c; oz. 35c; ¼ lb. 85c; 1 lb. 2.25, postpaid.

BUTTERCUP Thick Flesh

742—(100 days.) George says this is the finest of all. Extra fine flavor, thick, deep orange meat, and family size. Fine for freezing. Buttercup has been one of the favorite with gardeners all over America. Pkt. 20c; oz. 45c; ¼ lb. 1.25; 1 lb. 2.65, postpaid.

GOLDEN DELICIOUS—A Delicious Deep Gold

738—(102 days.) Its thick golden flesh is sweet and not watery. Fine for canning and freezing. Medium size 6 to 7 lb. squash. Good keepers. Pkt. 18c; oz. 35c; ¼ lb. 85c; 1 lb. 2.25, ppd.

BUSH SCALLOP—Early White

747—(50 days.) Medium white summer squash. Fruit 3 in. deep, 8 in. across, round with scalloped edges. Flesh pure white, fine flavor. Pkt. 18c; oz. 35c; ¼ lb. 85c; 1 lb. 2.35, ppd.

BUTTERNUT—Best Flavored

754—(100 days.) Its sweet, meaty fine texture and deep yellow color make it "tops" among squash. Has superb flavor and many consider this to be one of the finest of all squash. Pkt. 20c; oz. 50c; ¼ lb. 1.35; 1 lb. 2.95, ppd.

EARLY PROLIFIC STRAIGHTNECK —Best Summer Squash

744—(50 days.) Creamy yellow fruits edible after they reach 6 in. in length. A heavy yielding, bush-type plant. Pkt. 20c; oz. 50c; ¼ lb. 1.35; 1 lb. 2.95, ppd.

BANANA SQUASH—Heavy Yielder

736—(115 days.) Heaviest yielding of all squashes. The big vines produce squash that weigh 20 lbs. Shell grayish green, and flesh beautiful orange-yellow. Pkt. 18c; oz. 35c; ¼ lb. 85c; 1 lb. 2.25, postpaid.

DELICATA—The Sweet Potato Squash

741—(95 days.) not pictured. Often 8 to 10 inches long and 4 inches in diameter. Cream color with dark green stripes. Flesh orange, tender and sweet. Stores well. Split the long way, remove seed. Fill with sausage and bake. It's a real treat. Pkt. 25c; oz. 50c; ¼ lb. 1.35, ppd.

GOLDEN DELICIOUS

BUSH SCALLOP

BUTTERNUT

STRAIGHTNECK

BANANA SQUASH

ALL-AMERICAN PARSNIP

Best Variety of All

271—(105 days.) The best and most popular variety of all. Vigorous grower, very dependable, superb sugary flavor. Roots about 3 inches in diameter and shoulders taper to a smooth point. Hollow crown, white flesh. Exceptional quality. Tender and delicious in the fall after a frost. Sow seed in early spring in rows 2 to 3 ft. apart and cover with 1/2 in. of fine soil. Thin seedlings to about 4 to 6 in. apart. May be stored for winter use or some left in ground all winter to be used in early spring. Pkt. 18c; oz. 35c; 1/4 lb. 95c, postpaid.

CELERY

662—GOLDEN PLUME. (118 days.) We recommend this new self-blanching variety to both home and market growers. Very early, a beautiful golden yellow and always crisp, tender, and stringless. Flavor distinctly nutty and rich. It's easy to grow and so much better than "store-bought" celery. Pkt. 20c; 1/2 oz. 55c, postpaid.

661—GIANT PASCAL. (140 days.) This is the largest celery grown. Stalks are very tall and heavy, and when blanched are yellowish white. Flavor is nutty and rich. The heaviest yielder. Best winter keeper. Pkt. 18c; 1/2 oz. 50c, postpaid.

208—CELERIAC. Large Smooth Prague. (120 days.) A variety of celery having turnip-shaped roots used for seasoning soups, meats, and in salads. This variety is the best, largest, and very easy to raise. Pkt. 20c; 1/2 oz. 35c, postpaid.

Curled Garden Cress

243—(40 days.) For flavoring salads, garnishing, or with lettuce in salads. An agreeable, peppery taste. Foliage deep green, finely curled. Best used when young. Grows easily and quickly. Pkt. 20c; 1/2 oz. 29c; oz. 49c, ppd.

OKRA or GUMBO

236—Extra Early Dwarf Green. (55 days.) Delicious for stews, flavoring soups, and for salads. Easy to raise and yields immense crops. Plants grow 3 to 4 ft. tall and are very productive. Pods pointed, dark green, slender and slightly ribbed. Use when from 1 to 2 inches long. Pkt. 18c; oz. 35c, postpaid.

LEEK

231—(130 days.) This giant white is the largest and best of the Leek family. Stalks are often 12 in. long and 2 in. in diameter. Soups and salads flavored with Leek are delicious. If you like delicious home-made soup, grow Leek for seasoning. Pkt. 20c; 1/2 oz. 35c, postpaid.

PARSLEY

Champion Moss Curled

217—(70 days.) A beautiful curled variety, fine for garnishing and for seasoning soups and salads. Easy to grow in the garden or in pots during winter. Mostly used green, but leaves may be dried and kept in bottles for winter use. Pkt. 18c; 1/2 oz. 25c; oz. 45c, postpaid.

Hamburg Parsnip Rooted

221—(90 days.) Has the same flavor as regular parsley, but has small parsnip-shaped roots that are used for flavoring soups, stews, etc. Leaves are plain and can be used like ordinary parsley. Pkt. 20c; 1/2 oz. 25c; oz. 45c, postpaid.

ENDIVE

For Salads and Greens

234—(90 days.) Easy to raise and good to eat as greens or in salads. Makes large plant up to 16 in. across. When fully grown, tie over the outer leaves to blanch making beautiful creamy white heads. Eat like lettuce or cook like spinach. Pkt. 18c; oz. 35c, postpaid.

ASPARAGUS

Mary Washington

200—Everyone likes Asparagus. It is easy to raise and will last a lifetime. Mary Washington is the largest of all and is rust-resistant. Is tender, rich flavored, and is not stringy. Don't let another year pass without an Asparagus bed. Pkt. 20c; oz. 35c; 1/4 lb. 95c, postpaid.

"Jumbo" SUNFLOWERS

239—(80 days.) This Russian type produces immense heads, as much as 20 inches in diameter, and yields of 50 bushels per acre are not uncommon. The seed can be eaten by humans (parching necessary) or used for chicken feed. The stalks make silage said to be more nutritious than corn. Quite pretty, too. Pkt. 20c; oz. 30c; 1/4 lb. 50c; 1 lb. 95c, postpaid.

Sunflower Seed for Birds

240—Favorite of all. Parrots and Cardinals go wild over it. Other birds like it too. 4 lbs. 1.59; 10 lbs. 3.20, ppd.
275—Wild Bird Feed. An ideal mixture of various seed the birds like. Keep your feeder full and you will have birds all year around. 5 lbs. 1.35; 10 lbs. 2.25, ppd.

BROCCOLI

SPARTAN EARLY

206—This new broccoli is very uniform in size and shape. Matures early. Plants are short and compact. The central heads are uniform in shape and size, very compact, averaging about 6 to 8 inches in diameter. Recommend it highly for back yard gardeners and also market growers. Pkt. 25c; 1/2 oz. 50c; oz. 75c, ppd.

Italian Green Sprouting

209—(70 days.) Just as easy to raise as cabbage. The light green, tender sprouts are delicious when creamed or used for greens. Make two seed sowings. Sow early for a summer crop and follow with a midsummer seeding for a fall crop. Pkt. 20c; 1/2 oz. 35c; oz. 65c, postpaid.

CAULIFLOWER

Snowdrift

223—(70 days.) The finest early market and home use variety. Very productive. Sure to head. Has beautiful snowy white, uniform heads. Dwarf, compact grower. Short-leaved type. For main crop (fall) sow seed thinly in specially prepared seed bed about 4 months before first anticipated frost. Thin out seedlings in bed. Set out plants about 2 ft. apart in rows 2 1/2 to 3 ft. apart. Let grow until heads fully formed. Fine for freezing. Pkt. 25c; 1/4 oz. 95c; 1/2 oz. 1.75, postpaid.

GURNEY'S

HOW TO PLANT MUSKMELONS

Muskmelons like a warm season and warm, rich, sandy soil. Plant in hills, 6 or 8 ft. apart, using about a dozen seeds to the hill. Plant about corn planting time. Keep weed-free and use Bug Dust to control bugs. An ounce of seed is enough for about 100 hills. For home use don't pick until the stems let go easily when you turn the melon over. We are proud of our Muskmelons. All the seed comes from fields grown for seed purposes only; that means you get the best!

HEARTS OF GOLD

Deep, Golden & Sweet

345—(92 days.) Mighty tasty, clear to the rind. Medium-early, very productive, and one of the best shipping melons. The flesh is sweet, thick, firm and solid. Heavily ribbed. Pkt. 18c; oz. 42c; 1/4 lb. 95c; 1 lb. 2.45, postpaid.

Standard ROCKY FORD

The Early Green-Fleshed Melon

334—(88 days.) So sweet and luscious its green flesh can be eaten close to the rind. Fruits are oval-shaped, firm and solid. Weigh 1 1/2 to 2 lbs., slightly ribbed. We offer a selected early strain. Pkt. 17c; oz. 42c; 1/4 lb. 1.05; 1 lb. 2.55, postpaid.

FINEST

Loved by Young and Old

Who doesn't enjoy a fresh, sweet, ripe watermelon? And they always taste better if they are from your own patch. Even backyard and city gardeners can have a few hills of melons. Anyone can raise them. Melons like warm rich sandy soil. Large ones should be planted (six or eight seeds to the hill) 10 ft. apart each way. Midget and Ice Box types, 6 ft. apart. Do not plant until frost danger is past. Dust with Gurney's Bug Dust to control beetles. One ounce seed will plant 50 hills; three pounds to the acre. Our favorites are Dixie Queen Hybrid and Ice Box but we like them all.

Finest WATERMELON OFFER

900X—Here is a watermelon collection especially selected by "George" for you small gardeners. He has chosen 4 of our most popular varieties.

All 4 Large Packets only 59c, ppd.	

BLACK DIAMOND

Most Popular of All!

715—(90 days.) Black Diamond is the favorite for home and market use and most widely planted of all melons. Large, round, dark green and the 35 to 40 lb. melons are sure to please you. Flesh is bright red, crisp, sweet and of excellent flavor. Dark seeds. This is one variety you will want in your garden this year. YOU CAN'T BEAT IT. Pkt. 17c; oz. 50c; 1/4 lb. 1.25; 1 lb. 2.25, postpaid.

For best results, treat your garden seed with Arasan, No. 4037—Garden Size. Pkg. 60c, postpaid.

Raise this Gourmet's SEASONING GARDEN

Your reputation as an outstanding cook can really "soar to the top." Just grow these 6 easy to raise "home seasoners" in your own garden.

CITRON

721—(90 days.) Used exclusively for preserving or pickling. The rind is dark green, distinctly striped with light green. You may plant beside regular melons, as they will not harm them. Pkt. 15c; oz. 35c, ppd.

GARDEN LEMON

344—(90 days.) Vine similar to muskmelon; requires same cultivation. Fruit size of a large peach. For pickles, pies and preserves. Pkt. 20c; 1/2 oz. 35c; postpaid.

CHIVES

311—Schnittlauch—(80 days.) This perennial plant of the onion family is used for seasoning soups, salads, and stews. It is easy to get started and once established will grow for many years. Pkt. 20c; 1/4 oz. 35c, postpaid.

800X—1 pkt. each of all 6 seasonings listed above for only 79c, postpaid.

PEANUTS For Early Northern Gardens

219—Spanish Type. We have been growing peanuts in South Dakota for a long time and this variety is early enough to ripen in a normal season. Nuts are small and of fine flavor.

With each order for peanuts, we send full instructions.

Peanuts are easy to grow, easy to roast, and easy to eat. If you don't think so, take a pan of home-grown peanuts, put them in the oven for about 30 minutes and eat while they are still hot. Triple Size Pkt. 22c; 1/2 lb. 45c; 1 lb. 75c; 3 lbs. 1.75, postpaid.

700—Seedless Watermelon. That's right. No seeds except a few small undeveloped ones—like in small cucumbers. Small size 8 to 10 inches in diameter. Round deep red flesh. Averages 12 lbs. Pkt. of 10 seeds 50c; 2 pkts. 90c, postpaid.

710—Mixed Watermelons. A big melon patch. All kinds of melons from this mixture. Equal parts of seven kinds, Northern Sweet, Golden Honey, Early Kansas, Kleckley Sweet, Early Canada, Midget, Winter melon. Big pkt. 15c; 1 oz. 40c; 1/4 lb. 1.15, postpaid.

MUSKMELONS

MIXED MUSKMELONS

331—The pick of our finest varieties. Special blend of equal parts of Far North, Milwaukee Market, Honey Rock, Hale's Best, Golden Champlain and Perfecto. Big pkt. 15c; 1oz. 40c; ¼ lb. 1.00, ppd.

FAR NORTH Earliest of All

339—(65 days.) A home garden favorite. Grows anywhere but especially fine for northern gardens. Improved by the Dominion Experiment Station at Morden. Four to five inch fruits on small vines. Salmon colored flesh of excellent quality. Very sweet and juicy. A heavy bearer. Pkt. 25c; oz. 65c; ¼ lb. 1.65, postpaid.

MILWAUKEE MARKET

337—(78 days.) This is the biggest, best flavored early muskmelon for home use or home market. Often weighs over 10 lbs., and the sweet, spicy, golden flesh is sometimes 3 in. thick! Will stand more heat, drought and lack of care than any other melon and still produce a good crop. Pkt. 20c; oz. 40c; ¼ lb. 95c; 1 lb. 2.65, postpaid.

PENNSWEET

346—(75 days.) An All-America winner noted for its earliness, small size and delicious, thick, juicy, sweet orange flesh. A perfect home garden melon that is fine for individual servings. Pkt. 20c; oz. 65c; ¼ lb. 1.65; 1 lb. 3.45, postpaid.

SATICOY

Improved Hybrid Muskmelon

330—(80 days.) Genuine F₁ First Generation Hybrid. Melons are heavily netted and look like Hale's Best. 7 inches long, about 6 inches wide, weight around 4½ to 5 lbs. Big, deep orange flesh, juicy—unusually fine flavored. Vines are vigorous and disease resistant. We think it a great improvement over the ordinary strains of melons. Pkt. of 40 seeds 50c; 2 pkts. 90c; ¼ oz. 2.15, ppd.

HALE'S BEST Most Popular of All

333—(83 days.) Here is about the best all-around melon—one that is just the right size to serve halved. Of wonderful quality, the salmon-colored flesh is very thick, sweet, spicy and seed cavity is small. Hale's Best is very early, heavily netted, and a good shipper. You'll like it. Pkt. 20c; oz. 45c; ¼ lb. 95c; 1 lb. 2.65, postpaid.

GOLDEN CHAMPLAIN Early and Sweet

341—(76 days.) Still one of the very earliest and one of the very best. It blossoms and sets fruit as soon as it starts to run. Has medium thick salmon flesh that is sweet and juicy. An especially good melon for home and local market. Pkt. 20c; oz. 43c; ¼ lb. 95c; 1 lb. 2.65, postpaid.

GOLDEN DELIGHT

Outstanding Home Market Melon

338—(88 days.) You will be delighted to serve this new All America award winner. Medium sized fruits, rather oval shaped, with extra-good quality thick orange flesh and fine spicy flavor. The wide shallow ribs and open netting make it attractive. A most delicious variety. Pkt. 18c; oz. 45c; ¼ lb. 1.10; 1 lb. 2.95, postpaid.

HONEY ROCK Sweet As Sugar

336—(80 days.) This variety has long been a favorite of market and home gardeners. Has about the deepest, sweetest, firmest flesh you have ever tried and a beautiful golden-salmon color, too. This one is a dandy in any garden. Pkt. 17c; oz. 48c; ¼ lb. 1.10; 1 lb. 2.95, postpaid.

WATERMELONS

NEW "SUGAR BABY" WATERMELON

Smaller—
Sweeter—
Crisper—

730—(83 days.) This new, deliciously sweet, icebox type melon is the best one for northern planting areas. Melons are perfectly round and about 7 to 9 inches in diameter. Has the brightest, reddest, crispest, sweetest flesh you've ever tasted. Only a few small seeds. Should be a good seller and fine for home use. Pkt. 25c; oz. 55c; ¼ lb. 1.15; 1 lb. 2.95, postpaid.

MOTHER GURNEY'S ICE BOX SIZE OFFER

700X—2 packets each of New "Sugar Baby" and New Hampshire Midget. All 4 packets for only 69c, pp.

Hybrid Dixie Queen

723—(90 days.) Lots of big melons weighing from 35 to 50 lbs. Hybrid Dixie Queen can take dry weather and still stay in eating condition better than the ordinary Dixie Queen. Its hybrid vigor makes it disease resistant. Flesh is deep red, fine grained and free from stringiness; sugar-sweet and crisp, too. Ready for eating around the middle of August. Don't miss this one. Pkt. 35c; ¼ oz. 75c; oz. 1.95, postpaid.

NORTHERN SWEET Earliest and Sweetest

714—(70 days.) Melons weigh from 12 to 15 pounds and flesh is scarlet, very sweet and fine grained. Is a very heavy bearer, often producing 10 to 12 melons to a hill. Our really northern customers should probably plant this one as you will always get under the wire with this fine melon. Pkt. 20c; oz. 40c; ¼ lb. 90c; 1 lb. 2.25, postpaid.

GOLDEN HONEY The Big Golden Beauty

718—(88 days.) Better flavor than most reds. Its sparkling golden flesh and brown seeds give it an extra delightful appearance. One of the sweetest and tastiest you've ever eaten. You can't go wrong with Golden Honey Sweet. Pkt. 20c; oz. 49c; ¼ lb. 1.20; 1 lb. 2.25, postpaid.

EARLY KANSAS Red Seeded Favorite

716—(80 days.) One of the most widely planted of all watermelons. Is large, nearly round and has a beautiful dark green rind with lighter stripes. The melons weigh from 30 to 40 pounds apiece. Has rich red flesh of excellent flavor. Fine for home or market gardens. Pkt. 17c; oz. 49c; ¼ lb. 1.20; 1 lb. 2.25, postpaid.

NEW HAMPSHIRE MIDGET

Easy to Serve—Small—Sweet

713—(65 days.) Try this improved icebox size watermelon. Perfect for the refrigerator and its small size makes it just wonderful for individual servings. Imagine a melon only seven to eight inches long. Has a very sweet, rich flavor and crisp, red flesh. Very thin rind. This fine new melon deserves a place in your home garden. Pkt. 20c; oz. 45c; ¼ lb. 1.25; 1 lb. 3.25, postpaid.

CONGO Sweet as Sugar

704—(88 days.) This variety won the All-America Bronze Medal and is a U.S.D.A. development that is rapidly gaining popularity. Our customers who plant Congo always reorder the following spring. You'll have loads of 35 to 40 lb. melons with deep, red, sugar-sweet flesh. Ideal for market or home garden use. One of the finest all-around melons you can plant. Pkt. 20c; oz. 45c; ¼ lb. 95c; 1 lb. 2.25, postpaid.

DIXIE QUEEN Heavy Producer

722—(80 days.) You'll get lots of 30 pound melons from Dixie Queen. The outside is a light green color with narrow dark green stripes which makes it especially attractive. Its dark pink flesh, which is very firm and of nice texture, almost melts in your mouth. Dixie Queen is dependable for home or market growers. Be sure you try it. Pkt. 18c; oz. 45c; ¼ lb. 1.15; 1 lb. 2.25, postpaid.

IMPROVED KLECKLEY'S Will Resistant

724—(85 days.) Everyone can enjoy the delicious flavor and richness of this fine red-fleshed melon. They're big too, in fact they'll weigh from 30 to 35 pounds apiece. A solid, dark green melon that is "tops" for home and market use. If you have trouble with wilt, be sure and try Improved Kleckley's. It's a good melon that you can bank on to give results. Pkt. 15c; oz. 40c; ¼ lb. 90c; 1 lb. 2.25, postpaid.

Winter MELON A Christmas Treat

717—(85 days.) In late fall when other melons are gone, go to the barn or strawstack where they are stored, get a big, round, Winter Watermelon that is so crisp it often splits wide open when you stick it with a knife. Flesh bright scarlet and of exceptionally fine quality. Sweet and delicious. Winter Watermelons are nearly white and will generally weigh from 15 to 20 pounds apiece. Pkt. 20c; oz. 50c; ¼ lb. 1.25; 1 lb. 1.95, ppd.

EARLY CANADA For Northern Areas

701—(75 days.) This new Canadian melon is earlier than our melons. Firm, red, sweet flesh of fine quality. Recommended for planting as far north as melons have ever been grown. Melons weigh 10 to 15 pounds apiece and have a beautiful, light green rind. The best melon for you folk in the northern melon area. You southern growers will be eating melons earlier with this variety, too. Pkt. 18c; oz. 30c; ¼ lb. 65c; 1 lb. 1.95, postpaid.

Gurney's TURNIPS

How to Plant and Store

Turnips and rutabagas are easy to raise and store. Sow early varieties as soon as you can get them in the ground. Later varieties do best as a fall crop. Sow 2 to 3 lbs. to the acre the last part of July. 1 oz. of seed will drill 150 feet of row. For successive crops, make 2 or 3 plantings at about 2 week intervals.

Both store well in outdoor caves, a cool, dark basement or pit. Make sure there is adequate ventilation.

Purple Top Yellow RUTABAGA

Firm Flesh—Good Keeper

808—More of this variety is raised than any other. The roots are purple above and an attractive yellow below. The light yellow flesh is firm, sweet, and fine flavored and cooks to a bright orange. It has very small necks and no side roots. Has large, smooth, cabbage-like leaves. One of the best for table or for stock feed. Very productive. Will keep in fine condition until late in the spring. Pkt. 12c; oz. 25c; ¼ lb. 60c; 1 lb. 1.45, postpaid.

PURPLE TOP WHITE GLOBE or Fine Flavor

807—We consider this the finest table turnip on the market today, and also an immense yielder of rich stock feed.

This all-season turnip is sweet and tender from the time it is large enough to use until the following spring. Pkt. 20c; oz. 30c; ¼ lb. 50c; 1 lb. 1.25, postpaid.

Purple Top Strap Leaf

806—Similar to Purple Top White Globe but flatter in shape. Grows 4 to 5 inches across. Has delicious flavor and is one of the most popular varieties grown. Can be planted either in fall or spring. A fast grower and an excellent keeper. Suitable for freezing. Pkt. 15c; oz. 25c; ¼ lb. 50c; 1 lb. 1.25, postpaid.

Extra Early Milan Turnip

803—(40 days.) Similar to Strap Leaf but earlier. One of the finest turnips grown. Flat with purple top. Fine grained, sweet and very tender. If you want an extra early, extra fine turnip, this is the one you should plant. Pkt. 18c; oz. 30c; ¼ lb. 55c; 1 lb. 1.35, postpaid.

EGG PLANT - "Black Beauty"

Sow in hotbeds or indoors early in the spring and transplant 2 to 3 feet apart in very rich, warm ground.

657—BLACK BEAUTY. A favorite in northern gardens because of its earliness, extra fine quality and a sure cropper. The fruit is large, oval, very deep purple. Pkt. 20c; ½ oz. 45c; 1 oz. 75c, postpaid.

GARLIC BULBS

229—Garlic is always rather high in price and often you are unable to buy it when needed. Why not raise your own and supply your neighbors? Easy to grow. Separate the bulbs into small cloves. Plant, cultivate and store like onion sets. 2 bulbs, 25c; ¼ lb. 40c; ½ lb. 65c; 1 lb. 95c, postpaid.

BRUSSELS SPROUTS

225—Matures in 90 days. Looks like dozens of little cabbage heads alongside the stem. Wonderful eating. Pkt. 20c; ½ oz. 45c, ppd.

227—NEW GUINEA BEAN. When beans are 8 to 10 in. long, prepare like egg plant. Pkt. 20c; oz. 35c, postpaid.

233—GARDEN HUCKLEBERRY. For pies, preserves, and jam. Pkt. 20c, ppd.

242—Mushroom Spawn. Delicious mushrooms are easy to grow in cellars, caves, barns or old out-buildings with new Vita-Flakes. How to grow directions with every order. Package (enough for 12 sq. ft.) 50c; 3 packs 1.35, ppd.

Let an Old-Fashioned HERB GARDEN Add Zest and Flavor to Your Cooking!

ONIONS

HE-SHI-KO Bunching Onions

315—Absolutely the best for early green onions. Does not form bulbs. Long, slender, silver-white stalks. Produces clusters of four or five. Mild and sweet. Extremely hardy and will winter over without protection. Seed planted in spring makes onions by midsummer and seed planted in fall makes onions in early spring. A hardy perennial. Pkt. 20c; ½ oz. 45c, postpaid.

WHITE SWEET SPANISH

313—(115 days.) A fine, large, sweet white onion many weighing up to one pound and over. Stores well over a long period of time. Very fine grained, of excellent quality and has mild, sweet flavor. Yields as well as the Yell. Swt. Spanish and keeps better than Bermudas. Excellent for northern sections. Pkt. 20c; oz. 85c; ¼ lb. 2.25, postpaid.

YELLOW SWEET SPANISH

303—Utah strain. (112 days.) Largest and mildest of all. Fine for the north. Bulbs are globe-shaped, small necks, firm, golden-yellow skin. Mild, pleasing flavor. Yields of 1000 bu. per acre are common. Pkt. 20c; oz. 85c; ¼ lb. 1.95; 1 lb. 5.95, postpaid.

Southport YELLOW GLOBE

302—(110 days.) Probably best keeper of all yellow onions. A big yielder, too. Onions remarkably uniform and mature at same time. Bright golden yellow in color. Flesh creamy white and fine grained. Deep globular shape with thin neck and full shoulder. A good keeper. For home or market garden. Pkt. 18c; oz. 72c; ¼ lb. 1.85; 1 lb. 4.65, postpaid.

Southport WHITE GLOBE

307—(110 days.) The best white one you can grow. A maincrop variety, popular for home use and market gardeners. Large and perfectly round. Flesh pure white, mild flavored, sweet and juicy. Paper-white skin. Good keeper. Excellent quality. Pkt. 20c; oz. 75c; ¼ lb. 1.95; 1 lb. 5.65, ppd.

Southport RED GLOBE

Very hardy and has everything—size, quality of fruit, color and productivity. Red Lake makes up into delicious, tasty, sparkling, red jelly. A Minnesota introduction, so it is hardy. You'll like it. 2-yr. No. 1 plants, 89c each; 3 for 1.98, 10 for 5.98, postpaid.

WILDER CURRANT
The One for Jelly

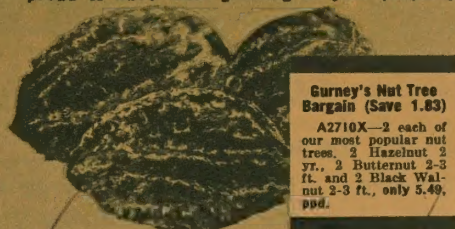

A3025—All of your folks will want some currant jelly for winter. Wilder Currant is the one to raise for good jelly. The berry is at least twice as large as the ordinary currant, and can produce twice the crop. Some in our nursery are nearly as big as cherries, and are borne in huge clusters. 2-yr. No. 1 plants 79c each; 3 for 1.89; 10 for 5.49, postpaid.

Grow Gurney's NUT TREES

for pleasure and profit

Here is a select listing of nut trees. We are offering nothing but the best ones that will do well for planters North or South. Most of us do not plant enough nut trees, and therefore miss a real treat in home-grown nuts from our own backyard.

Nut trees are also grown for more than just the fruit. Most varieties we are offering can be used in the landscape planting as they make very good shade trees and are ornamental. All are excellent for fence posts, firewood and lumber. All are very attractive trees. You will be proud to have them growing on your property.

Gurney's Nut Tree Bargain (Save 1.83)

A2710X—2 each of our most popular nut trees. 2 Hazelnut 2 yr., 2 Butternut 2-3 ft. and 2 Black Walnut 2-3 ft., only 5.49, ppd.

Gurney's BUTTERNUT

Delicious Buttery Flavor

A4102—A cousin of the Black Walnut and one of the most popular and best eating nuts. It bears large nuts with a rich, buttery flavor. Makes a fine tree and wood is valued for furniture and interior trim. Grows naturally from New Brunswick west to the Dakotas and Arkansas. Perfectly hardy in most all mid-west territories. Plant where ground is usually moist, as it cannot stand extreme dryness. 2 to 3 ft. 1.29 ea.; 3 for 2.98; 3-4 ft. 1.49 ea.; 3 for 3.98, postpaid.

Gurney's BLACK WALNUT

The Most Valuable Nut Tree

A4132—Gurney's Black Walnuts are grown for you right here at Yankton from seed produced on trees that have been native to our climate for over 60 years. We have selected only the trees that have been able to withstand tough conditions without damage, bear heavy crops of large, fine-flavored nuts and grow fast and bear young. Mature trees often bear from 15 to 30 bushels. Black Walnut lumber is always in demand for making fine furniture. For grove plantings we suggest seedling grades listed on page 43. 2 to 3 ft. 1.39 each; 3 for 3.89, postpaid; 3 to 4 ft. 1.69 each; 3 for 4.89, postpaid.

AMERICAN HAZELNUT—Many Nuts In Small Space

A4115—This hardy Hazelnut produces large quantities of high-quality nuts every year. Makes a beautiful, well-branched shrub 5 to 6 ft. tall. Attractive enough to plant in your yard as an ornamental shrub. In the fall the foliage turns to a brilliant scarlet and bronze.

A native of the Black Hills, Eastern South Dakota, Minnesota and Iowa. We are offering one grade only this year. Strong two-year-old plants. 12 to 24 inch 98c each; 3 for 1.98; 10 for 8.69, postpaid.

HARDY PECANS . . . America's Favorite

A4120—Here is a native-type nut tree that is very hardy. One of the most vigorous growers of all nut trees. Not only is it a heavy yielder of fine quality, delicious tasting nuts but in addition to this it makes a wonderful ornamental shade tree. Ours is the hardest type of pecan that can be planted; however, we doubt if it will do well north of Yankton and in similar climates. 18 to 24 in. 1.69 each; 3 for 3.98, postpaid.

Gurney's NEW BOHEMIAN HORSE RADISH

Can Be Grown Anywhere

We have discarded all other varieties except this one, because it is so superior. Hardy anywhere and very desirable as a relish. Roots are dug in early spring, grated fine and with vinegar added, it is ready for use. The roots are large, white, and the quality is superior.

HORSE RADISH PRICES

A3045—Heavy Crowns: 5 for 1.29; 10 for 2.19; 25 for 4.29; 100 for 12.98; 500 for 64.98, postpaid.

A3046—Cuttings: 12 for 1.19; 25 for 1.98; 100 for 5.98; 500 for 21.98, postpaid.

SATISFIED CUSTOMERS

Every year we receive thousands of letters from satisfied customers all over America. Thought you would enjoy reading a few of them.

Dear Sir:

We received the cabbage plants and they were all in good shape. We didn't count them but I am sure there was a lot more than 50 plants. Thanks again. Mrs. Walter McCarter Overton, Nebr.

You Can Grow Peaches

Mrs. Elden Pollnow of Hartford, Wisconsin sent in this picture to show you how well the Elberta peach she got from us is doing. She wrote that it would give them a big thrill to see the picture in our next catalog. Here you are Mrs. Pollnow.

Gentlemen:

I received the package today in fine condition. I never saw plants packed in such a nice way. Thanks again.

Mrs. M. A. Shultz
Pretty Prairie, Kans.

Dear Sirs:

Those 5 apple trees I got from you are doing splendidly. I hope to be able to do business with you in the near future.

N. L. Larson
115 NE 16th Ave.
Portland, Ore.

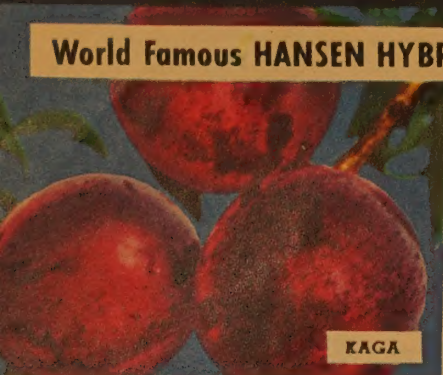

Melons and More Melons

How is this for a lot of fine looking watermelons? We thank Mr. and Mrs. John B. Hosterman of Gettysburg, South Dakota for sending in the picture. You can do the same with Gurney seeds.

Hardy—Early-Bearing—Heavy-Yielding PLUMS from GURNEY'S

World Famous HANSEN HYBRIDS

KAGA

OPATA

SAPA

OKA

Gurney's Finest PLUM BARGAIN

A2182X—These three fine hybrid plums will do well in your own yard. You get 1 Kaga, 1 Opata, 1 Sapa. All 3 to 4 ft. size. FREE: 1 Oka Hybrid Plum-Cherry 2 to 3 ft. A \$3.98 PPD. 4.89 catalog value.

KAGA—The Apricot Flavored Plum

A1620—A deliciously flavored plum with an appetizing fragrance. Medium-size, heavy producer, and bears very early after planting. Very hardy. A cross between a native wild plum and the very fragrant Chinese Apricot. A good pollinizer and a variety that will produce plenty of plums for canning, preserves, and delicious eating right from the tree.

OPATA—Extra Hardy and Early Bearing

A1628—The earliest of the Hansen Hybrids, Opata bears ropes of fruit which ripen in mid-July. A juicy, tangy plum of medium-size, green flesh; flavor very pleasant. Tree is vigorous in growth. Extra hardy and often bears one year after planting. This variety does very well for the southern planter as well as producing a fine crop clear up into Canada.

SAPA—Rich, Sweet and Black

A1631—Black outside and clear to the pit. It has a sweet flavor you can't forget and bears immense quantities annually. Ripe the latter part of July. Bears the first year after planting. Very hardy. Has deliciously sweet juice. You'll enjoy it year after year. Be sure and plant one or two of these trees if you want loads of luscious fruit.

OKA—Delicious Plum-Cherry Cross

A1627—Has highest quality of any in the Cherry-Plum group. Very productive, skin almost black. The deep purplish-red flesh is very juicy and sweet. Resembles large, sweet cherries and the quality is very good for eating or cooking. Ripens mid-August to early September. Remains a bush rather than a tree. Fruit stays edible on the bush three weeks after ripening.

FOR PRICES OF ALL PLUMS SEE PAGE AT RIGHT

TECUMSEH

TECUMSEH—Extra Hardy and Early

A1634—One of Dr. Hansen's best, and probably the best-eating plum in our whole list. Ordinarily ripens in August. One of the earliest bearing of all, and hardy clear up into Canada. The fruit is a bright red with bluish bloom. The flesh is yellow, firm, juicy and sweet, and has a delightfully appetizing flavor. Has everything a plum should have to make it ideal for your use.

UNDERWOOD

UNDERWOOD—For Northern Planters

A1635—Right type for the Northern States and Canada. It ripens early and grows well as far North as Winnipeg in Manitoba. Large, red, sweet and juicy. Tree spreading, medium-size, productive and hardy. Fruit very high quality for eating fresh. Should be planted near pollinizer plums such as Kaga.

SOUTH DAKOTA

SOUTH DAKOTA—Dr. Hansen's Latest

A1633—Tree is hardy, vigorous, and productive. Fruit is medium size, bright red over yellow with flesh that is yellow, tender, and juicy. Fine for eating fresh, jellies, jams. A late plum. Fine pollinizer. This fine plum is now available at our regular plum prices as listed on opposite page. Be sure and try SOUTH DAKOTA.

SEE PLUM PRICES ON PAGE AT RIGHT

RED COAT

Freestone REDCOAT—Best for Canning

A1630—This is a true freestone plum with exceptional qualities. The fruit is medium size and the color a beautiful bright crimson. Tastes just as good as it looks too, with wonderful rich flavor and excellent quality. None finer for canning. Bears young and heavily. One of the finest desert plums grown anywhere. Very hardy and should be in every plum orchard.

Hardy IDAHO PRUNE

Best Prune for the North. This is George's Favorite.

A1612—Large, delicious blue prunes with firm flesh of fine quality. Excellent for canning or eating fresh. Cooks up into fine wine-red sauce.

We have tested this variety for a number of years and found it able to stand our rigorous winters and still produce good crops. Idaho Prune was introduced by us and is the only prune we feel worthy of listing in our catalog.

IDAHO PRUNE

WANETA—The Largest Red Plum

A1637—You get big, profitable crops from Waneta. The fruit is very large and a gorgeous reddish-purple color. The flesh is tender, sweet, and juicy—of the finest quality. A sure bearer every year, and one of the best of all market plums.

Waneta was originated by the late Dr. N. E. Hansen. The trees are vigorous, spreading, exceedingly hardy, and produce for many years. Bears early September.

SUPERIOR—Largest Fruit of All

A1632—The largest, and one of the best quality hybrid plums. Grows fast and bears young, usually the first year after planting. Ripens from August to September, depending upon planting location and it bears every year. A heavy bearer of unusually big, yellowish fruit which turns pink and then a deep, rich red. Peels like peaches and the firm, juicy flesh is of high dessert quality. Hardy in southern S. Dak., Iowa and like climates.

WANETA

Gurney's Have Specialized in PLUMS

OVER 90 YEARS EXPERIENCE

Plums have been a Gurney specialty for over 90 years. We offer you a complete line of plums each one the best of its kind. All are budded on hardy plum seedlings—not on peach. (Beware of southern plum trees for the northwest because many of them are budded on peach stock, which is not hardy.) All Gurney Plums are extra-hardy. They in-

clude 7 of the hardy Hansen plums: Waneta, Opata, Oka, Sapa, Kaga, South Dakota, and Tecumseh. Redcoat, Underwood and Superior are Minnesota varieties.

Set 14 ft. apart in row with rows 18 ft. apart. 170 trees to the acre. Don't forget that they not only produce a lot of delicious fruit but make beautiful decorative trees for the yard.

Why Gurney's Hardy NORTHERN GROWN Fruit Trees Do BETTER FOR YOU:

HARDEST YOU CAN PLANT

North, South, East or West, Gurney's fruit trees adapt themselves quickly. If they grow well under adverse conditions, they will do even better in milder climates. Select varieties recommended for your locality. Then you know you are getting stock adapted to your conditions.

ABSOLUTELY TRUE TO NAME

Nothing is more disappointing than to buy and raise a fruit tree only to find out it bears the wrong kind of fruit.

That won't happen at Gurney's. Experts are constantly checking. All trees go through many inspections to assure you of only perfectly graded, healthy trees and, more important, that you get exactly what you order. Gurney's GUARANTEE their fruit trees to be true-to-name or replaced FREE OF CHARGE.

Gurney's "Whole Root" Buds Give Extra Protection

You can't have a sturdy fruit tree without a heavy root. Gurney's "whole-root" bud all fruit trees. Only a sturdy, hardy root can survive our hot, dry summers and cold winters. "WHOLE ROOT" budded fruit trees can't be beat.

Common Fruit Graft
A common fruit graft often results in a non-hardy root. Don't take this chance—order from Gurney's.

Gurney's "BUDED" Type
The whole root (not just a piece) is used on all Gurney-Budded fruit trees, the hardest you can buy.

Plant Early for Best Results

We have always preached early planting—and we still do. Early planting means the stock gets established before the hot, dry, summer months. Don't wait until the last minute, but send in your order well in advance of the planting season.

DWARF FRUIT TREES

From Gurney's... Use Less Space, Take Less Care

WILL BEAR EARLIER—These genuine dwarf fruit trees are much smaller than a normal fruit tree but their fruit is equal or better size and quality. It isn't uncommon at all, for a dwarf fruit tree to bear the second year after planting. They take so little space that everyone has room for at least one or two of them.

SO EASY TO PICK—You don't need a long ladder to pick the fruit from Gurney's dwarf fruit trees. No chance of a broken neck and spraying is no problem at all. You can do practically all the harvesting with both feet right on the ground.

MORE VARIETIES TO CHOOSE FROM—You can plant four or more dwarf trees in the same area that one regular fruit tree would occupy. Instead of only one variety you may now plant a complete assortment of varieties in your own home orchard.

Compare the size with normal tree!

DWARF APPLE TREES

These have been propagated with Clark interstem grafts. Mature height is only 8 to 10 foot tall.

A1123—DUCHESS. The favorite summer cooking apple.

A1121—HARALSON. Produces loads of big, juicy fruit that keeps until the following summer. Bears early.

A1125—McINTOSH RED. A fine tasting, good-keeping red apple. A very dependable bearer. Fruit is fragrant and of high quality.

A1130—RED DELICIOUS. Most famous of all sweet red apples. One of the finest appearing and tasting apples on the market. The fruit is truly delicious.

A1138—WEALTHY. Best and most widely planted of all fall apples.

Dark "All Red" DUCHESS

The Favorite Summer Cooking Apple

A1019—If you like the Old Duchess of Oldenburg, you will go for the new Duchess in a big way. It ripens its juicy red fruit throughout August. For those delicious apple pies and sauce, you'll find this variety hard to beat. First degree of hardiness.

Gurney's WEALTHY

Best Known Fall Apple

A1105—This is too well known to need description. Has pale yellow skin almost hidden by brilliant red stripes and white juicy flesh. Fine for pies. Wealthy is hardy and a leader of orchard apples for the north. If picked early and properly stored will keep until Christmas.

YELLOW DELICIOUS

The Golden Beauty

A1016—A luscious, golden, yellow, good-keeping apple. Extra hardy. It keeps well and is DELICIOUS. Our most popular yellow apple. Extra large in size and truly "delicious." You folks that can raise Yellow Delicious will find it one of the best winter apples. Not recommended for the north.

PRAIRIE SPY

The Winter Keeper

A1075—Attractive red color, very high quality. Very productive and hangs on well. Prairie Spy is a good keeper and of better quality than Winesap and others on the market after Christmas. Be sure to include a few Prairie Spy in your home orchard.

ANOKA

Often Fruits First Year

A1000—Everybody plants Anoka. The earliest bearing apple that we know of. Little 2-yr. trees in the nursery often bear several red striped apples. Good quality and the juice is rich. Anoka is extra hardy and medium sized. Our most popular summer apple.

Nation Wide APPLE COLLECTION

A2016X—1 each of McIntosh, Northwestern Greening, Prairie Spy, Yellow Transparent and Haralson—all can be grown anywhere. New Daily Big 4 to 6 ft. size. **\$7.49** Ppd.

FIRESIDE

It's Super Delicious and Hardy

A1025—Delicious quality yet hardy enough to grow and fruit in the far north. Trees large, vigorous, well branched. Fruit beautifully striped with crisp, firm, juicy flesh—never dry. Keeps all winter and bears every year. Developed at the U. of Minn.

McINTOSH RED

An Old Favorite

A1061—To many the finest flavored apple we list. Beautiful red apples often with darker red blush, fragrant and of highest quality. A fall apple which will keep well into the winter. One of the most dependable bearing of all apples.

YELLOW TRANSPARENT

Early Golden Summer Apple

A1110—One of the earliest, ripening right after early harvest. An excellent eating apple and "what apple pies you can make with it!" Bears immense crops of yellow, thin-skinned apples just "tart" enough for the best sauce and pies.

SEE PRICES ON OPPOSITE PAGE

HARALSON Finest Hardy Winter

A1040—Add up the good qualities of all the other apples and say "this is Haralson." Produces loads of big, red juicy fruit that keeps till the following summer. Bears annually on a strong branched tree. Pick fruit in three years.

All Season APPLE COLLECTION

A2009X—1 each of Wealthy, Haralson, Yellow Transparent, Duchess and Anoka—all 3 to 4 foot trees (good planting size). for **\$5.89** Ppd.

NORTHWESTERN GREENING

Biggest Apples of All

A1065—Very ATTRACTIVE winter apple, with smooth, waxy, clear pale yellow skin with a slight greenish tinge. An excellent eating apple and "what apple pies you can make with it!" Bears immense crops of yellow, thin-skinned apples just "tart" enough for the best sauce and pies.

5 Hardy Northern Varieties

5 in 1 APPLE TREE

A Complete Orchard On One Tree

Not an ordinary 5-in-1 apple tree, but one with 5 hardy northern varieties (see small illustrations at left). From top to bottom as pictured at left, each tree will produce Red Duchess, Yellow Transparent, Wealthy, Haralson and Prairie Spy. Good from Yankton north, better than ordinary varieties from Yankton south. Each apple bears in its own season, giving you a whole orchard from one tree. Now even the smallest yard can grow 5 different kinds of apples. All are 5 to 6 foot trees 3 years old.

Delicious PATTEN Big and Productive

A1524—This pear is healthy, hardy and productive. Bears a LARGE, YELLOW fruit with the RICHEST JUICE AND FINEST FLAVOR. The skin is THIN and QUALITY EXTRA GOOD. We recommend this pear to both northern and southern planters if they are looking for a good "all-around" variety that will bear lots of delicious fruit for years to come. See prices at left.

THE GIANT BARTLETT The Earliest Pear of All

A1502—This is one of the leading commercial varieties. Has long been one of the most popular for dessert and canning. Fanciest and finest of all pears. Has a rich, golden-yellow color with a rosy-pink blush. Plant Bartlett if you want a good keeper and shipper. The fruit is pointed at the top and wide at the base. Tree is vigorous, hardy and bears young. This

is an early variety that is fine for the more southern growers. See prices at left.

GOLDEN SPICE Perfect for Pickling

A1512—A new heavy bearing pear from Minnesota. Small in size but the trees are loaded with the golden russet fruits. Very hardy and blight resistant. A fine quality pear we know you'll like. Makes delicious sauce and preserves, and is fine for whole pickles. See prices at left.

The Famous LINCOLN Absolutely Hardy Anywhere

A1517—The most dependable pear. Large, good flavored. It has been producing a heavy crop every year for 22 years on George Gurney's farm. Even in a drought year, 3 young trees produced 14 bu. Ripens about September 15. In big demand on the market. A good commercial variety and one of the best home pears. See prices at left.

DOUGLAS PEAR Bears Early and Heavily

A1509—This fall pear begins to produce heavy crops while still very young. One of the heaviest bearing pears. Fruit is large, yellow, and may be allowed to stay on the tree until fully ripe. You don't have to bother wrapping them. This is one of the most blight-proof of all the pears. See prices at left.

HOW TO GROW PEARS

Pears can be grown in any soil that is well drained. Pruning and training are similar to that of apple. (Write for our free bulletin on pruning fruit trees.)

Pears grow upright, so can be planted as close as 14 to 16 feet apart. No other fruit compares with pears in aroma, lusciousness, or range of flavors. Plant at least 2 pears of different varieties for the sake of cross pollination.

Prune pear trees severely at planting time. Cut all side branches back to within 2 buds of the main trunk and then remove at least 1/3 of the top growth.

Gurney's Hardy, Sure-Bearing

APPLES

All Gurney apples including the crab apples, are grown here at Yankton on hardy Siberian root stock. Nothing hardier or better for north or south. We have been headquarters for hardy apples for over 90 years and when we say a certain variety of apple is hardy—it IS hardy.

GURNEY'S LOW APPLE PRICES Including Crab Apples (excepting Delcon)

All prices listed below are for genuine Gurney apples budded on hardy Baccata root-stock, making the tree hardy for all climates. Don't take chances on stock that is not from Gurney's who specialize in HARDY, NORTHERN-GROWN trees.

APPLE BEARING CHART

Harvest Apples: Yell. Transparent, Red Duchess, Anoka. Fall Apples: Wealthy, McIntosh, Minn. No. 724. Winter Apples: Haralson, Jonathan, Northwestern Greening, Prairie Spy, Fireside, Delcon, Red Delicious, Yellow Delicious, Connell Red.

Dark "ALL RED" DELICIOUS

A1015—"Delicious" truly describes its QUALITY. It is "ALL RED" and one of the best eating apples. Hardy from lower Nebraska south. Large, red, with 5 points on base. You'll have to do a lot of looking before you can find an apple that equals this "ALL RED" improvement on Delicious. The best-tasting fall apple.

MINNESOTA 724 The New Fall Apple

A1090—If you like the old favorite McIntosh, you will more than enjoy this new variety. A fine red apple that is excellent any way you use it. Try its delicious flavor fresh from the tree or make it up into some of the best sauce you ever tasted. We predict a great future for this wonderful new fall apple. Absolutely hardy.

JONATHAN The Grocer's Favorite

A1045—An excellent winter apple for every use. Red, juicy and "snappy" when eaten out of hand. Wonderful baked or in pies, and it keeps well without special care. Many orchards are comprised principally of Jonathan as it is considered one of the standards by which other apples are judged. Doubtfully hardy north of central Iowa.

Hardy Apple Offer

A2011X—These giant 4 to 6 ft. trees will do well anywhere. You'll have fruit the year around. We send you: 1 DUCHESS 1 WEALTHY 1 WHITNEY 1 HARALSON FREE GIFT: 2 Hansen Bush Cherry. Delicious. \$5.98 PPD.

HOW TO PLANT APPLE TREES

Set apples 25 to 35 feet apart. After planting, prune back all side branches to within 3 buds of main trunk and cut off one-fourth of the main lead. Each year prune injured limbs only. Northern growers do better letting their trees grow in bush form, where bottom branches grow to within 2 to 3 ft. of the ground. Send for free pruning bulletin.

ALL RED APPLE OFFER

A2029X — 1 Connell Red, 1 Minn. 724, 1 Prairie Spy. All 4 to 6 ft. size for only 4.98, ppd.

NEW DELCON DWARF

NOW!

A True Dwarf with Large Apples

Perfect for the Small Yard or Lot

A1014—An apple tree tailor-made for the small lot. Delcon normally does not get over 12 feet tall, yet bears loads of beautiful, delicious, dark red, full-sized apples shaped like Delicious. The flavor has all the best qualities of two of its parents, Jonathan and Delicious, while the tree itself seems to have

inherited additional hardiness from its third contributor, Ben Davis.

It is a single-graft, true dwarf. Much less expensive than \$6.00 multi-graft dwarfs, yet better.

"CONNELL RED" APPLE

The PATENTED Apple That Has Everything

A1012—(Plant Patent No. 1602). Gurneys are proud to again offer this fine new apple.

Connell Red is solid bright red in color, is large sized, and has a very distinctive flavor. Excellent for eating as well as mild flavored for sauce or salads. Best of all the tree is hardy and the fruit hangs well to the tree, yet is easily picked. Fruit keeps very well and with good storage should last until May.

We believe Connell Red to be very well suited for our midwest conditions and also that it will prove to be the most salable apple ever before offered from our trade area.

NEW THORNLESS

MAMMOTH BOYSBERRY

NORTH STAR

New Dwarf Pie Cherry from Minn.

A1338—Lots of big Morello-type free stone cherries on super hardy dwarf 5 to 7 foot trees.

Its glistening deep red cherries make luscious pies and sauce. The dwarf sized trees make the fruit easy to reach and they bear good crops each year. Self-pollinizing, too.

We feel certain that North Star is destined to become one of the most popular of all cherries. See prices below Meteor.

METEOR

New Hardy Pie Cherry

A1332—At last a hardy pie cherry for all northern planters. Developed by the Minnesota Fruit Breeding Farm. It has produced a crop of fine cherries every year.

The fruit is as large as Montmorency, bright red in color, and of very good quality. Mildly acid in flavor and a real treat for all who enjoy pie cherries as a dessert.

HYBRID NANKING CHERRIES

Most outstanding new fruit introduction in the last 10 years. A bush cherry far superior to the western kind. Fruit is about the size of Early Richmond and is wonderful for pies, canning, preserves or jelly. Beats them all when eaten fresh. The cherries are a deep red, with firm, tender, sweet flesh and small pits. Will grow to height of 10 feet, but can be kept down to 4 feet by pruning. A beautiful ornamental shrub covered in spring with white flowers followed by dense foliage. Plant at least three for best pollination.

HYBRID BUSH CHERRIES

Much larger and tastier fruit than the old Hansen Bush Cherries and better growers. 18 to 24 in. 1.69 ea., 3 for 4.69, p.pd. Choose from following:

A1351—BROOKS. Dark red fruit, almost as large as regular cherries. Bears heavily the second year. Bush is compact and shapely.

A1350—BLACK BEAUTY. This is the newest selection of the bush cherry. The fruits are very dark, glossy, black maroon-red. Almost as large as tree cherries. Fruit red from skin right to the pit. Excellent for eating, canning and pies.

A1352—SIOUX. Extremely large cherries—% or better across. Purplish-black, shiny and greenish flesh. Juicy and sweet. In the vicinity of Minn. this cherry fruits about the second week of August, earlier south of there.

Gurney's Cherries Are Best

Gurney's Cherry Trees are extra-heavy rooted, well-branched, and of extra-heavy caliper. All budded on hardy understock to give a long-lived tree.

Set 18 feet apart, each way, or 130 to the acre. Keep the ground around them cultivated if you can, but cherries will do very well even when surrounded by a heavy sod.

MONTMORENCY

The World's Favorite Cherry

A1336—The fruit is large, with firm flesh of fine flavor. The cherry is bright red, and wonderful for canning and preserves.

Montmorency has proven itself wherever it has been planted. This is one reason Montmorency has been called the world's favorite cherry. See prices below MONTMORE at right.

EARLY RICHMOND

The Early Pie Cherry

A1311—The cherries have a bright red skin and red juicy flesh. The flavor is quite tart and marvelous for pies or canning. It is a strong grower and a heavy producer. You people south of

Gurney's Hardy CHERRIES

southern Minnesota and southern South Dakota have ideal conditions for pie cherries. We consider it one of the very finest pie cherries on the market. See prices below MONTMORE.

MONTMORE

New Early Bearing Montmorency

A1335—This improved, dwarf-sized Montmorency often bears the first year. Only grows about 10 to 12 ft. high but it still produces a full-size crop. Also larger and of a better quality. It is darker—black red. Will bear anywhere from Georgia as far north as cherries grow.

YELLOW GLASS

Birds Don't Bother It!

A1340—If you are looking for a cherry—and a yellow one at that—which will literally load itself down with a tremendous crop of fine golden cherries, Yellow Glass is it. Has flavor that is every bit as good, and some consider it better than the delicious Bing cherry. Hardest of all the sweet cherries.

You will also appreciate the fact that, because the fruit is yellow, the birds leave it alone. Try Yellow Glass—the hardest of the sweet cherries.

FREDONIA

—King of Blacks

A3125—It is early, in fact, three weeks earlier than Concord. Very hardy, a very heavy producer and a vigorous grower. The bunches are compact and the berries really have the most wonderful flavor—you won't go wrong with a few Fredonia. 1 Yr. No. 1 Plants. 69c each; 3 for 1.49; 6 for 2.98; 12 for 5.49; 25 for 7.98, postpaid.

BETA

—Hardest of All

A3104—Here's a tame grape with the tang of the wild. Best for the North, for it is fast (15 to 20 ft. in 1 yr.) in growth and hardest of all. It produces large quantities of fruit that is almost black . . . juicy . . . fine for arbor. No winter covering needed. 1 Yr. No. 1 Plants. 59c each; 3 for 1.49; 6 for 2.69; 12 for 4.89; 25 for 7.49, postpaid.

NIAGARA

—Best White

A3139—Niagara is the leading favorite in "white" grapes because the large fruit has such a delightful flavor. The vine is hardy and extremely productive. Does very well here at Yankton. Your grape arbor should contain at least 6 Niagara. 1 Yr. No. 1 Plants. 69c each; 3 for 1.69; 6 for 2.98; 12 for 5.49; 25 for 7.98, p.pd.

RED CACO

—Big Clusters

A3110—The sure-crop red grape. Always bears big clusters of rich red grapes, even in hottest summers. Makes most beautiful jelly. As Concord is the most popular of the blue-black grapes, so Caco is the most popular of the red grapes. 1 Yr. No. 1 Plants. 69c each; 3 for 1.69; 6 for 2.98; 12 for 5.49; 25 for 7.98, postpaid.

CONCORD

—Old Favorite

A3111—The most popular grape in the United States. Matures early, keeps well, ships well and sells well. The berries are in enormous bunches and are blue-black, juicy and delicious. Great for grape juice. 1 Yr. No. 1 Plants. 59c each; 3 for 1.49; 6 for 2.69; 12 for 4.89; 25 for 7.49; 100 for 24.95, postpaid.

Gurney's GRAPES

All Gurney grapes are strong, heavy plants that give quick results. They are well-rooted and will please you. The varieties listed are the hardest. They can be grown on a fence or an arbor, or in a vineyard. Plant about 5 or 8 ft. apart in rows 6 ft. apart. In planting cut the tops back to 3 to 4 buds. Put up a support for grapes the second year. Prune each year.

The grapes we list are exceptionally hardy and with very little attention have wintered the most severe conditions. All they require is a light covering in winter to protect the buds.

A2832—Biggest berry of all. Cross of Loganberry, Raspberry and Blackberry. A heavy bearer of deliciously flavored fruit. 1 Yr. No. 1 Grade. 3 for 98c; 6 for 1.59; 12 for 2.79; 25 for 4.98, postpaid.

NEW THORNLESS BOYSENBERRY

A2834—Same as the Mammoth, except this one is thornless for easy picking and cultivating. Great big berry of delicious flavor. 1 Yr. No. 1 Grade. 3 for 1.09; 6 for 1.69; 12 for 2.98; 25 for 5.69, postpaid.

BOYSENBERRIES

HOW TO PLANT: Set 6 feet apart each way. Leave on ground first winter and mulch with straw after cold weather. Next spring, train on wires. After fruiting, cut out canes that bore. Leave new shoots on ground, winter protect again and re-train the following spring. Doubtfully hardy north of Missouri, so protect.

America's Finest **STRAWBERRIES** Come From Gurney's

Why Thousands of Folks Grow Gurney Strawberries

No fruit is easier to grow, yields more heavily, or more quickly, with less space and less trouble than strawberries.

You can set out 50 strawberry plants in your back yard, in a space no larger than a blanket, and one year later you probably will get 50 quarts of fruit. It is no trick at all to set out 100, 200 or 300 plants, and if you want to grow larger quantities for a cash crop, strawberries

will make you more money per square foot of ground than almost anything you can grow.

By planting both Junebearers and Everbearers you can stretch your strawberry season. The Everbearers bear a good crop early, and another late. The Junebearers bear their whole crop in a few weeks, which is ideal if you want to freeze or preserve them all at once and get it over with.

EVERBEARING PLANTS

RED-RICH

The "Wonder Berry"

B4126—(Plant Patent No. 993)—Here's the cross between Wayzata Everbearing and Fairfax Junebearer. Red Rich is the result of a chance seedling, one in a million, that is good on all counts, retaining all the good qualities of both parents. Exceptionally high quality and honey-sweet flavor. The fruit is very large and a deep red clear through. Especially good for

freezing; does not mush when thawed; requires little sugar. One of the highest yielding Everbearers; 4,000 quarts were picked from one acre. Has a large crown and root system.

NEW PYRAMIDAL STRAWBERRY BED

You don't need a big back yard to raise loads of strawberries. The pyramid bed takes care of 50 plants in a circle only 6 feet across.

The 3 aluminum bands are attractively corrugated for added strength and beauty. A complete sprinkler system is included with each bed and includes the sprinkler head, tubing and hose connection. Full planting instructions and directions included.

Now you can have those strawberries you have always wanted. Remember, 6 foot of ground is all you need.

4055—3 aluminum bands and sprinkler, complete with easy to follow directions for assembling.

Giant **HYBRID BLUEBERRIES**

Grow Them Yourself

Real Blueberries big as marbles. You can now grow the genuine Hybrid Blueberries in your own yard. For a long time we have been experimenting with big blueberries from the east. We have found it possible to grow blueberries in the mid-west simply by adding a little aluminum sulphate to the soil to make it acid, so we send you a free package of aluminum sulphate with your blueberry plants.

FINEST VARIETIES

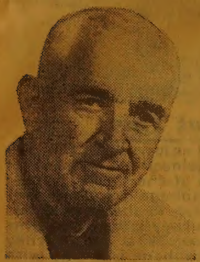

Truly as big as marbles. Delicious in flavor. Berries ranging up to the size of marbles. Big, upright, shrubby plants growing to a height of 5 ft. or more. We will only sell these in a collection of three, as several varieties of blueberries must be grown together to get a good set of berries. Plant 6 ft. apart. We are offering the newest and finest sorts of 3-yr.-old plants. With favorable conditions you can get enough delicious berries for that wonderful blueberry pie. Some folks report amazing results.

HYBRID BLUEBERRY COLLECTION

A2260X—We send you the following fine varieties of blueberries: 1 Rancocas 12 to 18", 1 Jersey 12 to 18", 1 Weymouth 12 to 18". In addition, we include 1 lb. of Aluminum Sulphate plus complete directions for making the soil acid.

3 Giant Blueberries **\$3.89** PPD.

"George Gurney's Corner"

I asked the boys to save this space for me so I could have a good chat with you all. Next to seeing you in the store here, this is the next best thing.

That's one good thing about the seed and nursery business. There is always something to talk about. This year, I think it's particularly true with the high prices of food in most stores. And it looks like we'll be up against those kind of prices for some time.

If there ever was a chance to save money by "growing your own" it is now. No matter whether prices are high or low, you can still raise your own food cheaper than you can buy it and it's a whole lot better, too. There used to be a tobacco company which had the slogan, "Roll your own and save your roll." It seems to me as though a good slogan would be "Raise your own and save your roll."

A small garden, a few fruit trees and a strawberry patch will cut a hole in your living expenses like nobody's business. And a few flowers here and there mean a lot of pleasure, too. Besides, a nice planting always adds a whole lot to the value of your property. Come visit my home someday and I'll show you what I mean. I'm proud of it.

We have had a busy year here at Gurney's this year. More and more folks are finding out about Gurney's extra-hardy stock and many who have tried to buy at small nursery stands are finding it pays to buy direct from a reliable nursery to be sure to get nursery stock that is fresh (not dried out), is true-to-name, and where a full selection of the best varieties is always available.

We here at Gurney's still believe in full measure and a little more. We appreciate your orders and will see they get prompt and careful attention. Will be looking forward to seeing your order. And, if we can be of any help on your gardening or planting problems, send your questions in. We'll do the best we can to help you. That's what we're here for.

State Approves Gurney's Stock

When your big package of Gurney's nursery stock arrives, take time to notice the label. You'll find a special notice on it signed by the responsible state officials certifying that they have inspected our nursery and found it clean and free of disease.

This means a good deal to you. You don't want to buy from a nursery that can't get his approval. You want healthy stock and you can be SURE of it, when you order from Gurney's.

Your Check is Good at Gurney's

No need to worry about how to send money with an order. Your check is always good with us here at Gurney's. And that makes it easier for you.

If you prefer, you can use a bank check or money order or postal note, or any other way you like, but it's not necessary as your check will be fine. We do not encourage cash going through the mail as it might be lost, but if you do send it, suggest you register it for your own protection.

\$5 For Your Picture

Gurney customers always seem to be interested in other Gurney customers. That's why we appreciate so much the snaps you send in from time to time of yourself, your family, your garden or what not. Our other customers always seem to be interested in what you are doing, planting, thinking, etc.

That's why we ask that, if you have an extra snap you think would interest Gurney customers you send it in. It must be an extra print as we can't return it, but, if we can work it in one of our catalogs or flyers, we'll mail you a \$5.00 check at that time.

Gurney's Send A
FREE GIFT
With Every
Garden Seed or Nursery Order

It always has, and always will take a lot of old-fashioned courtesy to maintain a friendly business.

We believe in good measure and a little extra. This is why every order to Gurney's—big or small—has included with it a FREE GIFT for you.

It's not only fun to get a surprise with your order, but it's our way of saying "Thank You" for your business, and to express our hope that your planting will be a great success.

The "Cucumber Queen"

Here is little Miss Shirley Smith of Shelby, Montana. How do you like the size of that cucumber she's holding? Of course, it was from Gurney seed. Shirley is the daughter of Mr. & Mrs. Don M. Smith and Mrs. Smith wrote that the cucumber Shirley is holding weighed 2 lbs. and 11 ounces. She also wrote that our "Hly-Top" tomatoes were wonderful. Thought you'd enjoy this picture and if you have a good snapshot we can use, remember—we pay you \$5.00 for each one used.

About Honesty

Honesty in business is more important than many people think. At least, we think so here at Gurney's. It was sort of "ground into us" as boys and we happen to believe in it.

When you buy many things, you can see exactly what you are buying. But when it comes to seeds or plants, you are buying something on trust—something that is going to be a Bartlett Pear, or Sunglow Sweet Corn when it has germinated, grown, and borne. So we get a little "hipped" on honesty. We lean over backwards always to make sure you get EXACTLY what you order and in good measure, too, so that when it has come into bearing, you are happy that Gurney's is your headquarters for seed.

Now some nursery stores aren't that careful. They just aren't nursery experts or seed experts and don't know. Their store is full of lawn mowers and vases; and seeds and plants don't come first with them. Here at Gurney's—quality seeds and plants, true-to-name, properly labelled in good measure (always a little more) is what you always get.

When you need seed or plants, and before you go to a roadside stand, think this over a bit. You'll be glad you did.

Gurney's Add Another 100 Acres to Nursery Fields

Demand has been so heavy for our hardy, northern-grown nursery stock, that we have, this year, completed adding another 100 acres of growing nursery to our nursery farms. This makes over 400 acres we now have in our growing program.

Our Missouri river valley soil is one of the finest in the world and has often been compared to the soil of the Nile as it is so rich and produces such fine stock. All our nursery fields are under irrigation so that we can give our stock just the right amount of water just when it's needed. This makes strong, hardy plants for you and is basically why particular gardeners always send to Gurney's for their planting needs.

Our Deluxe Fruit Trees Popular

We've never seen anything like the way our Deluxe grade fruit trees have "caught on." Seems like more and more folks are demanding the very extra-fine they can buy and these really are.

Each Deluxe grade tree is carefully prepared by hand individually. Choice 5-7 foot specimens are chosen with straight jumbo trunks, well-branched with extra large root systems. Then they are individually pruned for you ready to plant. Each tree is then wrapped in a special polyethylene film to hold moisture and keep stock in perfect condition until it reaches you—made doubly sure with another poly-lined kraft wrapping paper. Complete planting directions tagged on each tree. See page 15 for full details.

Now! Strawberries in "Poly" Another Gurney EXTRA

If there is a better way to do it, believe us, Gurney's want to be first.

And now, in shipping strawberries, there is a new improvement and Gurney's are doing it. Your shipments of Gurney strawberries will arrive in polyethylene plastic bags—a further insurance on your having the finest plants in the best condition possible.

Polyethylene not only retains the natural moisture of the plants to prevent their drying out, but, more important, allows the plant to "breathe" while enroute to you. This is most important to any live plant and especially to strawberries.

All From One Packet

Dear Gurney's:

Here's a picture of our little son Joel, 2½ yrs. old, with a sled load of sugar pumpkins we raised from one packet of your seed. They were the finest flavored ones I have tasted and I never saw such large ones either.

Mrs. George Hypes, Poe, West Virginia
P.S. We are well pleased with seeds ordered from you.

All Gurney Nursery Stock is FULLY GUARANTEED

Some nurserymen, lately, have been raising a "hullabaloo" about how they guarantee nursery stock. Well, we've been doing that for over 60 years and certainly thought everybody should, even if they didn't.

With us, it has been satisfaction guaranteed or money back for years. That's the Gurney way of doing business and we wouldn't think of any other way. And, unlike some guarantees full of hedges and half promises Gurney's is plain spoken and in plain English, and we live up to every word of it.

Gurney Nursery Stock GUARANTEE

We guarantee all our nursery stock to be state inspected, free from disease, true to name, and first class in every way.

Examine the nursery stock carefully when you receive it. If you are not pleased with it in every way, return it promptly at our expense and we will replace it at once, or refund your money in full, whichever you prefer.

After you have planted it, if it fails to grow, owing to weather conditions or other factors over which we have no control, we will adjust for those losses once by issuing a credit for one half (50%) of the original purchase price providing your loss is reported to us not later than August 1, 1962.

Women are to blame for most of the lying men do—they insist on asking questions.

Give your friends and neighbors something to talk about—they'll talk anyway.

FOR KIDS ONLY!

Only 1c

This isn't for grown folks. This is for you kids only. It's a giant packet of a little bit of every kind of seed imaginable—both garden seed and flower seed, and we call it our "Giant Jumble Packet." We know you kids can't buy some of everything you want to try, so have rolled 100 different kinds together in one big packet. And it's a big one. Now this must be your own penny. Don't ask anyone for it. And it must come with your folks' order. Just write Gurney's GIANT JUMBLE PACKET on their order and put in your penny. You'll be buying your own complete garden.

Tips For Increasing Your Garden's Yield

Crops Occupying Ground Part of Season Which May Be Followed by Others: Beans (bush), beets, cabbage, carrots, corn, kale, kohlrabi, lettuce, mustard, onions (green), peas, potatoes (early), spinach, turnip (spring), rutabaga (spring).

Crops Which May Follow Others: Beans (bush), beets, cabbage, carrots, corn, celery, lettuce, mustard, late potatoes, rutabaga (fall), spinach, turnips (fall), Chinese cabbage.

Crops Which May Be Used For Inter-planting: (Early, quick-maturing, narrow-spaced) bean (bush), beets (early), carrots (early), lettuce, mustard, onions (sets), peas (early), radish, spinach. (Later, slower-growing, wider-spaced) broccoli, brussels sprouts, corn, cucumber, muskmelons, cabbage, pumpkins, spinach (New Zealand), tomatoes, squash, watermelons.

Crops Which May Be Planted Together in the Same Row: (Quick-germinating and maturing) lettuce (leaf), mustard, radish, spinach. (Slower-germinating and maturing) beets, chard, carrots, leek, spinach (New Zealand), parsley, parsnips, salsify, onions (seed).

Crops Occupying the Ground All of the Growing Season: Beans (Pole, Snap), beans (Pole, Lima), chard (Swiss), cucumbers, eggplant, muskmelon, okra, onions, parsley, parsnip, peppers, sweet potatoes, Irish late potatoes, pumpkins, salsify, squash (winter) spinach (New Zealand), tomatoes, watermelons.

How About This?

We thought you would enjoy seeing this picture of Mrs. Ralph Kleinschmit (Clara) of Yankton. This was one of the finest, firmest and largest heads of cabbage we have ever seen and it weighed over 15 lbs. Clara has been working here at Gurney's for some time and said she always raises a big Gurney garden. You can raise cabbage like this with Gurney's seeds or plants.

Another Satisfied Customer

This picture interested us because the gentleman standing by the apple tree in the above picture is Mr. James E. Gurney. Don't know whether he is a relative of ours or not but he says he had good results from our plants. Mr. & Mrs. James E. Gurney hail from Blue Mountain, Mississippi. We thank them for the picture.

How To Winter-Store Vegetables

Most of the germs that cause decay like a high temperature and a damp poorly ventilated place.

Beets, cabbage, carrots, parsnips, potatoes, salsify and turnips must have enough moisture to keep them from shriveling, and a temperature just above freezing.

Squash and sweet potatoes like a rather warm dry atmosphere. Temperature say 50 or 60 degrees.

As a rule an outdoor cave or cellar is best for root crops.

For squash, onions and sweet potatoes a house cellar will most likely be best.

"Have I ever told you of my grandchild?" one office worker asked another.
"No. And I want you to know how much I appreciate it," the other answered.

Gurney's Potato Eyes are BIG NEWS to Gardeners

If you want your "eyes opened" this year, wait until you see your crop of potatoes from Gurney's New Potato Eyes! Gardeners from every state send here for seed and are amazed at their wonderful results.

Why? The reasons are simple. First, only the very finest, very carefully-selected, certified seed is used. Second, the eyes are very carefully cut by hand to give just the exact right amount of flesh with each eye. Third, each eye is then treated with our specially developed seed treatment to protect against soil borne disease. Then, and this is important, they are scientifically cured and stored so that they are in perfect condition for planting when you receive them.

If you want extra-big crops of extra-fine potatoes that will surprise you and want to avoid the mess of cutting your own seed, treating them and curing them properly, send for Gurney's New Method Potato Eyes. You'll be glad you did. See full descriptions page 2, this book.

(P.S. We like to space them about 12 inches apart in rows 30" to 36" apart).

Gurney's New Hybrids Give You EXTRA Benefits

If you want another pleasant surprise in your garden, don't miss the many new hybrid varieties Gurney's feature for you this year. You'll find these hybrids plainly marked throughout the book. Each one is extra-fine, extra-choice, here's why:

Careful inbreeding of choice parent stock fixes the most desirable characteristics into the plant. Then, after years of this inbreeding, the best parent stocks can be crossed to give all the best and almost none of the bad characteristics to the final cross of F1 hybrid. For example, a drought-resistant parent can be crossed with the heaviest yielding parent to give you the heaviest yielding, most drought resistant tomatoes you've seen.

Hybrids are generally more vigorous and healthy—they dispose of disease. In addition, you will notice great regularity in your planting. Generally, too, hybrids are earlier than their parents giving you the first rewards in your neighborhood.

This year, try at least one or two hybrids. Particularly, we want you to try Sunglow Sweet Corn, Wonder Boy Tomato, Saticoy Hybrid Muskmelon, Surecrop Hybrid Cucumber. You'll be glad you did.

A Garden Plan To Help You Plan

New "SUNGLOW" Hybrid Sweet Corn

Our Best New Hybrid For Eating

179L—It seems like we just can't say enough good things about new "Sunglow." We really didn't realize it was as good as it is until we started hearing from some of our customers we sent samples to last year. They just couldn't say enough good things about it. Such things as, "Best Corn I ever ate," "Never tasted anything like it," "Excellent yield and tops in quality." You'll say these same things about "Sunglow" once you try it. It is early, about a 62 day sweet corn with 6 to 7 inch ears and 12 rows to the ear. Has a delightful golden-yellow color and you can't beat the quality. Pkt. 25c; 1/2 lb. 50c; 1 lb. 85c; 3 lbs. 1.95, postpaid.

"Stu" The Gardener Says...

The world's best eating... that's the way I feel about sweet corn. But, I'm a little finicky about how it's fixed. Best way: have the water at a rolling boil. Drop in ears for 3 minutes (no longer) butter and salt to your taste. The Creator might have been able to make better eating, but he didn't. Our new Sunglow Hybrid is as near perfection as you have found. It is real early.

"Stu" In Trial Ground

Kentucky Bluegrass is still the No. 1 lawn seed. Yes, there are others, too, and we have sold them, but when it comes right down to brass tacks—Kentucky Bluegrass is best. This year South Dakota produced the best seed in the whole country. The New Park Bluegrass from Minnesota promises a lot, but, for the time being, we still say use Kentucky Bluegrass or our famous Capital Mixture.

Flowers are the garden's crowning glory. No garden is complete without them. No excuse for not having them because they are so easy to grow. Zinnias grow anywhere for anyone. I like the large ones. The Giant dahlia-flowered ones are my favorite.

Preventative measures are always more effective than "cures." This is especially true with bugs and insects in the garden. You will have them, that's sure, but if you dust early with Gurney's Bug Dust, you will control them easily. Dust in morning or evening when air is still. Cover under side of leaves. That's where most trouble starts.

One of my favorite winter "fruits" is frozen rhubarb. No trick to freezing—simply cut stalks into half inch pieces and package. Makes wonderful sauce or pie. I like Chipman's Canadian Red, but our Goliath is maybe just a bit more tart.

Are you a melon thumper? Well no more thumping with the new Golden Midget (see the new catalog envelope). It turns a golden yellow OUTSIDE when it's ripe INSIDE. You can't miss. Beautiful red flesh and very sweet, too.

Raising gourds is a fascinating hobby. With them, you can make all sorts of things—bird houses, dippers, lamps, bowls, etc. No pests bother them. Let fruits mature, dry thoroughly, and polish with regular floor wax. They last for years.

Plant a few Tiny Tim tomatoes in your border. They grow about a foot tall and bear loads of small tomatoes. Good to eat and makes a handsome plant. Look nice in porch boxes, too.

Incidentally, Ball Brothers, makers of glass jars, are offering one of the finest books you ever saw on canning and freezing vegetables and meats. It sells for 25c and is worth a lot more. Send a quarter to Ball Blue Book, Dept. G, Box 5, Muncie, Indiana. If you don't think it is your money's worth, return it to us and we will refund the quarter.

HOW DO YOU LIKE IT?

We have been looking over some new seed packet designs for sometime. This year, we are trying one out to see how you like it. You should find one among your garden seeds. You will know it because it is printed in green. It has a picture of a gardener and we think it is a much more attractive packet than the old-fashioned kind.

Not only is this packet more attractive in looks, but you will find it to be sturdier and stronger, too, because the grade of paper is stronger and you will be less likely to have packets broken in the mail.

This is another improvement in the Gurney way of doing business so as to give our customers better service and a better product.

If you have time, you might drop us a line, tell us how you like the new Gurney packet.

Save These Pruning Tips

SHADE TREES—If smaller around than your wrist, you can trim them anytime. If larger, trim only in the winter when the sap is not flowing. Trim in early spring to prevent bad crotches, crossed limbs. Use a good tree paint to protect wound.

FRUIT TREES—Prune early in spring, cutting out bad crotches and to let sunlight in to tree. Don't cut off short spurs from main limb as this bears first fruit.

GRAPES—Prune in the north by cutting back to 3 buds on last year's growth, after the plant is 2 years old; cover with a mulch just before the ground freezes. South of central Iowa and Neb. pruning in Feb. before growth starts is satisfactory.

HYBRID TEA ROSES—Prune long shoots off before winter covering. Prune balance of wood to 8 inches from the ground after removing mulch and just before growth starts in the spring.

SHRUBS—Prune early bloomers like Bridal Wreath, Lilacs, etc., right after they bloom. Later bloomers like Hydrangeas can be pruned in the spring.

HEDGES—Prune several times each season before growth starts in spring—in May and in July. An evergreen hedge should be pruned in late May or June. If you have a straggly hedge, cut it back to within a few inches of the ground, fertilize and it will grow nicely. Always prune top narrower than bottom.

Don't Miss These New Varieties

We are always checking, testing, and trying new plants, and new varieties here at Gurney's. And each year, we pick the very best to add to our complete listings so Gurney customers have the finest.

This year, we've added many new garden and flower seed varieties throughout the book, but we particularly want to call your attention to these below. We think they're extra-fine and deserve your attention.

GOLDEN MIDGET WATERMELON—The melon which tells you when it's ripe. The outside turns bright, golden yellow when it's ripe inside. Flesh red, sweet and tender. Just perfect size for refrigerator. See the catalog envelope.

SUNGLOW HYBRID SWEET CORN—Gurney's specialize in sweet corn and we think this is one of the finest to ever come along. It's very early—60 to 62 days but best of all is its tenderness and sweetness which is unsurpassed and which it holds for a long period of time. We consider it one of the world's early hybrids. See front cover.

NEW SATICOY HYBRID MUSKMELON—Brand new. We have had it in our trials for sometime, but are offering it for the first time this year. Without question the most uniform and best tasting melon in our whole list. See page 11.

BRAVO DIANTHUS—A new dwarf, deep red Dianthus with blooms ALL summer long. Fine for borders and usually winters in mild places with some protection. See page 28.

BUTTER WAX BEAN—It's a long time since we introduced a new wax bean. Truth is, the old varieties were pretty hard to beat. But this one does. You'll find it on the front cover. Don't miss trying it!

Gurney's Recommend These Vegetables as Best for Freezing

SNAP BEANS—Wade, Top Crop.
SNAP BEANS, WAX POD—Butter Wax, Cherokee.
LIMA BEANS—Improved Baby Lima.
CORN—Golden Cross Bantam, Sunglow, Fiesta, Iochief.
GREENS—Swiss Chard, Kale, Spinach.
PEAS—Little Marvel.

MORE NEWS FROM GURNEY CUSTOMERS

Another Satisfied Customer

Mrs. Gordon Krueger of Fond du Lac, Wisconsin sent in this picture of her son in a sweet corn field. Mrs. Krueger writes, "We think your seeds are the best we've planted year after year." She also writes, "Thanks for your prompt service." Incidentally, her oldest son in the picture stands 6 ft. 2 in. tall.

Hardy Dwarf Apples

Yes, you can grow dwarf apples just like the one in the picture. Here you see August Zahn of Dassel, Minn. and a dwarf apple he planted about 5 years ago. It was so loaded with big, luscious, red apples he had to pick some of them off in the spring. They are ideal for small yards.

Beans—and More Beans

Thought you would enjoy this picture of Mr. Henry De Bolt standing in his bean patch. He lives at Fisher, Illinois. Here is part of his letter:

Dear Gurney's: I can say your seeds are all you say they are. Have tried several seeds from different companies and none compare to your seed.

Henry De Bolt, Fisher, Ill.

No, Not A Snake Charmer

This young gentleman is the brother of Laurel Jackson of Hawley, Minn. who raised all the gourds you see from one packet of Gurney's gourd seed. That is a gourd he is holding and it grew to a length of 5 ft. and was 12 inches wide at its widest point. You can grow them too.

How's This For Squash?

Mrs. Sadie Rice of St. Albans, Vermont sent this picture of her husband and some squash raised from Gurney's seeds. (Incidentally, Mr. Rice was born in 1873—Congratulations!) She also wrote that our seeds were o.k. and our glads were all as advertised.

Tall Oklahoma Corn

Well, it's not really Oklahoma corn—it's Gurney's Golden 118B—but it was raised by Mr. R. K. Comstock of the Comstock Lode, Sparks, Oklahoma. Mr. Comstock said it was the best corn, had the biggest yield of any corn he had ever seen. Why don't you try Gurney's Golden Hybrid?

Try This Recipe

Stu's wife "Faye" gave us this one and it beats any we've tried.

Chili Sauce

5 qts. tomatoes—scalded, peeled and cut up
2 cups red peppers
2 cups green peppers } ground
1 1/2 cups onions
3 tablespoons salt
2 teaspoons cinnamon
1 teaspoon cloves
1 1/2 cups sugar
3 cups vinegar
Simmer slowly for 1 1/2 hours or until thickened. Can it hot.

When saving for old age, be sure to save up a few pleasant memories.

Take care of the most important thing you wear—your expression.

Give your friends and neighbors something to talk about—they'll talk anyway.

GROW \$\$\$\$ IN YOUR OWN BACKYARD

Been shopping lately? Tomatoes at 30c a lb.! Onions 10c or 12c lb.! Melons 4c or 5c lb.! Lettuce 25c per head! Really eats up cash fast, doesn't it?

Gurney gardeners avoid much of that. Growing your own groceries is much like growing dollar bills right in your own backyard especially with the prices, downtown like they are. Best part of it is, beside cutting food bills, gardeners also have BETTER-tasting, better quality fruits and vegetables. Fresh picked garden truck has more vitamins, more minerals with nothing lost from long shipping. That kind of food cuts doctor bills, too.

Besides that, gardeners always feel better, look better and generally seem to be happier people. Gardening is good for you, your food is healthier and all the time you save REAL money when you grow your own food.

Put in a big garden this year. We promise you'll be glad that you did!

SOME NURSERY PLANTING TIPS WHICH MAY GIVE YOU IDEAS By Geo. Gurney and Russ Rulon

If you want a QUICK, first-class shade tree, plant Moraine Locust. It grows fast, likes any kind of soil, is hardy and its lacy leaves allow enough light to filter through so that grass, flowers and shrubs do well in its shade.

Cut a few inches off tops of peonies as soon as they are through blooming and they will not rot.

Try planting petunias or other annuals among your tulips just as soon as they are through blooming and you will have an attractive spot all season.

If we could have but one perennial for our garden, we would select the phlox, the showiest of all.

A few currants, gooseberries, Juneberries and asparagus will fit in your backyard landscape and give a world of fruit.

Plant petunias, dwarf Marigolds, Sweet Alyssum, California poppies, Bachelor Buttons, other low-growing annuals among your early-blooming perennials for all summer bloom.

That Meteor cherry is hardy and a heavy producer—it is a wonder.

Climbing roses should be pruned in early summer after blooming to stimulate new growth and new blossom buds for next summer's bloom.

Remember, it is not advisable to keep a strawberry planting much longer than two years. Much better results may be expected if a new planting is made annually.

A home fruit garden's value isn't only the big sum it saves in your food bill. It also gives the beauty of springtime blossom, luxuriant foliage for summer shade, and a quality and flavor in it's tree-ripened fruit you can't match anywhere. You can have this quality all winter by deep-freezing or home canning.

Fast-Acting SOIL SWEETENER A New Approach to Soil Sweetening

4030—This is what you have been looking for to overcome "sour" soil. Soil sweetener acts quick—it doesn't take months like limestone. As you know, all soil sweeteners and fertilizers have to be in a liquid form before the plant can absorb them. Soil Sweetener is applied as a liquid so it goes to work at once. All you need to do is mix with water and apply to soil. 13 oz. can (equals 15 lbs. of limestone) only 1.00, postpaid.

GURNEY'S Extra Fine LAWN SEED

IT'S EASY TO MAKE A GURNEY LAWN

1. First, plow or spade deeply and remove stones, or lumps.
2. Roll area thoroughly to provide a firm seed bed.
3. Sow the seed, using one lb. of lawn seed to every 225 square feet.
4. Rake carefully to work the seed slightly into the soil.
5. Again roll lawn and keep it well watered as moisture is necessary for proper germination.

STUMP REMOVER

Gets Rid of Stumps
Like Magic

4089—Contractors charge up to \$5.00 or more to remove a stump. Now you can remove your own—any tree stump any size, any age, any place, any time, for as little as \$1.65 without chopping, digging, blasting or pulling.

Gurney's Stump Remover is a chemical compound formulated to eat open sap pores in a stump, to honey-comb and decompose it. With pores open, the stump becomes sponge-like, porous—can thus be saturated with kerosene clear to the end of the roots—it will then burn quickly, completely and with a low smoldering flame. Do it the easy way.

Full directions on package. Trial package, 8 oz. (enough to remove one large stump). 1.65, ppd.

INOCULANTS and DISINFECTANTS

Be Sure to Inoculate with NITRAGIN For Peas and Beans

4015—All your garden peas, beans and sweet peas should be inoculated. Inoculation helps the plant to take nitrogen from the air, put it in the soil.

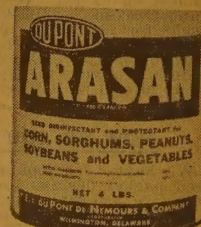

Just takes a minute to dust it on your seed—no trouble at all but it makes a world of difference in your yield.

Enough to inoculate 5 lbs. of seed. Full directions on each packet. Per packet 25c, postpaid.

Use ARASAN

Fight Soil-Borne Disease

4066—Increases stands and yields by reducing losses from seed decay, damp-off and seedling blight caused by seed and soil-borne diseases. Summary field tests showed increased stands of field seed after treatment as follows: Alfalfa 32%; Red Clover 57%; Sudan 41% and misc. grasses 25%. Excellent on all garden seeds too. Play safe with Arasan. 1 oz. pkg. (enough for average garden), 60c; 8 oz. can: 1.75; 2 lb. can 4.45, ppd. (It takes 6 to 8 oz. for 100 lbs. of field seed.)

SEMESAN BEL

4021—For treating potatoes to reduce scab and rhizoctonia, ring rot, bacterial wilt, stem rot, seed-piece decay, etc. 3 oz. treats 10 to 15 bu. seed. 3 oz. can 1.45, postpaid.

Use NITRA-COAT with Nitragin...
5016—This new product makes inoculating all legumes easier than ever. It sticks the inoculant to the seed. You can inoculate your seed two weeks in advance of planting time. Small can (enough for 2 bu. small or 5 bu. large seed) only 50c, postpaid.

SO EASY TO USE

In the past, the trouble with spraying fruit trees has been that you have to buy a lot of different chemicals, get a spray chart and then try to figure out what to mix for each different fruit and time to spray. It was a nuisance and you were apt to get confused and disgusted and figure it wasn't worth the effort.

Now with Gurney's COMBINATION FRUIT SPRAY, you buy just the one package and use it for different fruits at various times during the season. No guessing, no fussing around.

"All Purpose"

TROMBONE SPRAYER

4093—This new Trombone Sprayer can be easily adjusted from a fine mist to a 30 ft. stream. Nothing better for spraying trees, shrubs, livestock, white washing, etc. Can even be used for fire-fighting. Seamless brass cylinder construction with brass intake and plunger. Will develop 180 lbs. pressure and sprays on both in and out strokes. A remarkable sprayer.

DEPEND ON THESE GARDEN AIDS from GURNEY'S

It Always PAYS to SPRAY

The Chemicals listed immediately below, plus Gurney's Bug Dust and Gurney's Combination Fruit Spray, give you the proper weapons to combat all insects and fungi that attack your plants.

Millions of dollars worth of vegetables, fruits, etc. are lost annually because of insects, disease and rodents. It is such an unnecessary loss too. Modern science has discovered new chemical insecticides, fungicides and rodenticides capable of controlling these problems. Here are some of the most effective controls. You can use them with complete confidence.

GLAD DUST

Our Own Formula

INTRODUCING NEW CYLINDRA BEET

IT'S A BEAUTY
Has Perfect Shape

606—Here is a beet that has an entirely different shape than the common type. Just note the picture above and you will understand where it gets its name. This is one of the darkest red beets of any we know. Cylindra grows about 5 inches long and about 1 1/2 to 2 inches in diameter. This makes it a perfect size for slicing before cooking and canning or to use whole. Very smooth skin, small top and excellent quality.

Pkt. 25c; 1 oz. 60c; 1/4 lb. 1.45, ppd.

The Biggest of Them All! GURNEY'S GIANT World's Largest Cabbage

517—Think of it, 20 to 22 lb. heads are just regular size. It often grows heads weighing as much as 35 lbs. It is an excellent variety for making kraut. It shows a very small percentage of waste. I would call it a second main crop variety. The heads are flat and the plants should have plenty of room to grow. Set them at least 3 feet apart in good rich soil. It requires about 105 to 110 days of growing time.

Pkt. 35c; 2 for 59c; 1/2 oz. 75c, ppd.

GLOXINIAS

New and Better Varieties

This gorgeous, tropical, native of Brazil will amaze you with its brilliant velvety blooms. One of our most rewarding house plants. Big 1 1/2 to 2 inch bulbs. Easy to grow and will give you startling displays of flowers. Plant from February to late May and have a succession of bloom.

BG426—STARFIRE. Brilliant velvety red. BG427—EMPEROR FREDERIC. Scarlet with white border.

BG428—EMPEROR WILLIAM. Violet with white border.

Your choice: 59c each; 3 for 1.59; 6 for 2.59, ppd.

BG594X—One each all three Gloxinias above for 1.49; 2 collections 2.49, ppd.

Want Something New and Different? Now! ATOMIC SEEDS

- Irradiated in Atomic Piles to Increase Mutations!
- Giant, Unusual and Dwarf Plants Sometimes Formed!
- A Must for Plant Breeders—Fun & Education for You!
- Perfectly Safe to Handle and Plant!

We don't guarantee you will find a perfect new variety or a giant plant with these seeds, but you might. Many leading plant breeders now use these irradiated seeds in an effort to produce new and improved varieties. Atomic irradiation upsets the cell structure in many cases and, then, produces individuals with new and different characteristics.

In nature only about one plant in ten thousand is "different" or a "mutation"! With irradiated seed, about one in a hundred is "different." This abnormality may affect size of flower, or shape of leaf or size of plant or some other part. Some changes show first season. Some in the next generation. (Save the first year's seed and plant it next spring.)

You may not succeed in producing a worthwhile new variety, but you WILL have fun watching for new developments in these plants. Who knows, you might originate a winner. Remember, these seeds are not radioactive in any way and are perfectly safe to handle and use. Start your own "experiment station."

We offer the following irradiated varieties:

Hybrid Golden Beauty Sweet Corn

187R—One of the earliest. You are more likely to see mutations in the next generation. Watch for variation in ear and stalk size.

Hy-Top Tomato

405R—This is a second generation hybrid but with well fixed characteristics. You should see differences in fruit, size, color and shape.

Top Crop Green Pod Beans

113R—There will, in all probability, be fewer mutations in beans than in some of the others. Watch for difference in pod size, color and color of seed.

Heavenly Rose Petunia

1174R—Normally a large flower with clear pink

blooms. Watch for a variation in color and in number of blooms per plant.

Petite Marigold

1142R—This little border marigold is very uniform and free blooming with double golden yellow flowers. Watch for variations in blooms and larger plants.

Crimson Monarch Zinnia

1267R—This one normally has large dahlia-like blooms of deep crimson. Watch for a variation of bloom shape as well as color.

(Save seed from all for next season's planting.)

Price: Your choice 1.00 per packet.

3300XR—Irradiated seed collection, 1 packet each of all 6 kinds for 2.50, ppd.

GURNEY SEED & NURSERY CO., Yankton, S. D.

CHEROKEE CHIEF

The New Dogwood With Deep Red Flowers

A3823—(Plant Patent No. 1710). Reddest flower-standing of all the new Dogwoods. Beautiful deep red color shading to green with early. Hardy, but needs good winter protection in the north. (Grows to 15 ft.) 2 ft. plants 3.49 each; 3 ft. plants for 4.89 each, postpaid.

New California BLUEBELL

Loads Itself With Flowers

1006—(Phacelia).

This lovely annual grows 8 to 12 inches tall. It is a native of the southern California deserts and thrives in hot dry places, so it will adapt where conditions are "tough!" It smothers itself with gentian-blue, bell-shaped flowers throughout the season. The more you pick them, the better they bloom. Makes a fine pot plant but is at its best out in the garden in the border.

Pkt. 35c; 3 for 1.00, ppd.

New! Hardy!

EXOTIC BAMBOO

Different and Decorative

That's right. The same kinds grown in Asia. Contrary to what many think, some types are extremely hardy and have lived thru 20 degrees below zero temperatures. Tops freeze but roots survive. We offer well started plants:

C2468—Tall Outdoor Bamboo. Graceful canes hold foliage a long time.

C2469—Outdoor Pygmy Bamboo. Used more as a ground cover. Tops 1 to 2 ft. tall.

C2470—Indoor Tall Bamboo. Beautiful yellow-green canes. Feathery foliage. 6 ft. tall. Grows indoors. Your choice of above—2.98 each; 2 for 4.98 ppd.

C3601X—One each all three above for 8.39, ppd.

Royal Purple Fringe

SMOKE TREE

Beautiful Purple Leaf Shrub

A3905—(Rhus Cotinus). Rich, purple leaves all season with feathery purple flowers appearing in mid-summer adding a smoky effect, make this the most outstanding shrub we have ever seen. Very striking planted as a specimen shrub, but especially eye-catching with a common green shrub background. Grows 6 to 8 feet tall, and prefers a sunny location. Royal Purple will add that colorful touch to any garden planting and make a real spot of beauty. Not recommended for planting north of central-Iowa and northern-Nebraska, but we think it's worth trying farther north with good mulching and winter protection. Our large, husky plants are extra nice and full of hidden beauty.

New BROWNIE SCOUT MARIGOLD

Official Brownie Scout Flower

1141—This little beauty has been selected as the official flower of the Brownie Scouts in commemoration of their Fiftyth Anniversary.

Being a dwarf, it grows only 6 to 8 inches tall. Flowers are fully double, the center crest is brownish-mahogany. Outer petals golden orange. Very free bloomer.

35c per pkt.; 3 for 1.00, postpaid.

Now! HYBRID CALLA LILIES

A New Color Break

BG403—These hybrid Calla Lilies are all crosses involving the yellow, the pink and the white varieties. The resultant hybrids produce a great variety of color; however, most of them will be shades of pink, apricot and light orange. This is a vast improvement over the old white ones, most of you are familiar with. They are unusual to say the least and we think are something you Calla fans should get acquainted with. These were originated by one of the finest American plant breeders. Our supply is limited.

50c each; 3 for 1.25; 6 for 2.25, ppd.

PIN OAK

—The Majestic Beauty

A4300—(Quercus Palustris). Considered by landscape experts to be one of the country's finest trees for avenue, lawn and specimen planting. Pin Oak is long-lived, reasonably rapid-growing and will give years of permanent shade. Has dark green leaves that turn a glorious red in the fall, adding greater autumn beauty to any planting. Its beautiful symmetrical shape often pyramids up 70

4 to 5 ft. size 3.98 each; 2 for 7.69 ppd.

Now—Grow Your Own BABY ROSES FROM SEED

It's Interesting and Easy to Do

1009—Now you can grow baby roses from seed easily. Seed germinates in three weeks. The plants will flower in three months. Plants bloom very freely. They will cover with an abundance of fragrant blooms in various shades of pink, rose and white. Most of the flowers are semi-double. Dwarf in growing habit. Grows about a foot tall. They stood over winter here in Yankton with no protection. The thermometer went to 18 below zero. Is a very attractive dwarf hedging plant.

35c PKT. 3 for 1.00 ALL or 5 for 1.50 PPD.

GOLD DROP SHRUB

Has Fernlike Foliage

A3889—(Potentilla). Gives a profusion of bright, golden yellow flowers from June to October. A most attractive bush 2 feet tall with small fern-like foliage. Prefers full sun and is extremely hardy. One of the finest of all the new shrubs.

Selected 12 to 15 in. plants, 1.49 each; 2 for 2.89, postpaid.

NEW "BRAVO" Dianthus A 1961 "All-America" Medal Winner

1203—A new and brilliant scarlet red color. Blooms are fringed—1 1/2 inch to 2 inches across. Carries well above foliage. An ideal landscape plant and makes wonderful cut flowers. Plants are dwarf yet very upright and compact which makes them ideal for edging and borders. Height about 8 inches. Blooming period throughout the summer and fall.

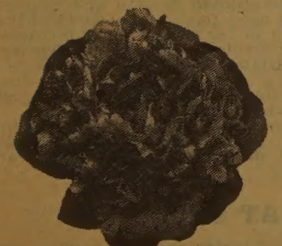

Pkt. 35c; 3 for 1.00, postpaid.

New KANSAS PEONY The Giant Red One

B1528—A National Peony Show winner. Has bright red flowers held high on strong stems like soldiers. The fully double blossoms are strikingly beautiful against the clean, dark green foliage which is always so healthy and fresh looking. This is one of George Gurney's favorites and you'll like it too.

Big 3-5 eye division, each 2.98; 3 for 7.98, postpaid.

New—Stately—Upright SUMMIT ASH

The Perfect Shaped Tree
A4203—The beautiful shiny leaf and perfect shape make this one of the finest new shade trees. Considered the most perfect shaped tree we have ever seen. You'll like its semi-upright tendency and uniform growth habits, which make it an ideal specimen tree for yard or street planting. Outstanding for its straight trunk.

TREE SAVERS

GRAFTEX

Grafting Wax
Protects Wounds

5000—Here is a product of many uses. Originally devised as a grafting wax. Graftex has been found to be ideally suited for the dressing of plant wounds and breaks of every type.

Always ready for instant use—no mixing, no preparation is needed. It adheres perfectly even to wet surfaces. Stops bleeding of wounds. It does not dry out or crack and will conform to the stretching and bending of plant growth. 1/2 lb. can only 1.39; 5 lb. can 4.95, postpaid.

PRUNING PAINT AEROSOL BOMB

Use After Pruning

5065—Thousands of valuable trees are lost annually because folks just won't protect the wound after a limb has been removed by pruning. Moisture gets in—rot starts—and so do your troubles. You can play safe and avoid all this with Pruning Paint.

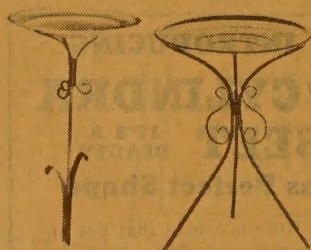

Just hold the aerosol bomb 10 inches from the wound and push the button. Gives real protection. 5 oz. bomb 1.00; 2 for 1.85, ppd.

WATER TIMER

Saves Time and Saves Money

4080—The new B-Line Water Timer. Makes your lawn sprinkler automatic (like the timer on your stove). All you need to do is attach it between the sill-cock and hose. Set for the desired length of time. It shuts off positively and at the exact time. Lets you forget about "turning off the water." You can do something else and then come back and move the sprinkler when you get around to it. Everyone that has a lawn and does any sprinkling should have one of these time and money saving B-Line water timers. Only 9.95, postpaid, to your mailbox.

New WATER BUBBLER

No Washing Even Under Full Pressure

4090—Saves work. Saves water. You can water deep and fast without washing. With this attached to the garden hose, just turn on as much pressure as you like and leave it. That's all you have to do for a thorough job of watering. For flower beds, trees, shrubs and lawn. Does away with wet foliage. Made of durable aluminum. Will last a lifetime as there are no moving parts to wear out. Only 1.79, postpaid.

The Miracle FLORAGARDE No More Guessing About Watering

5004—Shows you when to water your indoor plants. Just make a little hole in the soil with a pencil. Put the pointed end of the Floragarde into the soil. The indicator will show when the plant needs water. When it turns pink, there is plenty of moisture present. When the Floragarde turns blue, it is time to water. Buy several—they are cheap. Take the guessing out of your watering problems. 7 Floragardes for 1.00, postpaid.

New Multi-Purpose FLEXI-SPRAY

Puts The Water Where You Want It

4047—A new idea in lawn sprinklers. Won't spray into house, driveway, walks or on cars. Put the water where you want it without waste. Works accurately with small amounts of seed. Adjusts easily for different kinds. Use to "side dress" with fertilizer. 4.98, postpaid.

Finest PRUNING SHEARS We Use The Same In Our Nursery

The very finest pruning shears obtainable. Nothing is more aggravating than a dull, useless, cheap pair of shears that will hardly cut. A poor pair of shears does not do a clean job of cutting which is so important for quick healing.

These are the very same shears we use right here at Yankton in the nursery. We know they're good. Long lasting.

5001—Best quality 7" shear with security plate for precision adjustment only 2.89 each, postpaid.

5002—Good quality 7" shear. Light weight but well finished only 1.98, ppd.

Famous Reddick MOLE TRAP Really Gets Them

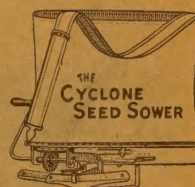

5058—The best mole trap we have found. Simple to set. Sure fire. Press the soil down over the mole's run. Set trap directly straddle of it. When mole pushes soil up, it releases the tines and you have your mole. It works. 3.85 each; 2 for 5.98, postpaid.

CYCLONE SEEDER The Perfect Hand Seeder

4082—Ideal for sowing clover, timothy, alfalfa, lespedeza, sudan grass, oats, wheat or any seed that can be broadcast. Does a fine job of sowing lawn seed too.

Strongly constructed with double feed insuring a uniform flow of seed. Feed adjustment is automatic and starts or stops flow of seed instantly. Each 4.95, ppd.

King Size SWEEP RAKE Does More—Easier

5038—Made of light weight aluminum. Weighs no more than a small rake but is 44 inches wide and will cover four times the ground. Gold anodized handle and branches. Rubber grip. Steel tines. Only 10.25, postpaid.

Sweet Corn "KERNEL KUTTER" Strips Kernels Off Ear With One Stroke

4046—Enjoy sweet corn fresh off the cob. Perfect for deep freezing, cooking and creaming. Gives you clean, whole kernels, none mashed or crushed and no cob particles. The quickest, easiest way to get corn off the cob we know of. Gurney's Better-Bred BABY CHICKS

ALL U.S. APPROVED, U.S. PULLORUM and TYPHOID CLEAN

**FINEST CHICKS
THAT MONEY
CAN BUY
ANYWHERE AT
ANY PRICE**

HERE IS WHERE GURNEY'S BETTER BRED CHICKS ARE HATCHED

All Farm Bred for Extra Vigor—Gurney's chicks come from farm-bred flocks which are carefully supervised by our hatcherymen. Our hatching eggs are produced right on the farm to give you better, healthier, hardier chicks. Don't waste time and feed on chicks of doubtful origin. This year insist on Gurney's U.S. Approved and U.S. Pullorum and Typhoid Clean high-producing strains. They are the only chicks you should raise on your farm if you want bigger poultry profits at less cost to you.

ALL GURNEY CHICKS ARE GUARANTEED

100% SAFE ARRIVAL

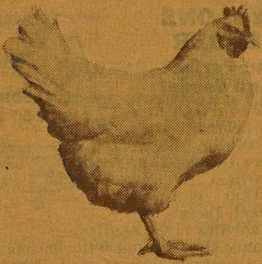

We guarantee 100% live delivery on all Gurney chicks. Furthermore, we guarantee our prices will be lower, quality considered, than others. All baby chicks must be exactly as represented in grade and breed offered.

Extra chicks are included in each box, so when chicks arrive count the live ones. If you do not have as many live chicks as you ordered, or if any of them are in bad condition, simply have your delivery agent sign a statement and mail to us within 24 hours. We will replace them FREE!

95% TRUE TO SEX

We guarantee our pullets to be ninety-five per cent true to sex. If more than five percent are males, we will make an adjustment on all over five per cent not true to sex, to apply both to cross breed and pure breeds.

All sex complaints must be made within 60 days from the date chicks are received. In case of complaint, proper forms will be sent you. In no case are we liable for more than the original purchase price of the chicks ordered. We reserve the right to ship straight run on heavy cockerel orders if necessary.

WHITE LEGHORNS

H20—The favorite for egg production. These are the large type (not beefy). Full of vigor and great rustlers. We have worked years to perfect this better laying strain of White Leghorn. These extra eggs mean extra profits for YOU! Get the best. Get Gurney's White Leghorns.

LEG-ROCK CROSS

H30—Combines many of the best points of both the breeds we cross to make them... White Leghorns and White Rocks. Have the egg laying ability of the Leghorns, plus the size of the Rocks. Lay early and mature rapidly. Very disease resistant. Easy to raise.

AUSTRA-WHITES

H40—This famous cross combines the champion egg layer of Australia, with American Champion, the White Leghorn. Pullets give heavy egg production, and males weigh from 7 to 8 pounds. You'll want your whole flock to be this profitable breed next year!

HAMP-LEGS

H50—By crossing New Hamp with our best White Leghorn pullets, we offer you a combination of the best of both breeds. This cross gives you lots of eggs plus a fast feathering, fast developing meat bird. Fast becoming a favorite.

NEW HAMPSHIRE

H60—Gurney's New Hamps are noted for vigor and hardiness. You can't beat them for heavy egg production or meat. Mature rapidly and their large brown eggs always bring a premium. You'll be happy with Gurney's New Hampshires.

Gurney's "G.L." No. 1

Our Finest Egg Producer

H10—Here is the chick you have been waiting for. Heavy producer of large white eggs. Bred especially to stand up under heavy egg production all year. Compare with chicks selling at twice the price. Since we introduced this fine, new type, our customers just can't say enough about its good points. We believe you'll agree, too, that Gurney's "G.L." No. 1 chicks have no equal.

WHITE WYANDOTTES

H70—These deep-breasted birds are among the first to go to market. They make excellent broilers. Will reach 2 to 3 pounds quicker than almost any other breed. Good rustlers... easy to raise... mature rapidly. A truly fine meat breed.

S.C. Rhode Island Red

H80—If you are looking for a real utility chicken you'll choose wisely in selecting this fine breed. Large, brown eggs that command a premium price. If you have never tried S. C. Rhode Island Reds... give them a chance to make money for you.

RED-LEG

H90—Now, a cross between the finest blood line Rhode Island Reds and Special mating strain of White Leghorn Pullets. Fine for broilers and exceptionally high-egg production. A true dual-purpose chicken that is bound to please.

WHITE ROCKS

H100—Our "Giant Type" have beautiful snow-white plumage. They will dress out at almost any age, yellow colored and free of pin feathers. Excellent for broiler purposes. One of the most popular all-purpose breeds, combining good egg production with fine quality meat.

"FRY PAN" SPECIAL Our Largest Selling Chick Offer

H150—Now, you can have enough chicken to feed the neighborhood or fill the freezer. All healthy, strong, high quality chicks. Can't guarantee sex or breed, but do guarantee 100% safe arrival.

HOW TO ORDER

Every year many people make the mistake of ordering their chicks too late. The result is, very often, they cannot get the breed they want, the grade they want, or even the delivery date they want. It is just as easy to order early and not take this chance, beside that, early orders save money. Be sure and make a second choice.

About C.O.D.'s

If you do not want to pay for your order in full, just send \$1.00 per 100 down payment for the chicks you want and then send the balance 10 days before the delivery date you specify—no discount under these terms. On C.O.D. shipments for the balance due, you pay the postage and C.O.D. charges.

Orders for less than 100 chicks—add 2c per chick extra.

SAVE \$1.00 per 100 chicks

If you place your order and send payment in full before March 15th you may deduct \$1.00 per 100 on all chicks except light cockerels and Fry Pan Special—we will deliver chicks the date you specify.

It Costs Less to Feed Gurney Chicks

It costs no more to feed a high-producing chick than it does to feed a "scrub!" This often means the difference between profit and loss. Why waste that valuable feed? Play Safe! Be Sure! Order chicks you can depend on—it's Gurney's Chicks for high egg production with a minimum feed cost. They are all U. S. Approved, U. S. Pullorum and Typhoid Clean—hatched under the direct supervision of the National Poultry Improvement plan for your protection.

You Can SAVE \$3⁰⁰ per Bu. and PLANT THE FINEST! GURNEY'S GOLDEN HYBRID SEED CORN

As Good As The BEST and BETTER THAN MOST

Buy Direct and SAVE!

Ever stop to think about how much extra it is costing you when you do not buy your corn direct? After all salesmen are an expensive method of selling and YOU PAY FOR IT. Why not pocket that \$2.50 to \$3.50 yourself? Thousands of farmers have found they can do just that and still plant corn equal to any on the market. They do it by ordering Gurney's Golden Hybrid. Why don't you save, too?

As Good As The Best

We think no one is justified in claiming to have the best corn on the market so we don't claim it. We do know our corn is as good and will hold its own in competition with any other brand. Year in and year out it will be on top as often as any other single variety. Because we eliminate commissions, Gurney's Golden Hybrids sell for \$2.50 to \$3.50 per bushel less. This is a solid fact—not just a claim.

IMPORTANT NOTICE

Descriptive information on No. 112 and 116 has been omitted in order to make room for the following explanation on shipping charges. These two numbers are available at the same price as the other numbers listed.

Due to the minimum charges assessed by railroads and truck lines, the cost of shipping a single bushel of corn

is exorbitant. The only remedy for this is orders for sufficient number of bushels to approach the minimum. Often a person wants only a bushel or two to try in his vicinity. However, there is usually a neighbor or two that would like to try a bushel or more, and when this is the case, combining the orders in one shipment will bring the transportation cost within a reasonable figure. Here are a couple of examples:

The minimum to Wilmar, Minnesota by rail is \$4.00 and the rates is \$1.35 per 100 lbs. You can ship 5 bushels and 16 lbs. for the same cost as a single bushel, or a little less than 80c per bushel.

In South Dakota, a shipment to Redfield by rail carries a minimum charge of \$2.04 and a rate of 93c per 100 lbs. Here you could ship about 4 bushels for about the same price as one and at a cost of slightly over 50c per bushel.

The cost of truck shipment usually runs slightly higher than freight, depending on the number of lines handling the shipments. We would be glad to check and furnish exact shipping cost to any station on request.

Save Even More

If you live within driving distance of Yankton; drive in and pick up the corn and field seed that you need. You can pay for your gas and oil and make a substantial saving above this cost as many other customers are now doing.

HERE IS THE ANSWER

When you buy from an agent you must pay \$2.50 to \$3.50 per bushel extra just for his services. We believe you can find plenty of other places to use that money to better advantage, so why not try Gurney's Golden Hybrid.

GURNEY'S GOLDEN 80
(80 to 84 Days)

D80—This is our earliest hybrid and a new one you will like. It is a yellow dent, a very fine yielder for one so early and stands up well. A good one for the corn growing areas of North Dakota and Montana. Recommended, too, for northern Minnesota and high altitudes in Wyoming and Colorado. If you need a good early corn try Gurney's Golden 80.

GURNEY'S GOLDEN 85
(83 to 86 Days)

D85—Another very early yellow dent hybrid. A shade later and larger than our 80. It requires a little longer season but will usually produce a little more because it is a little bigger. Recommended for Montana, North Dakota, northern Minnesota and northern South Dakota, in fact any place where a real early corn with good yielding ability is needed.

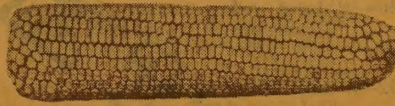

GURNEY'S GOLDEN 90
(88 to 92 Days)

D90—This is one of our oldest and most reliable numbers. It needs a little longer season than our 85 but is larger and can produce a little heavier when conditions are right. This is a good one for north-central South Dakota, north-central Minnesota and similar climates. This number has high yield and feeding value for an early corn.

GURNEY'S GOLDEN 95
(93 to 96 Days)

D95—The heaviest producer of our four real early numbers but takes a little more time to mature. Ears good size—inclined towards roughness. Good feeding quality. A good one for central-Minnesota and similar climates. It has done well in South Dakota in such counties as Faulk, Clark, Grant, Hamlin and Kingsbury.

GURNEY'S GOLDEN 100
(100 to 103 Days)

D100—This number will surprise you by its producing ability for corn this early. Ears are very uniform and run 7 to 9 inches. Stands very well and ears stay on. In South Dakota it has done well in such counties as Beadle, Kingsbury, Brookings, Jerauld, Sanborn, Miner, Lake Moody and Hamlin. In Minnesota it has done well in such counties as Lincoln, Renville, Carver, Redwood, Pipestone and Murray. A good one most anywhere in central-Minnesota and northern-Iowa.

GURNEY'S GOLDEN 100A
(100 to 103 Days)

D100A—We are offering this new number as a possible improvement on our regular 100, principally because it has a deeper kernel. In maturity, standability and other all-around performance it appears to be equal to our 100. We recommend that those who have been planting 100 try some of this promising new number. We know you won't be disappointed.

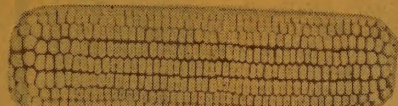

GURNEY'S GOLDEN 104
(103 to 106 Days)

D104—We introduced this number in 1956 and it has continued to build up sales and make friends for us. In fact, demand has exceeded supply for the past two years. We hope to have sufficient production to supply the demand this year.

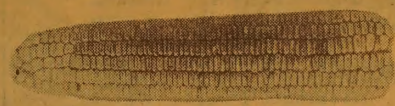

This number has been outstanding north of Highway 16 and has given satisfactory results as far north as Wheaton, Minnesota.

An exceptionally big heavy stalked corn for one as early as it is, with a medium sized large girth ear with deep kernels. One of the highest shelling percentage corns in our line.

GURNEY'S GOLDEN 104A
(105 to 109 Days)

D104A—A new number of high performance. A few days later than our 104. Pure yellow ears normally 8 to 10 inches. High in yield, has stiff stalks and ears stay on. Adapted to northern-Iowa, southern-Minnesota and the Sioux Falls, Mitchell and Madison areas in South Dakota. This is one of our finest medium-early corns and we know it will do the job for you.

GURNEY'S GOLDEN 105A
(104 to 108 Days)

D105A—Here is a new number that is 3 to 5 days earlier than the old 105. Pure yellow ears 8 to 10 inches long which form on a heavy stalk around 3 feet from the ground. This should make an excellent main crop corn in the tier of counties north of Highway 16 in South Dakota. You'll get more bushels per acre where you can grow this number.

GURNEY'S GOLDEN 107
(109 to 113 Days)

D107—This new hybrid has an excellent stalk and root system plus beautiful dark green foliage that stays green while the ears ripen. Nice ears normally 9 to 11 inches. High in corn borer tolerance and drought resistant. Maturity between our 104A and 110. Folks who have raised this number like it fine and we know you will like it too.

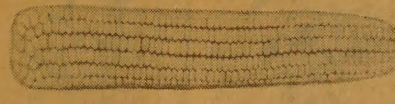

GURNEY'S GOLDEN 110
(110 to 114 Days)

D110—A late addition to our line, and one which has become very popular. It is a very close relative to our 118A, but is slightly earlier. The ears are slightly rough, cylindrical, normally 9 to 11 inches and have the same orange tint as 118A. Stiff stalks and ears stay on. Adapted to same general area as our 112 and 118A.

GURNEY'S GOLDEN 118A
(112 to 116 Days)

D118A—This is one of our newer numbers and during the last four years it has become our biggest seller. It is a toughie, will take a lot of punishment. Has everything—high yield and feeding quality, with excellent standability and ears that stay on. Ears normally 9 to 11 inches, slightly rough, with an orange tint. This number is making us a lot of friends.

GURNEY'S GOLDEN 118B
(113 to 117 Days)

D118B—A new number that promises to be outstanding. Bright yellow ears normally 9 to 11 inches long. Exceptionally stiff stalk with ears that stay on and ripen while the stalk stays green until frost. Highly resistant to corn borer and diseases. A good picking, top yielder. Tall stalks with lots of foliage so excellent for silage.

OPEN POLLINATED SEED CORN from Gurney's

All Real Crib Fillers

For over 50 years, Gurney's have been specialists in open-pollinated seed corn and Gurney's is where farmers send for "bin-busting" strains.

All seed is from the finest open-pollinated strains, carefully picked before cold weather, dried in our huge drier to insure perfect germination. All carefully graded to insure an easy, perfect planting job for you.

MINNESOTA 13

D10—This well-known variety has been popular for many years with good reason. Excellent yielder for its maturity. Ears orange yellow—normally 8 to 9 inches. Grows 6 or 7 feet tall. In South Dakota does well in such counties as Beadle, Kingsbury, Clark, Hamlin and similar areas. Also a favorite in south-central Minnesota. Price: 3.95 Per Bu., F.O.B. Yankton.

Gurney's RAINBOW FLINT

D30—Gurney's "Tall" RAINBOW FLINT. We originated this corn in 1915. Stalks 7 to 8 ft. tall with 10 to 12 inch ears. Heavy stalks and leafy clear to the ground. Heavy yielder. Highly drouth-resistant. Excellent for fodder or hogging-off. Widely adapted and can be successfully grown as fodder at the Canadian line. Price: 5.50 Per Bu., F.O.B. Yankton.

Gurney's AUGUST 15th

D40—(Fine for machine picking). Here's an open-pollinated corn that we are proud of. Our own development for those who need EARLY CORN. Plant it by mid-May and you can generally husk it by August 15th. If the early Hybrids have been giving you trouble—try August 15th—IT'S A CINCH: Price: 4.95 Per Bu., F.O.B. Yankton.

Gurney's SILVER KING

D50—This is the open pollinated white corn that makes real profits. Loads of big, beautiful, white ears often 8 to 12 inches long. They generally bring a nice premium too. Fine for central to southern South Dakota and like areas. Will really give the Hybrids a "run" for their money. Price: 3.95 Per Bu., F.O.B. Yankton.

FIELD SEEDS from Gurney's

SATISFACTION GUARANTEED

We absolutely guarantee our seed to arrive in a satisfactory condition. You have 30 days to test it in any way you like or send sample for state test if desired. Gurney's HARDY PEONIES

ILLUSTRATED
AT RIGHT

The origin of the peony is lost in antiquity. Poets have sung of its fragrant beauty since the dawn of history. It has come down to us through the ages as a symbol of perfection each year adding to its beauty. Peonies are the easiest satisfied of all perennials as to soil and culture. They thrive practically anywhere that drainage is good. Don't be without them.

PEONY PRICES:

1.29 each; 3 for 3.49, postpaid, except where noted otherwise.

B1552—PHILIPPE RIVOIRE. A fine, fragrant, bright, crimson red. Regarded by many as the finest red. Blooms early. 1.59 each; 2 for 3.49, postpaid.

B1530—KARL ROSENFELD. A tall, compact, heavy-blooming semi-double type. Dark velvety crimson.

B1560—SARAH BERNHARDT. Considered by peony experts to be one of the

finest. Petals are long and pointed, the outer ones being rose pink and the inner petals form a full, fluffy center of pale shell pink. A very showy mid-season. 1.49 each; 3 for 3.95, ppd.

B1517—FELIX CROSSE. Rose type. Late mid-season. Flowers are dazzling ruby-red.

B1522—FRANCES WILLARD. Opens bluish-white, changing to pure white. Has occasional carmine touch. Large, perfectly formed flower, a strong grower and free blooming. Semi-rose type.

B1550—MARTHA BULLOCH. A bright old-rose pink and one of the finest. Cupped, rose type flowers often up to 9 to 12 inches across. Strong stems.

B1568—WALTER FAXON. A uniform bright rose, deepening toward center. A delicate and distinct color that you will admire. Semi-rose type, globular type blooms.

B1520—FESTIVA MAXIMA. One of the old timers but still one of the best. Its growth and blooming qualities make it one of the most reliable whites.

MARY BRAND

B1537—One of the very best of all the dark reds. A large, rose-type flower with a beautiful sheen. Excellent for cutting. See peony prices at right.

MODELEPERFECTION

B1539—A large double, light old-rose becoming darker toward a high widespread center. Free blooming on long stems. See peony prices at right.

Gurney's HARDY PERENNIALS

You get more for your money when you plant perennials because they cost so little and bloom year after year, usually getting larger and more beautiful as they get older. Easy to grow and give lots of flowers early and late.

HOW TALL DO THEY GROW?

We have separated all of our perennials into 3 groups. Low, medium and tall growing. This makes it easier for you to plan your flower bed. Use low growers in front, tall in the background and medium growers between.

Gurney's GREEN THUMB Collection of HARDY PERENNIALS

B3286X—Here are five hardy, beautiful, sure-to-grow perennials—the kind that will do well for you this year and for years to come. They are worth at least twice this much sold separately.

Gurney's HARDY PHLOX

PHLOX PRICES: 69c EACH; 3 FOR 1.69 ALL POSTPAID

Choose From the Following:
B1607—Chieftain. A new one of very unusual color. It is a sparkling ruby color you are bound to like. Very strong grower.
B1662—Royal Purple. Compact flower heads make this dark, violet-blue a real eye-

catcher. Everyone likes it.
B1609—Daily Sketch. Probably the biggest and best of the pinks.
B1666—White Admiral. A new, very large, pure white, glistening like newly fallen snow. Very fragrant.
B1615—Flash. This one is so beautiful we think it a leader. A bright, showy rosy-red.
B1655—Progress. Nearest

true blue of all phlox and still scarce. Has very large flowers.
B1623—Hauptman Koehl. Large, brilliant blood-red.
B1608—Cinderella. A self-colored pink with small dark eye.
B1602—American Beauty. A beautiful deep rose-pink, with large flower heads on tall, strong stems. You'll like this All-American Beauty.

with bright red eyes.
B1628—Jules Sandeau. One of the best of all phlox. Large orange-red flowers borne on large panicles.
B1651—Polka Dot. Has huge white flowers, each with a brilliant carmine eye.
B1661—Sir John Falstaff. A new English phlox with giant trusses of luminous salmon-pink.

PLANT PHLOX for BEAUTY

Phlox is a perennial flower that offers you almost any color you want, including shades of blue, plus some which are bi-colored. All of Gurney's phlox are the new, larger-flowered varieties.
Phlox like full sun, but do well in partial shade. Phlox grow from 18 to 36" high, and bloom in Aug. and Sept. Hardy and do well in any ordinary soil. After blooming, remove flowers.

Gurney's HARDY CHRYSANTHEMUMS

Why Gurney's Chrysanthemums Are TWO WAYS BETTER

Old Method

New Method

1. They are grown individually in pots (see illustrations above). They are not field-grown plants dug last fall and stored through the winter. Our pot-grown ones are fresh and vigorous.
2. Gurney's chrysanthemums are grown and shipped in special pre-fertilized moss. Dirt-grown mums often arrive in your hands in bad shape. Gurney's moss-grown and moss-shipped plants stay healthy, alive, sound-limbed, do not break in shipment.

CHRYSANTHEMUM PRICES

Your Choice (alike or assorted) 79c each; 3 for 1.98, All postpaid.

MINN AUTUMN

B1485—A new 1962 Minn. introduction. Vigorous, cushion type, with deep reddish-bronze, 2½ inch flowers. Healthy, dark green foliage. Grows 12 to 15 in. high, and spreads 30 to 36 in. in full sun. Blooms about the first of September.

CORTIS RICE

B1461—A new rich golden yellow with long stems fine for cutting. Outer petals reflexed, dimpled and ruffled. Finest early yellow mum.

WHITE CLOUD

B1471—This is our finest pure white mum. Makes a bushy plant about 30 inches tall completely covered with large double white flowers.

GEORGE LUXTON

B1420—An extremely early fully double 3½" flower of a soft bronze. Makes an excellent plant with base branching fine for cutting.

PURPLE WATERS

B1440—A very good all-around rich purple mum with extra large flowers. Fully double and long lasting, too.

ADORABLE

B1413—The pinkest mum of all! A clear, brilliant, rose-pink that produces lots of flowers. An excellent cut flower. We believe this is the best pink so far!

EARLY HARVEST

B1487—A mass of charming mahogany-orange flowers. Grows to about 16", giving a mass of color from early Sept. on. A superior cushion mum.

AUTUMN BEAUTY

B1401—A new brilliant sparkling reddish chestnut mum that is considered to be the best of the early bronze.

DR. L. E. LONGLEY

B1419—One of the finest and earliest blooming of all mums. From late August until it freezes a mass of beauty. The bright, pink-lavender flowers in profusion create a mound of color. George says this is one of his favorites.

LUXTON'S RED

B1464—A dark red bud sport of the favorite mum—George Luxton. Extremely early, fully double. Excellent for cutting.

WAYZATA

B1467—The bright, bronze-tinged buds open into 3 inch decorative type, gorgeous blooms. Early flowering and good cutting stems. U. of Minn. introduction.

GOLDEN SUNSET

B1417—Its large, burnished copper flowers with ruby-red centers almost completely cover the bushy plants from mid-September on. One of the most showy of all mums.

Hardy *Evergreens* from Gurney's

HOW WE SHIP—All evergreens listed here are hardy, and all sizes offered as "B&B" or "RW" have been transplanted three times to make compact, heavy root systems. These strong, well-rooted specimens will grow better for you, and, when you order two evergreens of a kind, we will pick out matched trees so your planting will look better.

B&B Means Balled & Burlapped—All evergreens listed as "B&B" are well-shaped specimen trees dug with their roots still in a solid ball of rich earth, just as they have been growing in the nursery. This ball of earth is carefully wrapped in burlap and bound with twine to keep it from breaking. This is the best way to buy evergreens, but they average from 60 to 100 pounds per tree and must be shipped Not Prepaid.

R.W. Means Root-Wrapped—All evergreens listed "RW" are freshly dug specimen trees. The roots are "puddled" in mud as soon as dug and each tree is individually wrapped in wet moss to make sure they reach you in good growing condition. These trees are well-shaped specimens that will enable you to beautify your home grounds at a very low price.

**NO OTHER TREE CAN MATCH
THE HYBRID ELM'S FEATURES**

- 1. EXTREMELY FAST GROWTH**
Imagine a growth of from 8 to 14 ft. in just one short growing season. This isn't uncommon at all. You really get shade in a hurry with Gurney's Hybrid Elm.
- 2. DISEASE RESISTANT**
Gurney's Hybrid Elms have never been known to be bothered by the dreaded Dutch Elm Disease. This is important to all planters everywhere.
- 3. HARDWOOD—LONG LIFE**
Many believe, because the Hybrid Elm grows so fast, it is a soft wood tree. This is not true. Not only are Gurney's Hybrid Elms a hardwood tree but they are long-lived too.
- 4. HANDSOME SHAPE**
One of the outstanding features of Gurney's amazing Hybrid Elm is its beautiful shape. It grows as symmetrical as any deciduous shade tree we have ever seen.
- 5. FILTERED SHADE**
This is important if you expect to raise a nice lawn beneath your shade tree. The Hybrid Elm has a large leaf yet it is not so dense that the sun can't get through to the grass.

Actually grows 8 to 14 ft. per year!

LOMBARDY POPLAR

"Harlequin" has leaves with beautiful green centers and ivory colored edges. It's sensational!

"Harlequin" Variegated Maple

**A New Standard of Beauty
In Shade Trees**

A4284—Harlequin. In our opinion, is the most beautiful shade tree in existence today. It is a Norway Maple with a variegated leaf. The young tree pictured above shows the fine shape of this wonderful tree. If you live where you can raise Norway Maple, you can raise Harlequin. The symmetrical, round top makes it a beauty and it grows to a height of about 30 feet. Recommended for the boulevard because it doesn't get too large or tall. It didn't take us long to realize that Harlequin was one tree we wanted to be sure to offer. Be the first in your neighborhood to try this beautiful new variety. While they last, 4 to 5 foot trees: 4.69 each; 2 for 8.89, ppd.

"Crimson King" MAPLE

**The Red Maple that
Stays Dark Red
Most of the Season**

A4285— (Plant Patent No. 735). This new tree was recently brought into this country for propagation. We are very fortunate in that we were again able to secure a supply of this beautiful new maple and are shipping them on a "first come—first served" basis.

You have to see the foliage on Crimson King to really appreciate its beauty. It is much redder than the leaves of Schwedler's Maple, and

keeps its fiery, crimson color throughout most of the growing season.

If you want a truly beautiful red-leaved shade tree—one that your neighbors will talk about—we highly recommend Crimson King Maple.

Gurney's Genuine HYBRID ELM

The Rapid Growth Will Amaze You and Your Neighbors

It's hard to believe that the Hybrid Elm has actually grown from 8 to 14 ft. in one year and we just can't say enough good things about this wonderful tree. Our customers that are growing it, feel this way too. We don't know of any other shade tree that has as many good qualities and as few faults—if any—as our Hybrid Elm. Because our trees are all budded or grafted they are all identical in type of dark green foliage, bark color, texture, etc. In the years we have sold these trees they have been the perfect answer to our customers' prayers for a rapid growing, hardy, beautiful shade tree.

Hybrid Elms Shipped Ready-Pruned

We do this to allow the tree to replace the many small feeder roots lost in the digging process, and also, to reduce the chance of your losing it.

MULBERRY

For Hedge, Windbreak and Shade

The "Mother Tree," a variety of the Russian Mulberry, has been growing for many years here at Yankton. Bears early and ripens big, luscious, black fruit all summer. A rapid grower and does well in windbreaks, shelterbelts and wildlife plantings. Also makes a fine hedge and can be kept sheared to 3 to 4 ft. high or allowed to grow higher.

Plant them around orchards and the birds will eat the mulberries instead of the other fruit.

VILLOSA LILAC

Northern Grown ORNAMENTAL SHRUBS From GURNEY'S

Shrubs Add Beauty And Value to Your Home

Nothing is as unsightly as a home with a bare foundation. At a small cost you can plant Gurney shrubs that will add lots of beauty and actually increase the value of your home.

HOW TO PLANT—Planting instructions are sent along with your order but a good "rule of thumb" is to plant low shrubs 2 1/2 ft. apart; medium growers 3 to 3 1/2 ft. apart, and tall ones 4 ft. apart. Immediately following planting, be sure to prune all shrubs back to one-third their original height. This equalizes root loss.

bring home Pussy Willow Catkins in the early spring? Grow them yourself. Ours are large, fuzzy and gray all along the stems. Easy to grow. Plant 10 ft. apart. 2 to 3 ft. 89c each; 3 for 2.49; 5 for 3.89, ppd. 3 to 4 ft. 98c each; 3 for 2.79; 5 for 4.49, ppd.

BUTTERFLY BUSH

(Buddleia). A large shrub that blooms first summer planted. Tops may freeze back but will spring up quickly each spring from its hardy roots. Lovely, fragrant flowers.

A3811—*Ille de France*: Deep, rich purple.

A3812—*Pink Charming*

A3813—*Red Glory*

A3814—*White Feather*

A3815—*Midnight Blue*

Your Choice of Above: 98c each; 3 for 2.69, postpaid.

HIGH-BUSH CRANBERRY

A3841—(*Viburnum Americanum*, American Cranberry). Strong-growing, attractive shrub with leaves like maple leaves. Grows 6 to 8 ft. high and in the fall is set with abundant clusters of bright red berries the size of cranberries, which remain all winter as they are too sour to be eaten by the birds. 12 to 18 in., 1.19 each; 3 for 3.19. 18 to 24 in., 1.39 each; 3 for 3.89, ppd.

COTONEASTER

A Very Ornamental Shrub

A3826—(*Acutifolia*). An attractive, beautifully formed shrub with thick, glossy leaves which turn red in the fall. Has small white flowers in early summer followed by large black berries which remain on nearly all winter. Perfectly hardy. Grows 6 to 8 ft.

RED CRAPE MYRTLE

A3817—Undoubtedly the most beautiful shrub in the world. Simply covered with giant clusters of red bloom all summer. Hardy to Central Missouri. Farther north the tops die down, but if well protected will live over and bloom on new wood. Often shows no signs of life for several months after planting. 12 to 18 inch plants. 98c each; 3 for 2.69; 5 for 4.15, postpaid.

LILACS

VILLOSA LILAC

The Late Bloomer

A3868—Chinese Pink Lilac (*Villosa*). A late lilac of compact growth. Blooms in LATE June. Loose panicles of light pinkish-lavender. Prolific. BLOOMS 2ND YEAR AFTER PLANTING. If you've never tried the *Villosa*, you don't know what you're missing. 18 to 24 in., 1.19 each; 3 for 2.98, postpaid. 49

DWARF SHRUBS

ALPINE CURRANT

A3829—(*RIBES ALPINUM*). Very fine and perfectly hardy semi-dwarf shrub. Blooms in May with a profusion of small, fragrant yellow flowers followed by fine dark green leaves. A very dense shrub that does well in shade and can be shaped by pruning if desired. Makes beautiful compact hedge, too. 15 to 18 inch shrubs. 1.39 each; 3 for 3.69; 5 for 5.89, postpaid.

MEDIUM TALL SHRUBS

GLACIER Mock Orange

Fragrant and Double

A3880—This attractive shrub almost covers itself with many large, sweet scented, very double white flowers in June. Grows more compact than most other varieties and is ideal for foundation or group plantings. Grows 4 to 5 feet high. 12 to 18 inch plants 1.39 each; 3 for 3.89; 5 for 5.98, postpaid.

GOLDEN Mock Orange

Has Golden Leaves

A3881—(*P. Coronarius Aurea*). A beautiful perfectly rounded, dense shrub with rich yellow foliage when planted in full sun. Produces lots of fragrant white blossoms in June and is probably the best of all the golden leaved shrubs. Grows 3 to 5 feet tall and is hardy. 12 to 15 in. size 1.69 each; 3 for 4.69; 5 for 6.69, postpaid.

DOUBLE Mock Orange

Virginalis

A3878—A magnificent variety. The double flowers are large, handsome and fragrant. Fast growing and one of the best of all for cut flowers, too. 5 to 7 ft. tall. 18 to 24 in. size 98c each; 3 for 2.79. 2 to 3 ft. 1.39 each; 3 for 3.89, postpaid.

HYDRANGEA P.G.

Late Massive Flowered

A3848—Hardy shrub producing panicles of white flowers, as large as 10 inches across, changing to shades of pink in the fall. Blossoms hold on well into the winter. Excellent for foundation or shade plantings. If you want those massive white flowers, *Hydrangea P.G.* is the one you should plant. Grows 3 to 5 ft. tall. 18 to 24 in. 1.39 each; 3 for 3.89; 5 for 5.98, postpaid.

HYDRANGEA A.G.

Summer Snowball

A3847—Comes into bloom just after the passing of all early spring blooming shrubs. Grows best in partial shade—such as the north and east sides of buildings. 3 to 5 ft. tall. This is one *Hydrangea* you will want to try. All postpaid.

TOP FIVE GLADS

FRIENDSHIP

It's Tall and Ruffled

BG235—Tall, daintily ruffled, fresh-toned pure pink spikes, possess satisfying beauty. One of the most widely grown of all glads. It will add charm to your garden.

GOLD

Tops Among Yellows

BG266—Here is a glad that is claimed to be one of the best deep yellows ever introduced. It's tall and husky and it's head and shoulders above all other yellow glads.

MERRY WIDOW

Most Brilliant

BG312—A real show-off glad. Is a brilliant purple or mauve with a prominent creamy blotch. Medium-sized florets but you can see its brilliant color for a block.

DUSK

For Contrast

BG242—Its large snowball throat makes a striking contrast to the soft old rose and salmon undertone. An outstanding color combination you are sure to want.

SAN SOUCI

Flaming Scarlet

BG209—Our most outstanding scarlet glad. Flaming spikes give a blaze of color. Faint cream pencil line on lip petal. A Dutch origination and one of the finest.

The "Distinctively Different" Glad

MIDNIGHT

So Black You Won't Believe It

BG223—You can hardly believe your eyes when you see this glad. It's black and can't be described in any other way. Each year we try dozens of new glads in our trial grounds. This one came from Holland. It was spectacular from the time the buds first showed their coal black color until the flowers unfolded to a deep velvety black with a faint glistening maroon undertone. Flower heads, 18 to 24 inches with 6 to 8 blossoms open at one time. You should have heard the "oh's" and "ah's" when we displayed it at our glad show. It's a "show-stopper" for sure. Grows vigorously.

PATRIOT

Has Long Spikes

BG252—You've never seen such a brilliant orange-scarlet color. A very vigorous grower that produces tall, long spikes with 6 or more flowers open at one time.

COPPER LUSTRE

Beautifully Ruffled

BG275—A dusky rose shading to copper at the edges and blending to a dark tan interior. This rich blend of color adds cheer and personality. Heavy substance, ruffled, good grower.

GOLDEN SUNSHINE

A Ruffled Gold

BG257—Now a vibrant golden yellow glad that is slightly ruffled. It's a strong grower with rugged, sturdy stalks and loads of heavy flowers that are fine for cutting.

PALETTE

The Bright Red One

BG214—This glad is really spectacular. A blazing vermilion-red with a showy, deep purple blotch in the center. You just won't believe it until you see it.

BLUE CONQUEROR

A Most Beautiful Blue

BG240—Now you can grow glads that are a deep, dark velvety blue with paler shades toward the center. You'll want this beauty in your garden.

Glads are SO EASY To Grow Don't Be Without Them

This year you can enjoy glads at their best, right in your own garden. Nothing easier to grow and they make such a colorful showing. Most widely planted of all flowers.

Each year we keep adding more varieties and types and this year you will notice we have the largest listing in our history.

Read about the new types we are offering—the skyscrapers, the ruffled types, the green ones, the blacks, the tiny tots and many others. One type is just as easy to grow as the other.

Grow glads and you will understand why they are rapidly becoming America's favorite flower for all purposes.

How to Plant

Plant about 4 to 5 inches deep and 6 to 8 inches apart in a good garden soil. They like full sunshine and just ordinary garden care. Be sure to use Gurney's Gladiolus Dust to control thrip and disease (see listing below).

"BIG SHOW" GLAD OFFER

BG630X—This is the most colorful offer we have ever made. 1 each of all 16 varieties pictured on opposite page (page 50) and not labeled. Order this offer for a real showing. **298 PP.**

MORE *Rainbow* GLADS from GURNEY'S

Take your choice of any of the following varieties (not illustrated). 5 for 75c; 10 for 1.25; 25 for 2.45; 50 for 4.45. All labeled and postpaid.

WHITES

BG232—White Goddess. A lovely ruffled white; fine for cutting.

BG318—Mary Housley. Creamy white with a brilliant red throat blotch.

BG244—Snow Princess. An old one but still one of the top three whites. Has a slight pink tinge. Best cut flower in the lot.

PINK GLADS

BG248—Elmer's Rose. Deep rosy pink (almost red). Big, robust, tall. Heavily ruffled. Exceptionally fine for cutting.

BG317—Spic & Span. Tall ruffled salmon pink. Easy grower seems to like it anywhere.

BG250—Innocence. Beautifully ruffled rose baby-pink. Strong grower. Wonderful for cutting.

ORANGE and YELLOWS

BG273—Gatineau. A lovely ruffled orange for a spot of color.

BG225—Pactolus. Orange-salmon with deep, prominent red throat. Very showy.

BG319—Polygoon. Graceful spikes of well placed light yellow blooms. We like it.

BG254—Arenjuez. A real early one from Holland. Reddish-orange. Its name means "Arrangement." Well named.

"All America" Glad Selections from Gurney's

Considered the Finest

These are the finest of the "All America" award winners. They've earned their honors.

BG288—Rusty. A big smoky beauty. Chocolate red, bright red mark on lip petals. Silvery picotee edge.

BG289—China Blue. Largest of the "blue" glads. Soft blue-violet, deeper at petal tips, lighter toward center with a deep violet blotch.

BG293—Gypsy Dancer. Orange-scarlet with a "sunburst" of yellow on lower petals. Ruffled. Slender, graceful stems.

BG291—Little Pansy. All-America's first tiny tot. Light violet florets with rich, velvety, deep blue "pansy-like" blotches give a blend of lasting beauty.

New BLACK GLADS

Deep, dark colored glads are becoming more popular each year. We think our Midnight is the best of all but here are some others which are proving very popular.

BG200—Toen. Velvety black-red with a glossy sheen. Lighter shading with light line. Medium size flower. 3 ft. spike.

BG201—Arabian Night. Purple garnet with light pencil mark in throat.

BG202—Black Giant. Largest and most vigorous of the black glads. Real black with reddish cast.

BG203—Indonesia. Dark amaranth with velvet shadings. A real beauty.

Your choice: 38c each; 3 for 1.00; 6 for 1.75, ppd.

BG680X—BLACK GLAD COLLECTION. 1 each of all 4 listed above only 1.00 (add 10c if you wish them labeled). 2 collections for 1.85, ppd.

The Giants of them all

SKYSCRAPER GLADS

The Giants of the Glad World

Not uncommon for these glads to measure 5 feet tall to tip of spike! Real giants that impress everyone!

BG324—Conrad. Deep yellow, slightly ruffled. Small red blotch. A monster.

BG325—Rose Spire. Well named. Deep rose color and lofty spire-like spikes. Usually open ten blooms at one time.

BG313—Maria Goretti. Truly a giant. Purest white with just a few ruffles.

Your choice: 20c each; 3 for 55c; 6 for 1.00, ppd.

SKYSCRAPER SPECIAL

BG670X—1 each of all 3 Skyscrapers listed above only 50c; 3 offers, 1.25, ppd.

REDS

BG236—Hildegard. Intensely ruffled, glistening scarlet florets are gracefully poised on towering spikes.

BG210—Happy End. Brilliant orange-red with a yellow throat. First to bloom. Very showy.

BG211—Monsoer. This is one of the showiest of all the true velvet-reds. Well placed flowers.

BLUES

BG221—Elizabeth the Queen. The leading lavender of all time. What more can one say?

BG311—Ravel. True light blue. Big and handsome. We like it very much.

BG208—Mabel Violet. A deep wine-purple. Very showy. Made a big hit at the State Fair. Strong grower.

BG243—Flying Dutchman. A deep dark blue. Some call it violet. Extra good.

BG330—Lilac Time. Huge lilac-blue with deeper shadings.

SMOKY COLORS

BG227—Silhouette. A smoky lilac with old rose shadings. Most unusual color effect.

BG229—Uhu. Light chocolate brown and lobster red with attractive orange penciling in throat. Slight bluish cast.

BG309—Blue Haze. One of the most popular smokies in our trial grounds. Imported from Holland. The color is a reddish-violet with misty blue marblings. It defies description. There is no other glad just like it.

BG295—Landmark. A huge, ruffled tall cream that will make your garden a landmark to passersby.

BG296—Apple Blossom. Cream throated white, flush pink edges.

BG297—Emperor. Purple, white throat.

BG285—Ben Bur. Ruffled and frilled. Soft medium rose pink.

BG286—Horizon. Misty rosy-lavender. Very large.

BG287—Thunderbird. Fiery, vibrant deep per-simmon, heavily ruffled.

Gentlemen:

The midget lemon tree which I ordered from you 2 years ago this spring has given us nothing but enjoyment plus more enjoyment! I felt compelled to write you about it.

Two pies sir from one midget lemon the size of a Calif. navel orange (I do not exaggerate—it was mammoth).

An extremely well pleased customer!

Margaret R. Helder

Port Orchard, Wash.

Gentlemen:

I have been ordering from you for about twelve years, and until now I have not expressed my appreciation of your wonderful nursery stock and friendly service.

I can see you choose your stock carefully and that it is in excellent condition when sent. I notice you wrap it carefully and send it at the proper time, even though it means that as many as four or five mailings times occur from one order, such as shrubbery, asparagus, strawberries and tomatoes.

I always have the feeling you are friendly and generous.

This is just a friendly letter from a farmer's wife who is an ardent gardener.

GLADS ARE THE PERFECT "All Purpose" FLOWER

- For Bouquets
- Corsages
- Center Pieces
- Cutting

We think glads are the finest of all cut flowers. Cut when 1 or 2 flowers on the bottom are opening and the other buds will open gradually, lasting several days. They make excellent, easy to arrange bouquets, corsages and many other decorative pieces. If you have never grown glads before you are in for a real pleasant surprise.

SAVE WITH GLAD BULBLETS

The Economical Way to Raise Glads

BG315—If you want lots of glads for the money and can wait a while for some of them to bloom, plant bulblets. The same as we use for our planting stock. With good conditions, many bloom the first season but most the following.

We offer these in mixed colors. You will have fun growing them and many pleasant surprises when they bloom. All postpaid.

BG159—Formal Decorative Type Dahlia. A big one that has a beautiful clear deep-lavender color. A sure-fire bloomer. The strong plant carries loads of flowers. Excellent cut flower. One of our finest dahlias with blossoms usually 8" across. 85c each; 2 for 1.55; 4 for 2.85, ppd.

Deep Velvet

BG161—Formal Decorative. The large 8" to 9" blooms are a beautiful deep velvety red to near black. The 5' stocky plants are covered with flow-

ers which form a mass of beauty. An all season beauty. 85c each; 2 for 1.55; 4 for 2.85, postpaid.

Sunburst

BG156—Informal Decorative. Huge 8 to 10 inch blooms on 4 foot plants. Can be described as "an explosion of yellow sunshine." Sunburst is a true beauty. One flower makes a bouquet. 85c each; 2 for 1.55; 4 for 2.85, ppd.

Pink Giant

BG163—Informal Decorative. The delicate clear pink

blooms give a welcome beyond words. Huge 10" flowers on sturdy 4' to 5' bushes are held well above the foliage. Strong stems make it desirable for cutting. 95c each; 2 for 1.75; 4 for 3.25, postpaid.

New DAHLIAS (not pictured)

BG140—Montebello. A deep wine-red almost purple. Good sized blooms. Strong husky grower. 75c each; 2 for 1.35; 4 for 2.45, ppd.

BG141—Scarlet Glory. (Inf. Dec.) Unusual color.

BG143—Kirsten Flagstad. An old favorite but still among the best. 10" to 12" blooms. Bright golden yellow. 75c each; 2 for 1.35; 4 for 2.45, ppd.

BG144—Lois Welcher. Very attractive bi-color. Fanny purple with white tips. 6 to 8 inch blooms on strong stems. Medium height bush, dark green foliage. 85c each; 2 for 1.55; 4 for 2.85, ppd.

How to Grow These Beautiful Decorative Dahlias

Our dahlias need nothing but average garden care. They appreciate well-drained soil and full sunshine. Plant them when the ground warms up. Stake the tall growing ones when you plant; the foliage soon will hide the stakes. Set your dahlias 2 to 4 ft. apart, depending upon how thick you want them. In the fall, after a frost, dig the bulbs and store them in a root cellar or your basement—just like you store potatoes.

TRIAL GARDEN DAHLIA OFFER

BG550X—Now you can have some of the finest from our test plantings. You'll be delighted with their size and beauty. Varieties not labeled. 5 bulbs only 1.49, postpaid.

W. H. T.

William Howard Taft

BG146—It is almost impossible to describe this beauty. A most unusual smoky, old rose color that seems to change with the light. We know you will like W.H.T. very much. 85c each; 2 for 1.55; 4 for 2.85, ppd.

Arthur Godfrey

BG157—Formal Decorative. The giant 12" blooms of orient-red with buff shadings create a heart warming sight. Attracted most attention in our dahlia fields last year. Makes a medium size plant with wonderful vitality. 95c each; 2 for 1.75; 4 for 3.25, postpaid.

California Idol

BG139—Informal Decorative. A mammoth flowering yellow with long stems make it fine for cutting. The bright yellow blooms add a pleasing contrast in your garden. Very free blooming giving a mass of color all season long. You'll like it. 85c each; 2 for 1.55; 4 for 2.85, postpaid.

5 Star General

BG145—Formal Decorative. A huge pink with yellow blendings. 8 to 10 inch blooms and a strong vigorous plant. It carries its flowers well and puts on a tremendous show. 75c each; 2 for 1.35; 4 for 2.45, ppd.

Rose Glory

BG152—Formal Decorative. The name is very appropriate for this dahlia. A beautiful glorious soft pink. 6 to 9 inch blooms on strong 4 foot plants. We think it is the best all around dahlia we have ever offered and know you'll like it. Rose Glory make a very good cut flower. 75c each; 2 for 1.35; 4 for 2.45, ppd.

Autumn Giant

BG147—Informal Decorative. The largest flowered dahlia that we are offering. Pleasing shades of reddish-orange and bronze. A monster in size and a show dahlia you can brag about and be honest while doing it. Strong vigorous plants and an abundance of colorful blooms. Be sure to try this beauty in your garden if you want lots of color. 1.00 each; 2 for 1.65; 4 for 2.95, ppd.

Our Hardest FLORIBUNDA ROSES

MOST POPULAR IN AMERICA

Once you try Floribunda roses you'll agree they have no equal. Each year, more and more folks are planting this wonderful type.

Bushy plants covered with clusters of large, double roses just like regular Tea Roses. Brilliantly colored blooms cover the bushes from spring until frost. Use in rose bed, for borders or in any place you want a splash of color all summer. Floribunda roses bloom the first year planted. If you have never raised roses before you'll be delighted with Floribundas.

Gurney's Hardest CLIMBING ROSES

For Fence—Arbor—Trellis

No other type of rose takes the place of the climbing roses. Grow them on a trellis, along the side of the house or on either side of the front entrance or a gate and you truly have a sight to behold. These are as hardy as you can buy.

A3445—PAUL'S SCARLET. Most popular climber. Flower big, full tea-rose type. Lots of blooms! Shiny, rich green foliage is free from mildew.

A3444—WHITE DAWN. The new, hardy, everblooming white climbing rose. Hundreds of Gardenia-like blossoms. Flowers first-year planted. Introduced by University of Minnesota.

A3670—RED LAFAYETTE. Stands dryness better than other roses. A flaming red and fine for cutting. 1.39 each; 3 for 3.89; 6 for 7.49, postpaid.

A3656—DAGMAR SPATH. Clusters of large, pure white blossoms that are semi-double. 1.39 each; 3 for 3.89; 6 for 7.49, postpaid.

A3669—RED PINOCCHIO. (Pat. No. 812.) Double, cup-shaped blooms of velvety crimson 3½ in. across. 1.50 each; 3 for 3.98, postpaid.

Gurney's ROSE GUARANTEE

We guarantee all Gurney's Roses to be large, two-year-old, field-grown plants, healthy and free of disease. They are state and government inspected, and carefully handled, packed and shipped. If they do not satisfy you 100% on arrival, return promptly at our expense and we will replace or refund your money in full, whichever you prefer.

How We Grade

Gurney's are a member of the American Association of Nurserymen, and our grading complies faithfully with their Horticultural Standards.

Gurney's SHRUB ROSES will grow anywhere—see illustrations at left

Hardest Roses Money Can Buy

By popular demand we are again listing the best of the Bush or June Roses. They are hardy, beautiful, and best of all, easy to raise. No winter protection necessary with these roses and they are hard to beat in the border, for a hedge, or as a foundation planting. If you have had trouble raising roses in the past, by all means try these Bush Roses.

FINEST SHRUB ROSES

A3690—RED GROOTENDORST. One of the best shrub roses. Bright red flowers, like carnations, that are very showy against the fine heavy foliage. Grows 3 to 5 feet high.

A3689—PINK GROOTENDORST. Very similar to the Red Grootendorst, but has clear pink flowers with a delightful spicy fragrance.

A3685—HARRISON'S YELLOW. One of the very best yellow shrub roses and one that has been a favorite for a great many years. Semi-double, fragrant, bright yellow flowers and grows about 6 feet tall.

A3676—PINK GLORY. We believe this is the hardest and most free blooming of all June Roses. We introduced this rose for the first time several years ago and its popularity is gaining by leaps and bounds. Imagine hundreds of beautiful, pink, fully double blooms of large size.

A3687—LILLIAN GIBSON. Produces

hundreds of large, double, rose-pink blossoms on sturdy upright bush that grows to 5 feet. Very fragrant and hardy. Developed by the late Dr. N. E. Hansen.

A3693—BROWNELL'S "NEARLY WILD." A beautiful rounded shrub, loaded all summer with great clusters of apple-blossom-pink, single roses. Much larger than the wild roses, and very hardy. Grows 4 to 5 feet high.

Two Beautiful Bush Roses from Canada

A3698—WASAGAMING. Hard to pronounce but not hard to grow this beauty from Canada. If you like fully double blossoms, you'll like Wasagaming. This rose is fast becoming very popular.

A3683—GALLICA GRANDIFLORA. Semi-double large flowers of a brilliant, poppy red-pink tone. Beautiful, finely cut foliage and a real sight to behold when in bloom.

PATENTED

Hybrid Tea Roses

SEE ILLUSTRATIONS AT LEFT

You will find listed below and pictured at the left some of the very finest Patented Everblooming Hybrid Tea Roses that money can buy. We have added new varieties to the older favorites and every one is outstanding.

A3633—PINK PEACE. (P.P. 1759.) This great new rose has everything with giant flowers up to 5 inches across. A rich color, delightful fragrance and vigorous healthy plants, with rich, attractive, leathery foliage. Fully double flowers are a luminous, unfading pink with petals outlined by the most delicate edging of lighter color. Acclaimed by thousands as the greatest recent rose introduction. 3.00 each; 3 for 7.95, postpaid.

A3634—GARDEN PARTY. (P.P. 1814.) One of the finest in the test gardens this season. You'll enjoy a glorious display from early June until fall. Vigorous, healthy plants produce huge, gorgeous flowers of the richest ivory with just a touch of apple-blossom pink. One of the loveliest All-America roses in years that rightly deserves a place in every rose garden. One of the first successful crosses of two great roses—Peace and Charlotte Armstrong. 3.00 each; 3 for 7.95, ppd.

A3636—CHRYSLER IMPERIAL. (P.P. 1167.) An All-America Award Winner that may well prove to be the greatest exhibition rose of all time. Huge, long, tapering, vivid, rich crimson buds are a sight to behold. Buds open to a brilliant 40-petal blossom of enchanting fragrance. Sturdy, healthy plants with an abundance of dark green, semi-glossy foliage make it fine for cutting. 2.50 each; 3 for 6.75, ppd.

A3647—TWILIGHT. (P.P. 1434.) Now, a lovely new pastel hybrid tea rose that is outstanding in the garden and in flower arrangements. Its soft lavender-lilac petals have a silvery-cream reverse producing an exquisite contrast. Long pointed buds burst into fully double flowers. Supply limited so order early. 2.75 each; 3 for 7.50, postpaid.

A3639—QUEEN ELIZABETH. (P.P. 1259.) A magnificent new rose with exceptional vigor and disease resistance. Enjoy its breathtaking blend of soft rose and pink, a delicacy against its deep green, glossy foliage. Fragrant flowers all summer long, with added beauty year after year. A long stemmed grandiflora, fine for cutting. 2.50 each; 3 for 6.75, postpaid.

A3641—PEACE. No longer patented. Gold Medal Winner of the American Rose Society. Acclaimed the greatest rose ever created because of its perfect buds opening into large, fragrant and fully double flowers. As the rich gold edged cerise buds open the outer petals change to canary then lighten to a creamy ivory. A long lasting flower, beautiful at all stages. A free-blooming, healthy grower. 98c each; 3 for 2.89, postpaid.

A3649—BUCCANEER. (P.P. 1119.) A beautiful, brilliant, unfading deep yellow. The tall growing plant produces quantities of streamlined blossoms. Long stems, and a clear, lasting yellow color make it fine for cutting. 2.50 each; 3 for 6.75, ppd.

A3650—KORDES PERFECTA. (P.P. 1604.) You will agree with Wilhelm Kordes, creator of this unusual beauty, it's one of the finest of all great roses. A fascinating combination of creamy-white edged carmine-pink on a yellow base. 3.00 each; 3 for 7.95, postpaid.

A3638—MIRANDY. (P.P. 632.) George Gurney says this is one of America's finest dark red roses. Immense, fully double and very fragrant flowers last a long time. Makes a vigorous plant with deep green foliage, fine for cutting. Blooms from June 'til frost. 2.25 each; 3 for 6.00, postpaid.

A3651—STERLING SILVER. (P.P. 1433.) The newest color in roses. Long, pointed lavender-pink buds open with delicacy into large, very fragrant, silvery-lavender blossoms. Its unusual color and perfect form make it the center of attraction—a rose you'll soon claim as your favorite. 3.00 each; 3 for 7.95, postpaid.

Gurney's Everblooming HYBRID TEA ROSES

Favorites of Everyone. Gurney's list the finest hybrid-tea varieties available. We believe you will love each and every one of the choice everblooming below. Try them all, if you can, but, if not, any of them will give you flowers from June until frost.

A3629—CRIMSON GLORY. One of the best deep red roses ever introduced. Large, perfectly shaped flowers that are very fragrant. Blooms freely on strong stems and makes a real fine cut flower.

A3575—PICTURE. Truly one of the very finest of all pink roses. It is a clear pink with just enough salmon to give it a warm glow. Blooms continuously, and its perfectly shaped buds and blooms make it pretty as a picture.

A3510—CHRISTOPHER STONE. A brilliant, sparkling, scarlet crimson rose with shapely long pointed buds that open into large attractive flowers. A healthy, vigorous grower and free-blooming. Stands lots of heat, has rich fragrance, and is one of the best bright red roses.

A3519—ECLIPSE. One of the finest of all yellow roses. The golden-yellow streamlined buds are often more than 2 inches long. Very vigorous grower and blooms almost continuously. An excellent cut flower with strong, erect stems.

A3550—K. A. VICTORIA. Probably the most popular of all white tea roses, and rightly so. Strong growing and beautifully shaped buds and flowers. A very profuse bloomer in the garden. One of the best white tea roses that was ever introduced.

A3602—THE DOCTOR. This is one of the finest of all deep pink roses. Its beautifully shaped blooms are very fragrant, and its clear bright color will make it a favorite of yours, too.

A3516—CONDESA DE SASTAGO. Large, fragrant flowers with inside of petals copper-red and outside brilliant yellow, creating an outstanding two-tone effect. A healthy, vigorous grower that is very free-blooming. Blooms well everywhere.

A3579—POINSETTIA. A glowing poinsettia red. The buds are beautifully shaped and it flowers on a strong growing plant. Known especially well for its brilliant color and ability to produce lots of blossoms.

A3513—COUNTESS VANDAL. Long pointed buds on strong upright stems. Very attractive blend of pink, copper, gold and salmon. One of the best multi-colored hybrid roses and a very free-blooming variety you're sure to like.

A3521—EDITOR McFARLAND. A big, double, glowing pink. One of the finest of all pink roses. Always has the most blossoms. One of the favorite varieties with good rose growers and we know you will like it too.

A3628—CHARLOTTE ARMSTRONG. All America Award Winner. Its long slender buds are popular the country over. Now available for the first time at regular prices. This is one of the leading red tea roses.

Gurney's "SURE TO BEAR" Plum Special

Grow These Varieties Anywhere. Here are 3 of the finest Hansen hybrid plums that money can buy. All of them bear early and will grow anywhere. Now you can have all the fruit you can use and plenty to give away with this fine, sure-to-bear collection.

1 WANETA. A very large plum with attractive dark red skin. Has rich, tender, juicy, golden-yellow flesh. Perfectly hardy and will bear for years.

1 OPATA. Often bears the first year after planting. A juicy tangy plum of medium size and a very pleasant flavor. This hybrid plum-cherry cross bears a very heavy crop and makes a good pollinizer.

1 KAGA. The high quality, deep

golden yellow flesh is sweet and juicy. Ripens mid-Aug. to Sept. Fruit stays edible on the bush for 3 weeks after ripening. Often called the apricot-flavored plum. Hard to beat for sauce, plum butter or eating fresh.

1 Sapa. The rich sweet, black plum with deep purplish-red flesh.

A DELICIOUS NEW Butter Wax Bean IT'S SMOOTH AS BUTTER

139—(54 days). This is a brand new wax bean that was developed in the East. It has done wonderfully well for us here and we know it will do a job for you. It has unusual vigor and is a tremendous yielder. Butter Wax makes bushes 16" tall, sturdy and rugged. Pods are about 6½" long slightly curved, thick meaty and richly flavored. The color is an attractive buttery yellow. Seed color, purplish black. We think this bean has a great future. Seed stock small this year, so order early.
